**The Cambridge Companion to John Cage** David Nicholls, 2002-08 Publisher Description

[The Graph Music of Morton Feldman](#) David Cline, 2016-05-26 Morton Feldman is widely regarded as one of America's greatest composers. His music is famously idiosyncratic but in many cases the way he presented it is also unusual because in the 1950s and 1960s he often composed in non-standard musical notations including a groundbreaking variety on graph paper that facilitated deliberately imprecise specifications of pitch and at times other musical parameters. Feldman used this notation intermittently over seventeen years producing numerous graph works that invite analysis as an evolving series. Taking this approach David Cline marshals a wide range of source materials many previously unpublished in clarifying the ideology organisation and generative history of these graphs and their formative role in the chronicle of post-war music. This assists in pinpointing connections with Feldman's compositions in other formats works by other composers notably John Cage and contemporary currents in painting. Performance practice is examined through analysis of Feldman's non-notated preferences and David Tudor's celebrated interpretations

siddhis in a natural and controlled environment Without doubt the most popular class will be flying Sporadic levitations have been recorded throughout history mostly connected with an overpowering euphoric vision rapture My only complaint about this book is that there is no introduction for us to get the overall picture of what the book is about nor is there an author bio But if you want a summary of all things pointing to a major shift this is a great read Susan Schenck Amazon Top 1000 Reviewers
