The Great Warplanes Of The 1990s:

The Great Warplanes of the 1990s Bill Yenne,1990 An overview of the world s top combat aircraft representing the state of the art in warplane technology *Great Warplanes of the 1990s* Bill Tenne,1991 [Great Warplanes of the 80s](#) Bill Yenne,1988-08 *G-Force: Flying the World's Greatest Aircraft* James Bennet,2016-10 Read what military pilots have to say about flying some of the most incredible fighting aircraft ever built It s like a 20 million strap on carnival ride AH 64 Apache Pilot I had high expectations and it s beat eery one of those The whole jet is awesome F A 18F Super Hornet pilot The role of the pilot has changed hugely in the last sixty years of military aviation Jet pilots in the 1960s flying types such as the Harrier and F 102 would have spent a huge portion of their concentration just keeping the aircraft under control That left little spare mental capacity to locate and engage the enemy Today the opposite is true Computers have made flying so simple that it is now considered very easy to fly the SAAB Gripen or Lockheed Martin F 35 Lightning II allowing the pilot to focus fully on his or her mission *G Force Flying the World s Greatest Aircraft* is a celebration of the experience of flying some of aviation s most spectacular powerful and dangerous machines from early jet fighters such as the F 86 Sabre and MiG 15 to today s F 22 Raptor and Eurofighter Typhoon Packed with first hand interviews with test and combat pilots from the world s air forces and illustrated with extensively researched and striking imagery *G Force Flying the World s Greatest Aircraft* is thrilling ride alongside the pilots who fly the aircraft every day Featuring first hand accounts of combat over Korea in the MiG 15 endurance missions in the B 2 and bombing Iraqi targets in the Tornado this book puts the reader directly in the pilot s seat and will appeal to aviation enthusiasts of all ages *Lake Michigan's Aircraft Carriers* Paul M. Somers,2003 *Lake Michigan s Aircraft Carriers* is the story of the USS Wolverine and the USS Sable two Great Lakes excursion ships converted for use as aircraft carrier training during World War II Through the duration of the war the United States Navy qualified 17 800 pilots for aircraft carrier operation Training the pilots on either the Atlantic or the Pacific Ocean would have exposed the training ships to the danger of submarine attack while requiring the escort of fighting ships that were needed elsewhere It would also have involved arming and armoring the ships used for training Commander R F Whitehead came up with an idea that solved all of these problems He suggested doing the training on the protected waters of the Great Lakes The USS Wolverine and the USS Sable were chosen and thus became the only fresh water paddle wheeled coal fired aircraft carriers in the history of the world Author Paul M Somers shares his collection of vintage photos and a lifetime of research to detail the history of these two great vessels from their life as cruise ships to their contributions to the war effort and then to their eventual scrapping

[The U.S. Navy in the 1990s](#) James L. George,1992 The recent remarkable changes in world politics have demanded a redefinition of the role of the United States in the international community In this book naval analyst James L George makes a penetrating assessment of the U S Navy in the post Cold War era and offers a likely scenario of options and opportunities over the next decade and beyond Following a helpful look at the Navy s development since World War II Dr George stresses

the importance of mission analysis and shows that the service is likely to play a more central role in nuclear deterrence He believes that an added responsibility will be placed on the Navy for European and Atlantic defenses and that its already significant involvement in Third World operations may grow Extensive base closings around the world will necessarily limit the effectiveness of the other services increasing the importance of naval presence and readiness in what will remain a volatile Third World theater In light of altered missions Dr George closely analyzes force composition and the roles of naval aircraft surface combatants and submarines as well as the continuing need for a blue water navy He does not ignore the Marines explaining how continuing drawdowns across the military spectrum may enhance their importance The author considers the lessons learned from Desert Shield and Desert Storm he also probes the unknowns of naval arms control and several so called New World paradigms Dr George s vision entails not just less of the same but a significant reconfiguration of U S naval forces and missions into the twenty first century It is must reading for all those interested in the Navy s future
