The Great Powers And Global Struggle 1490 1990:

The Great Powers and Global Struggle, 1490-1990 Karen A. Rasler, 1994 Bridges and Boundaries Colin Elman, Miriam Fendius Elman, 2001-04-13 Bridges and Boundaries offers a conversation between what might loosely be described as traditionalist diplomatic and military historians and political scientists who employ qualitative case study methods to examine international relations The book opens with a series of chapters discussing differences commonalities and opportunities for cross fertilization between the two disciplines To help focus the dialogue on real events and research the volume then revisits three empirical topics that have been studied at length by members of both disciplines British hegemony in the nineteenth century diplomacy in the interwar period and the causes of World War II and the origins and course of the Cold War For each of these subjects a political scientist a historian and a commentator reflect on how disciplinary guild rules have shaped the study of international events The book closes with incisive overviews by Robert Jervis and Paul W Schroeder Bridges and Boundaries explores how historians and political scientists can learn from one another and illustrates the possibilities that arise when open minded scholars from different disciplines sit down to talk *What Causes War?* Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations **The Rise of China and International Law** Congyan Cai, 2019-09-10 The rise of China signals a new chapter in international relations How China interacts with the international legal order namely how China utilizes international law to facilitate and justify its rise and how international law is relied upon to engage a rising China has invited growing debate among academics and those in policy circles Two recent events the South China Sea Arbitration and the US China trade war have deepened tensions This book for the first time provides a systematic and critical elaboration of the interplay between a rising China and international

law Several crucial questions are broached These include How has China adjusted its international legal policies as China's state identity changes over time especially as it becomes a formidable power Which methodologies has China adopted to comply with international law and in particular to achieve its new legal strategy of norm entrepreneurship How does China organize its domestic institutions to engage international law in order to further its ascendance How does China use international law at a national level in the Chinese courts and at an international level for example lawfare in international dispute settlement And finally how should Chinese exceptionalism be understood This book contributes significantly to the burgeoning and highly relevant scholarship on China and international law *The Waning of Major War* Raimo

Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes **Geopolitics** John

Rennie Short, 2021-08-25 In this cogent introduction to the state of contemporary geopolitics Short provides an understanding of the basic themes of geopolitics and an overview of geopolitical issues around the globe His regional approach to the study of the power relations between states is framed by a discussion of critical and popular geopolitical analysis What Do We Know about War? John A. Vasquez, 2012-03-16 What Do We Know about War reviews the research

on causes of war and the conditions of peace over the past forty five years Leading scholars explore the critical roles of territorial disputes alliances arms races rivalry and nuclear weapons in bringing about war as well as the factors promoting peace including democracy norms stable borders and capitalist economies Considering what has been learned about the causes of war and the conditions of peace in the ten years since the publication of the first edition this invaluable text offers an accessible and up to date overview of current knowledge and an agenda for future research Contributions by Brett V

Thompson, 2016-05-06 The field of international relations is often stagnated in realism and liberalism Groundbreaking and guaranteed to stir debate this work will move the field of international relations beyond its current and often inadequate assumptions The contributors describe how states ideologies and other areas of analysis evolve conquer others or disappear entirely Change and the fluid nature of history though so clearly a part of historical reality are not so deeply embedded in other paradigms as they are in the variation and selection model of evolutionary international relations Some contributors lay

out the various controversies inherent to the new theory while others apply the paradigm to specific problems in IR theory. Regardless of the approach, the presentation of this entirely new perspective and method succeeds in forming a new paradigm of international relations. Contributors include William R. Thompson, George Modelski, Vincent S. E. Falger, David P. Rapkin, Jennifer Sterling, Folker Hendrik Spruyt, Stewart Patrick, Paul Hensel, Karen Rasler, Craig N. Murphy, Jeffrey A. Hart, Sangbae and Brian Pollins.

Growth, Trade, and Systemic Leadership Rafael Reuveny, William R. Thompson, 2009-12-21. Proposes an innovative argument for the existence of world governance.

Blunder Patrick Porter, 2018-11-01. Why did Britain go to war in Iraq in 2003? Existing accounts stress dodgy dossiers, intelligence failures, and the flaws of individual leaders. Deploying the large number of primary documents now available, this book puts ideas at the centre of the story. As the book argues, Britain's war in Iraq was caused by bad ideas that were dogmatically held and widely accepted. Three ideas in particular formed the war's intellectual foundations: the notion of the undeterrable fanatical rogue state, the vision that the West's path to security is to break and remake states, and the conceit that by paying the blood price, Britain could secure influence in Washington DC. These issues matter because although the Iraq War happened fifteen years ago, it is still with us. As well as its severe consequences for regional and international security, the ideas that powered the war persist in Western security debate. If all wars are fought twice, first on the battlefield and the second time in memory, this book enters the battle over what Iraq means now and what we should learn.

Tokens of Power Ann Hironaka, 2017-03-06. What motivates going to war? This book reexamines how leaders make decisions based on appearances of power over military reality.

Inequality Beyond Globalization Christian Suter, 2010. This volume debates the complex nature of the relationships between globalization, social and economic transformations, and growing inequalities. Employing a global world historical and comparative perspective, the 16 articles brought together in this volume deal with three central questions: Firstly, the question of the spatio-temporal evolution and variations of growing inequalities; secondly, the relative importance of globalization as compared to other factors explaining growing inequalities; and thirdly, institutional variations of inequality dynamics and globalization impacts. Christian Suter is Professor of Economic Sociology at the University of Neuchâtel and President of the World Society Foundation, domiciled at the University of Zurich, Switzerland.

War in a Changing World Zeev Maoz, Azar Gat, 2001. Essays tracing the changing nature of war in relation to global and regional changes.

Economic Cycles, Crises, and the Global Periphery Leonid Grinin, Andrey Korotayev, Arno Tausch, 2016-10-25. This thought-provoking monograph analyzes long, medium, and short-term global cycles of prosperity, recession, and depression, plotting them against centuries of important world events. Major research on economic and political cycles is integrated to clarify evolving relationships between the global center and its periphery, as well as current worldwide economic upheavals and potential future developments. Central to this survey are successive waves of industrial and later technological and cybernetic progress leading to the current era of globalization and the changes of the roles of both Western powers and former minor players.

however that will lead to the formation of the world order without a hegemon Additionally the authors predict what they term the Great Convergence the lessening of inequities between the global core and the rest of the world including the wealth gap between First and Third World nations Among the topics in this ambitious volume Why politics is often omitted from economic analysis Why economic cycles are crucial to understanding the modern geopolitical landscape How the aging of the developed world will affect world technological and economic future p The evolving technological forecast for Global North and South Where the U S is likely to stand on the future world stage Economic Cycles Crises and the Global Periphery will inspire discussion and debate among sociologists global economists demographers global historians and futurologists This expert knowledge is necessary for further research proactive response and preparedness for a new age of sociopolitical change

War and the World Jeremy Black,2000-01-01 An attempt to write a global history of warfare in the modern era Jeremy Black here presents a wide ranging account of the nature purpose and experience of war over the last half millennium

The Emergence of the Global Political Economy William Thompson,2002-11-01 The Emergence of the Global Political Economy challenges the assumption that the international political economy is a recent phenomenon Instead this volume asserts that the current global political economy began to take shape around 1500 and that some of today s key processes were already perceivable several hundred years ago The book explains the interdependence between long term economic growth global political leadership and global war and how this interdependence has evolved over the last 500 years and includes discussion of the ascendance of Western Europe and the significance of the 1490s the military superiority thesis sequences of leadership and of challenge to the global political economy the importance of commodities from sugar and cloth to slaves and bullion the Anglo American rivalry until the First World War

Systemic Transitions W. Thompson,2009-01-05 We are all familiar with the popular and academic analyses of the ongoing and future ascent of China Two of the associated questions are whether and when China might succeed the United States as the lead state in the world system These are interesting questions albeit ones that are not likely to be answered in the immediate future An alternative focus examines instead periods of systemic transition eras in which it is conceivable that a new leader might emerge at the expense of an older system leader Framing the question this way presumes that a future systemic transitions remain a possibility and b transitions do not occur abruptly but may require several decades to set up structural situations in which a transition might take place Neither of these assumptions are carved in stone and are open to question It may be that future systemic transitions are unlikely Or it may be that they will not occur as they have in the past All of these possibilities are assessed from a variety of different perspectives

Routledge Handbook of World-Systems Analysis Salvatore J. Babones,Christopher K. Chase-Dunn,2012 This volume reviews the state of the field of world systems analysis World systems analysts study the structure of the relationships among people organisations and states and how those relationships change over time

From Malaise to Meltdown Michael Lee,2020-11-03 For the past two centuries the great power sitting atop the

international global financial system has enjoyed outsized rewards As the saying goes however all good things come to an end Providing insights into the evolution of the global political economy From Malaise to Meltdown identifies the main instigators behind the global financial crises we've seen in the last two hundred years Michael Lee shows that in time power diffuses from the leading economy to others creating an intensely competitive push for global financial leadership Hungry for the benefits of global leadership declining leaders and aspiring challengers alike roll back long standing regulatory safeguards in an effort to spark growth Risks to global financial stability mount as a result of this rollback and waves of severe financial crises soon follow As Lee deftly shows the Long Depression of 1873 1896 the Great Depression of 1929 1939 and the financial crisis of 2008 are part of the same recurrent pattern global competition disrupts the longstanding political equilibria prompting a search for new risky ideas among the most powerful states From Malaise to Meltdown presents a sweeping but accessible historical narrative about the coevolution of power ideas and domestic politics supported by archival research into the risky decisions that ushered in the worst financial crises in history

Puzzles of the Democratic Peace
K. Rasler, W. Thompson, 2016-01-26 Ever since the revival of Kant's Perpetual Peace thesis the linkages between democracy and peace has been a central topic in international relations research with sustained debate over whether it exists and if it does why it does In this stimulating volume two leading IR scholars place the democratic peace debate within a broader context including the extent of threats in international relations degree of satisfaction with the status quo the diffusion of democracy and the rise of the trading state Step by step Thompson and Rasler examine the democratic peace through a series of puzzles concerning arguments at the dyadic systemic and individual state levels Synthesizing a broad range of knowledge and linking islands of theory Puzzles of the Democratic Peace provides a distinctive look at the state of the field and paths forward
