Henry,2012-12-06

This book was born of a refusal the refusal of the very philosophy from which it has sprung After the war when it had become apparent that the classical tradition and particularly neo Kantianism was breathing its last French thought looked to Germany for its inspiration and renewal Jean Hyppolite and Kojeve reintroduced Hegel and the existentialists and phenomenologists drew the attention of a curious public to the fundamental investigations of Husserl and Heidegger If only by being understood as a phenomenological ontology this book speaks eloquently enough of the debt it owes to these thinkers of genius The conceptual material which it uses particularly in chapters 1 to 44 outlines the Husserlian and

Heideggerian horizon of the investigations However it is precisely this horizon which is questioned In spite of its profundity and achievements I wanted to show that contemporary ontology pushes to the absolute the presuppositions and the limits of the philosophy of consciousness since Descartes and even of all Western philosophy since the Greeks An External critique viz the opposing of one thesis to another would have no sense whatever Rather it is interior to these presuppositions whose insufficiency had to be shown that we placed ourselves the very concepts which were rejected were also the ones which guided the problem initially

The Garden of Reality Roland Faber, 2018-06-20 The Garden of Reality contemplates the relativity of religious truth religious pluralism transreligious discourse postmodern cosmology and multireligious mysticism Its transreligious approach aims at a future multireligious peaceful society in an ecological and cosmic context It proposes that the future of humanity is bound to conviviality with itself and the Earth that the deepest religious motivations of existing together are relative to one another and that transreligious relativity is essential to the conviction of religions that their motivations experiences and conceptualities are meaningful real and true By engaging diverse voices from poststructuralism to Sufism Dzogchen and philosophical Daoism from conceptual frameworks of Christianity and Hinduism to mystical and postmodern cosmology current cosmopolitanism and interreligious and interspiritual discourses but especially understudied contributions of process thought and the Bah religion this book suggests that multireligious conviviality must listen to the universal relevance of a multiplicity of minority voices Its polyphilic pluralism affirms the mutual immanence and co creative nature of religions and spiritualities with the universal in sistance of divine or ultimate reality in the cosmos Embracing a relativistic and evolutionary paradigm in an infinite cosmos of creative becoming religions must cope with events of novelty that disturb and connect transcend and contrast the continuum of their truth claims but must avoid conflict as religious diversity is enveloped by an ever folding landscape of ultimate reality

The Dimensions of Hegel's Dialectic Nectarios G. Limnatis, 2011-10-20 The Dimensions of Hegel s Dialectic examines the epistemological import of Hegelian dialectic in the widest sense In modern philosophy German idealism Hegel in particular is said to have made significant innovative steps in redefining the meaning scope and use of dialectic Indeed it is dialectic that makes up the very core of Hegel s position yet it is an area of his thought that is widely neglected by the available literature despite the increased interest in Hegel s philosophy in recent years This book brings together an international team of expert contributors in a long overdue discussion of Hegelian dialectic Twelve specially commissioned essays address the task of making sense and use of Hegel s dialectic which is fundamental not only for historical and hermeneutic reasons but also for pragmatic ones a satisfactory response to this challenge has the power to clarify Hegel s legacy in the current debate The essays situate the dialectic in the context of German idealism with a clear sighted elucidation of the problems that Hegel s dialectic is called upon to solve
