The Green Dream:

The Green Dream Olga Cabral,1990 **Gates of Hell** Daniel Jupp,2023-09-26 In this powerful and hard hitting analysis Daniel Jupp examines the enormous personal power and political influence of one of the world s richest men The Gates of Hell covers everything from the childhood influences that shaped Bill Gates to the Microsoft years and his current incarnation as the most powerful philanthropist on the planet Jupp traces just how vast and unaccountable the influence of Gates has become including his leading role in current global health policies and the drive toward a net zero Green Revolution which threatens the economic and social fabric of the entire western world Firmly asking the questions that mainstream commentators often avoid Jupp supplies a damaging criticism not just of Gates himself but of the political corruption and inertia which has allowed one man to effectively direct key global policies adopted by multiple nations without any democratic accountability From educational and health campaigns of dubious efficacy and unexamined risk to green policies that make little rational sense Jupp shows how the public private funding hybrid championed by The Gates Foundation allows a powerful billionaire to push health agriculture and science policies in directions which profit investors whilst harming others who have no say in any part of the process Now more than ever following the COVID 19 pandemic the consequences of lockdowns mass mRNA vaccinations and the advances of net zero policy questioning why one man who has never been elected to office has such influence on these decisions is vital **The Poisoner** Gail Bell,2003-10-14 Years after Dr William Macbeth died his ornate medicine case passed to his estranged son Over the protests of his family the son buried it deep in the ground out of sight and out of reach Then ten years old Macbeth s granddaughter Gail Bell watched the mysterious case of elixirs arrive at her home She watched her father treat it like a poison chalice Only decades later would she understand why the case concealed evidence of her family s deadly secret In 1927 Macbeth was accused of poisoning two of his sons He never stood trial Bell determined to discover how this calm warm and caring healer could become a cunning murderer and evade detection eventually uncovered the dark secrets that her father had tried to hide from the world But as the unexpected twists of her investigation reveal nothing is as straightforward as it seems At the same time she explores what the crime of poisoning reveals about humanity through the perspectives of myth history fiction and the great poison trials A pharmacist by profession and the granddaughter of a suspected poisoner by circumstance she is perfectly placed to revisit the cases of Cleopatra Emma Bovary Napoleon s doctor Harold Shipman and Dr Crippen and she is equally well suited to chronicle the devastating effects of poison s many forms from hemlock and belladonna to arsenic and strychnine Poison is at once a fascinating history of the science and sociology of poisoning and a true first person account of one woman s struggle to understand its mysterious role in her own family s murderous history **The Adventures of Itty Bitty Me and Her Friends** S. Climate Change and the Nation State Anatol Lieven, 2020 The climate emergency is intensifying while international responses continue to falter In Climate Change and the Nation State Anatol Lieven outlines a revolutionary approach grounded in realist thinking This involves redefining climate change as an existential threat to nation states which it is and mobilizing both national security elites and mass nationalism He condemns Western militaries for neglecting climate change and instead prioritizing traditional but less serious threats Lieven reminds us that nationalism is the most important force in motivating people to care about the wellbeing of future generations The support of nationalism is therefore vital to legitimizing the sacrifices necessary to limit climate change and surviving and the effects of it some of which are now inevitable This will require greatly strengthened social and national solidarity across lines of class and race Throughout Lieven draws on historical examples to show how nationalism has helped enable past movements to implement progressive social reform Lieven strongly supports plans for a Green New Deal in the USA and Europe In order to implement and maintain such changes however it will be necessary to create dominant national consensus like those that enabled and sustained the original New Deal and welfare states in Europe Lieven criticizes sections of the environmentalist left for hindering this by their hostility to national interests their utopian political naiveté their advancement of divisive cultural agendas and their commitment to open borders Radical and
