Models of Madness Dr John Read,Professor Richard Bentall,Loren Mosher,John Read,Jacqui Dillon,2013-06-19 Are hallucinations and delusions really symptoms of an illness called schizophrenia Are mental health problems really caused by chemical imbalances and genetic predispositions Are psychiatric drugs as effective and safe as the drug companies claim Is madness preventable This second edition of *Models of Madness* challenges those who hold to simplistic pessimistic and often damaging theories and treatments of madness In particular it challenges beliefs that madness can be explained without reference to social causes and challenges the excessive preoccupation with chemical imbalances and genetic predispositions as causes of human misery including the conditions that are given the name schizophrenia This edition updates the now extensive body of research showing that hallucinations delusions etc are best understood as reactions to adverse life events and that psychological and social approaches to helping are more effective and far safer than psychiatric drugs and electroshock treatment A new final chapter discusses why such a damaging ideology has come to dominate mental health and most importantly how to change that *Models of Madness* is divided into three sections Section One provides a history of madness including examples of violence against the mentally ill before critiquing the theories and treatments of contemporary biological psychiatry and documenting the corrupting influence of drug companies Section Two summarises the research showing that hallucinations delusions etc are primarily caused by adverse life events eg parental loss bullying abuse and neglect in childhood poverty etc and can be understood using psychological models ranging from cognitive to psychodynamic Section Three presents the evidence for a range of effective psychological and social approaches to treatment from cognitive and family therapy to primary prevention This book brings together thirty seven contributors from ten countries and a wide range of scientific disciplines It provides an evidence based optimistic antidote to the pessimism of biological psychiatry *Models of Madness* will be essential reading for all involved in mental health including service users family members service managers policy makers nurses clinical psychologists psychiatrists psychotherapists counsellors psychoanalysts social workers occupational therapists art therapists **The Struggle for Liberty** Ralph Raico,2025-03-17

Ralph Raico a student of Ludwig von Mises was a historical revisionist in the best sense of the word He cared not for ideological pedigrees or bias he sought the grace of truth wherever it took him In *The Struggle for Liberty* readers will find a wide ranging look at the history of the West which draws upon ideological trends that began in late antiquity and developed in the Middle Ages Raico highlights important characteristics of Western history such as the tension between secular power

and church power and how this fostered political decentralization and economic development in the West Raico outlines how the laissez faire liberals led the fight against absolutism in the seventeenth century and how they revolutionized European and American politics in the eighteenth century He goes on to cover in detail the works and insights of the radical liberals in the nineteenth century who won important battles against protectionism socialism imperialism and militarism Modern readers looking to broaden their knowledge of political history beyond the usual often repeated narratives will likely find many refreshing new details here Beginners may also find this book to be a fruitful starting point for studying the history of Western political thought Adapted from ten lectures delivered in 2004 this newly edited text includes hundreds of footnotes allowing historians and other scholars to examine the lectures source material in a way that has not been possible before

Ralph Raico Ralph Raico 1936 2016 was professor emeritus in European history at Buffalo State College and a senior fellow of the Mises Institute He was a specialist on the history of liberty the liberal tradition in Europe and the relationship between war and the rise of the state He is the author of *The Place of Religion in the Liberal Philosophy of Constant Tocqueville and Lord Acton* **Caxton head catalogues.
