Allaire,Jennifer E. Killham,2023-01-01 Science is unique among the disciplines since it is inherently hands on However the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning Killham et al 2014 Wong et al 2018 PreK 12 teachers consistently report feeling underprepared or overwhelmed by online learning environments Molnar et al 2021 Seaman et al 2018 This is coupled with persistent challenges related to elementary teachers lack of confidence and low science teaching self efficacy Brigido Borrachero Bermejo Gunning Duran Duran 2004 Ideal for undergraduate teacher candidates graduate students teacher educators classroom teachers parents and administrators this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation **Teaching and Learning in Urban Agricultural Community Contexts** Isha DeCoito,Amie Patchen,Neil Knobloch,Levon Esters,2021-09-07 This book fills a void in the literature around how urban agricultural education can be used to create opportunities to educate youth and citizens who live in urban areas about growing food To date very little has been written about program design and the impact of such experiences on learning outcomes In fact most of the journal articles and research to date has focused on access contextual factors sustainability relevance of urban agricultural education and the intersection of science of agriculture This book will cover such topics as

how urban youth learn science while engaged in urban agriculture programs how such programs support youth in becoming interested about healthy eating and science more generally and how to design urban agriculture programs in support of STEM education The chapters in this book are written by educational researchers and each chapter has been reviewed by researchers and practitioners
