interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national

Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions *Regional and Ethnic*

Conflicts Judy Carter, George Irani, Vamik D Volkan, 2015-07-02 This book provides readers alternative first hand front line perspectives and insights on some of the major ethnopolitical conflicts plaguing the planet It promotes the cultivation of a global culture of conflict prevention and peace promotion

Euroscepticism as a Transnational and Pan-European Phenomenon John FitzGibbon, Benjamin Leruth, Nick Startin, 2016-08-19 As the EU enters an increasingly uncertain phase after the 2016 Brexit referendum Euroscepticism continues to become an increasingly embedded phenomenon within party systems non party groups and within the media Yet academic literature has paid little attention to the emergence of and increased development of transnational and pan European networks of EU opposition As the gap between Europe s mainstream political elites and an increasingly sceptical public has widened pan European spheres of opposition towards the EU have developed and evolved The volume sets out to explain how such an innately contradictory phenomenon as transnational Euroscepticism has emerged It draws on a variety of perspectives and case studies in a number of spheres the European Parliament political parties the media civil society and public opinion Examining to what extent the pan European dimension of Euroscepticism is becoming increasingly influential it argues that opposition to European integration has for too long been viewed somewhat narrowly through the paradigm of national party politics This text will be of key interest to scholars students and professionals in EU politics European studies political parties and more broadly to comparative politics and international relations

The Global Financial Crisis George K. Zestos, 2015-10-05 Although banking and sovereign debt crises are not unusual the crisis that has unfolded across the world since 2007 has been unique in both its scale and scope It has also been unusual in being both triggered by and mainly affecting developed economies Starting with the US subprime mortgage crisis and the recession in 2007 2009 the problem soon erupted into financial crisis in Europe A few of these countries came to the brink of bankruptcy and were rescued by the EU and the IMF on the condition they adopt austerity measures The detrimental social effects of the crisis in both the US and Europe are still emerging Although there have been several studies published on the US crisis in particular there has so far been an absence of an accessible comparative overview of both crises This insightful text aims to fill this gap offering a critical overview of causes policy

responses effects and future implications Starting with the historical context and mutation of the crisis the book explores the policies regulations and governance reforms that have been implemented to cope with the US subprime mortgage crisis A parallel analysis considers the causes of the European sovereign debt crisis and the responses of the European Union EU examining why the EU is as yet unable to resolve the crisis This book is supported with eResources that include essay questions and class discussion questions in order to assist students in their understanding This uniquely comprehensive and readable overview will be of interest and relevance to those studying financial crises financial governance international economics and international political economy
