The Great Pyramid Something Much More Than A Tomb:

A Miracle in Stone - The Great Pyramid Joseph A. Seiss, 2020-09-28 Still one of the largest pieces of architecture ever constructed the Great Pyramid has long been the subject of wonder as to when it was built by whom and most importantly why The conventional explanation is that it was built during the reign of the Pharaoh Khufu by skilled Egyptian laborers as a funerary monument In the 19th century in the absence of hard information other than detailed studies of its dimensions a whole class of speculation grew up which has been called pyramidology The pyramidologists came to believe that the Great Pyramid encoded advanced knowledge of the physical universe and the course of human history This book is one of the primary texts of pyramidology THIS book is meant to give a succinct comprehensive account of the oldest and greatest existing monument of intellectual man particularly of the recent discoveries and claims with regard to it If the half that learned and scientific investigators allege respecting the Great Pyramid of Gizeh be true it is one of the most interesting objects on earth and ought to command universal attention It has been unhesitatingly pronounced and perhaps it is the most important discovery made in our day and generation Simply as an architectural achievement this mysterious pillar from the time of Alexander the Great has held its place at the head of the list of The Seven Wonders of the World But under the researches and studies of mathematicians astronomers Egyptologists and divines it has of late been made to assume a character vastly more remarkable Facts and coincidences so numerous and extraordinary have been evolved that some of the most sober and philosophic minds have been startled by them It would verily seem as if it were about to prove itself a sort of key to the universe a symbol of the profoundest truths of science of religion and of all the past and future history of man So at least many competent persons have been led to regard it after the most thorough sifting which the appliances of modern science and intelligence have been able to give it A Miracle in Stone. Rubinstein, 2014-09-11 For many intelligent people the stuff of history does not consist of the kind of dry as dust investigations of diplomatic economic or political history that most university historians research and write about but the famous topics of history's mysteries who was Jack the Ripper Was there a conspiracy to kill President Kennedy Did Richard III murder the Princes in the Tower What are the mysteries of the ancient Pyramids Not only have a great many books and articles been written on these and similar topics by so called amateur historians but they have generated societies conferences newsletters and television programmes Many people who are not academic historians take a keen interest in these topics and have in some cases made themselves real experts on them with interesting theories of their own Despite all of this however these topics are virtually ignored by academic historians and can be treated with contempt In *Shadow Pasts* William D Rubinstein a well known and widely published history professor examines seven of the most famous and interesting topics which have been discussed debated examined and written about by

amateur historians Each of these mysteries and the theories surrounding them are examined in detail with Professor Rubinstein presenting his own original and sometimes surprising conclusions about what really happened **The Great Pyramid** Joseph A.
