Gridiron Gourmet Maria J. Veri,Rita Liberti,2019-09-02 On football weekends in the United States thousands of fans gather in the parking lots outside of stadiums where they park their trucks let down the gates and begin a pregame ritual of drinking and grilling Tailgating which began in the early 1900s as a quaint picnic lunch outside of the stadium has evolved into a massive public social event with complex menus extravagant creative fare and state of art grilling equipment Unlike traditional notions of the home kitchen the blacktop is a highly masculine culinary environment in which men and the food they cook are often the star attractions Gridiron Gourmet examines tailgating as shown in television film advertising and cookbooks and takes a close look at the experiences of those tailgaters who are as serious about their brisket as they are about cheering on their favorite team demonstrating how and why the gendered performances on the football field are often matched by the intensity of the masculine displays in front of grills smokers and deep fryers **Dirty Gourmet** Emily

legendary playwright director Stan Lai has written one of the unique works of our time explaining that the mysterious act of creativity is actually a traceable function of mind and there is a path to learn creativity through un learning many of our habits picked up in life His special map as well as tailor made exercises lays out an awe inspiring yet practical guide from a lifetime of creative work revered in Asia by artists and business leaders alike Through his extensive experience the greatest living Asian playwright shows us how to cultivate a creative app that works within us Matthieu Ricard says Stan Lai teaches us how to see and how to do Praised by Jack Ma Ang Lee and other luminaries this book is a rewrite by the author of his book that is the most prominent work on creativity in China having sold over 700 000 copies Robert Wilson calls the work foundational support for arts and culture Stan Lai is uniquely qualified to write on creativity because he not only has four decades of creative experience widely acclaimed as the greatest playwright in the Chinese language but is also a dedicated educator Shannon Jackson calls the work A must read from an internationally renowned artist Can creativity be taught Most of the books and training in this area deal with skills for jumpstarting alternative thinking brainstorming and other exercises

but do not deal with creativity itself They don't tackle the obvious question What is creativity and how can I get it As one of the world's leading artists Lai explains that the reason we don't think creativity can be taught is that we don't really understand what happens in the mysterious process By slowing down the moment of inspiration Lai lets us see exactly the elements involved in this complex process that lasts only an instant Then he shows you how to prepare for this moment through his unique Map of Creativity This is a whole path of training in creativity which he explains clearly and humour and compassion and tailor made exercises Travis Preston says Stan Lai guides us to the center of the creative moment and the ultimate unity of the spiritual and physical worlds Creativity is a milestone in understanding and learning the creative act Born in America raised in Taiwan with a career spanning the Chinese diaspora Lai believes that we are all born creative but the source to creativity has been blocked by life How to take down the barriers that are blocking the source from us is a task of unlearning many things that have become habits and put us into a so called non creative mode Taking his cue from his Buddhist training that wisdom and method are both needed for success in any endeavour he explains how wisdom has mysteriously vanished from education systems all over Most teaching in creativity focuses on method which one learns in one's art But we need another type of training more urgently the training for wisdom which can only happen in the domain of life To do you must first be To discover your creativity you must first discover yourself Octavio Sainz says This book is not a manual but a statement of belief an enduring message about how each of us can go beyond our limits
