Ecology of the Green Salamander Ronald A. Canterbury,1991 **Natural History and Habitat Selection of the Green Salamander, *Aneides Aeneus* (Cope and Packard), in Northeastern Alabama** Sara Elaine Viernum,2007

Size and Altitude Correlation in the Green Salamander, *Aneides Aeneus* Amy Dolores Atkins,1988 Status of the Green Salamander (*Aneides Aeneus*) in the Blue Ridge Mountains Christopher Randall Wilson,2001 *Seasonal Activity Pattern and Crevice Characteristics of the Green Salamander (*Aneides Aeneus*) in the Red River Gorge, Kentucky* Jason P. Ritzert,2010 Green salamanders *Aneides aeneus* seasonal activity patterns have not been well documented across their range The species exhibits high site fidelity to crevices in sandstone and limestone rock outcroppings however it is unclear why they select these habitats Two sites at the Red River Gorge in Kentucky were monitored from 1 June 2006 to 30 July 2007 Each site was thoroughly searched and crevices used by green salamanders 19 crevices marked as well as the three closest unused crevices 57 crevices Crevice height off the ground width length aspect and depth were determined for all used and unused crevices During weekly visits to both study sites crevice temperature and percent relative humidity were recorded I found no significant difference between the temperature of used and unused crevices however the used crevices provided a high stable percent relative humidity approximately 92% compared to unused crevices which had a lower fluctuating humidity approximately 60 85% The physical characteristics of the used and unused crevices did not differ significantly These results indicate green salamanders apparently use a crevice because it provides a consistently moist environment
