The Green Capitalists Industrys Search For Environmental Excellence:

The Green Capitalist John Elkington,1986 **The Green Capitalists** John Elkington,Tom Burke,1987 **Green Tyranny** Rupert Darwall,2017-10-03 Climate change was political long before Al Gore first started talking about it In the 1970s the Swedish Social Democrats used global warming to get political support for building a string of nuclear power stations It was the second phase of their war on coal which began with the acid rain scare and the first big UN environment conference in Stockholm in 1969 Acid rain swept all before it America held out for as long as Ronald Reagan was in the White House but capitulated under his successor Like global warming acid rain had the vocal support of the scientific establishment but the consensus science collapsed just as Congress was passing acid rain cap and trade legislation Rather than tell legislators and the nation the truth the EPA attacked a lead scientist and suppressed the federal report showing that the scientific case for action on curbing power station emissions was baseless Ostensibly neutral in the Cold War Sweden had a secret military alliance with Washington A hero of the international Left Sweden s Olof Palme used environmentalism to maintain a precarious balance between East and West Thus Stockholm was the conduit for the KGB inspired nuclear winter scare The bait was taken by Carl Sagan and leading scientists who tried to undermine Ronald Reagan s nuclear strategy and acted as propaganda tools to end the Cold War on Moscow s terms Nuclear energy was to have been the solution to global warming It didn t turn out that way most of all thanks to Germany Instead America and the world are following Germany s lead in embracing wind and solar German obsession with renewable energy originates deep within its culture Few know today that the Nazis were the first political party to champion wind power Hitler calling wind the energy of the future Post 1945 West Germany appeared normal but anti nuclear protests in the 1970s led to the fusion of extreme Left and Right and the birth of the Greens in 1980 Their rise changed Germany then Europe and now the world Radical environmentalism became mainstream It demands more than the rejection of the abundant hydrocarbon energy that fuels American greatness It requires the suppression of dissent *Greener Marketing* Martin Charter,2017-09-20 An examination of the progress of environmental marketing on a global scale It considers how sustainability issues are increasingly becoming critical factors in how corporations meet the ever growing demands and expectations of customers The purpose of the book is to provide practitioners with best practice examples and actionable recommendations on how to implement green marketing activities It provides information and ideas for those involved in marketing on how to incorporate green considerations into the marketing mix as well as providing perspectives on marketing for environmental managers To achieve a comprehensive viewpoint the book is split into three sections The first sets out the strategic issues and rationale for green marketing the second addresses tactical issues in more detail and the third provides detailed international case studies Topics addressed by the contributors include the growing debate around products versus services environmental product development and eco innovation green marketing alliances environmental communications green consumers eco tourism and the problems

associated with green marketing in developing countries **Tourism Enterprise** David Leslie,2014-11-26 The environmental quality and popularity of any tourist destination is the outcome of sustained development shaped by the socio economic and physical dimensions of the local environment Protecting the living landscape requires recognizing promoting and developing the links between economic social and environmental objectives This book therefore examines the tourism business in terms of greening the local economy people and environment establishing the green agenda and investigating its application to the tourism sector *European Climate Diplomacy in the USA and China* Katrin Buchmann,2022-08-22 Buchmann analyses the work of UK German Danish and Swedish embassies in the USA and China on climate change in the late 2000s and early 2010s She relates which coalitions and narratives embassies sought to develop to convince China and the United States that a more progressive climate policy was possible to achieve gains supporting an agreement under the UNFCCC This book shows that a key interpretation of climate diplomacy was selling trade Europe selling technology solutions to solve climate change In this narrative Europe has already done what needs to be done and outsourcing of production to China e g is ignored In the USA embassies entered coalitions with states faith groups and the military arguing that a more progressive climate policy was mandated by either God or security concerns State politicians including Democrats often actually didn't implement any climate policies Any gains were reversed through climate denial lobbying funded by corporations Embassies did not address this *Green Pages* John Elkington,Tom Burke,Julia Hailes,2017-10-19 Originally published in 1988 Europeans want a better environment Increasingly too they are demanding the products services legislation and policies that will provide it Green Pages reveals what Europe's environmentalists plan to do next and how environmental pressures will threaten major markets and at the same time opens up new opportunities for business investment and employment Green Pages is a fantastic reference source for green enterprise and will be of interest to students of environmental economics *Accounting for the Environment* Rob Gray,Jan Bebbington,2001-07-25 This book is a good comprehensive text and comes highly recommended to anyone currently involved in looking to get involved in or just interested in environmental management environmental accounting and reporting Pacific Accounting Review This is the long awaited 2nd edition of the benchmark publication that helped shape the developing agenda of environmental accounting This excellent new edition provides an overview of the subject ranging from environmental management to sustainability and integrates the major advancements that have occurred since the first edition in both research and practice It introduces and explains environmental issues as they relate to accountants today This new work also places an increased emphasis on the emerging research literature in the field and reveals a consciousness of the difficulties of developing an environmental agenda in business It makes an excellent stand alone text for lower level students a firm base from which the advanced student or researcher can explore research and more complex issues and a useful guide for practitioners seeking to understand and implement environmental practice **Family Values and Value Creation** J. Tàpies,J. Ward,2008-05-29 In

celebration of IESE's 50 years of bridging the gap between theory and practice this essential compilation brings together today's top researchers to tackle the real life issues that family business owners face on a daily basis shedding new light on the values that shape these special types of companies *The Global Environment of Business* David W. Conklin, 2010-05-06

The *Global Environment of Business* provides students with a truly international perspective that integrates both market industry structure and nonmarket i.e. political forces analysis concisely in a way not found in other texts The following key issues are emphasized Industry Structure Management must strategize to deal with the bargaining strength of customers suppliers and competitors on a country by country basis Low cost labour and outsourcing are changing the nature of the firm dramatically Macroeconomic Forces Management must formulate country strategies in light of each country's income levels and growth rates foreign exchange rates inflation rates interest rates and unemployment rates Political Forces Regulations financial incentives tax regimes investment restrictions and trade agreements differ widely from country to country Societal Forces Ethics labour and environmental practices differ from country to country In addition specific consumer preferences and demographic trends must play a role in national strategies Technological Forces Strategies must correspond to each country's technological infrastructure and the pace and direction of technological change

Ethics & Organizations Martin Parker, 1998-09-14 *Ethics and Organization* provides a rich and valuable overview of an increasingly important issue for management and organizations in contemporary society Debates about equal opportunities environmental responsibility consumer redress and corporate governance have given ethics a prominent place in the study of organizations in their social and natural environments Within the organization new management styles that seek to energize employees by manipulating their beliefs have highlighted the moral ethical principles at issue in contemporary management At the same time debates around postmodernism and relativism have moved ethics to a new centrality in contemporary social theory *Ethics and Organization* addresses the questions that these and other developments raise for the study of management and organizations from a multidisciplinary perspective The book will be of value to advanced level students and academics engaged in analyzing the moral political and ethical dimensions of organization theory and organizational practice

Town & Country Planning, 1988 **EcoManagement** Ernest Callenbach, 1993 A guide for ecologically responsible businesses from one of the world's leading ecology think tanks the Elmwood Institute This book tells how to do a thorough review of a company's operations from the perspective of deep ecology as opposed to superficial environmentalism *ECOMANAGEMENT* provides a clear action plan for making a company more ecologically sound

Environmental Regulation Through Financial Organisations: Comparative Perspectives on the Industrialised Nations Benjamin Richardson, 2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions

that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance Town and Country Planning ,1988 **The Unmanageable Consumer** Yiannis Gabriel,Tim Lang,2015-09-21

The Unmanageable Consumer has long been one of my favorite books in the sociology of consumption This long overdue third edition has updated and revised the basic argument in many ways Most importantly it now offers a new chapter on the consumer as worker or more generally the prosumer Assign it to your classes I have and will again and read it for your edification George Ritzer Distinguished University Professor University of Maryland USA Western style consumerism is often presented as unstoppable yet its costs mount and its grip on consumer reality weakens In this 20th Anniversary edition Gabriel and Lang restate their thesis that consumerism is more fragile and unmanageable than is assumed by its proponents Consumerism has been both stretched and undermined by globalization the internet social media and other cultural changes Major environmental threats debt squeezed incomes and social inequalities now temper Western consumers appetite for spending The 20th century Deal first championed by Henry Ford of more consumption from higher waged work looks tattered This edition of The Unmanageable Consumer continues to explore 10 different consumer models and encourages analysis of contemporary consumerism It looks at the spread of consumerism to developing countries like India and China and considers the effects of demographic changes and migration and points to new features such as consumers taking on unwaged work New to this edition Coverage of new phenomenon such as social media and emerging markets Explores contemporary topics including the occupy movement and horsemeat scandal A new chapter on the consumer as worker This is a remarkable and important book The new edition updates consumer cultural studies to take into account austerity politics and the economic crisis and the impact these have had on how we think about and experience everyday practices of shopping and consuming The authors also build on and maintain the lively and challenging argument from the previous volumes which sees the consumer as an unstable space for a multiplicity of often contradictory responses which can unsettle the various strategies on the part of contemporary capitalism to have us buy more Angela McRobbie Goldsmiths University of London The book exemplifies how social science should be engaged insightful imaginative scholarly and highly socially and politically relevant Strongly recommended to students academics as well as all people interested in understanding our time and themselves in an age of consumerism and false promises Mats Alvesson Professor of Business Administration Lund University

Sweden Environment and Society Erika Cudworth, 2005-08-04 At the start of the twenty first century it can be argued that human societies have a greater impact on the environment than ever before We have always been dependent upon and interacted with the natural environment However the dramatic social changes of the past three centuries have altered the form of our relationship with non human nature to the extent that some would see people planet relations as in a situation of crisis *Environment and Society* provides a comprehensive and critical account of the ways in which we can think about the relationship between human societies and the environments with which they interact It argues that human societies are ecologically embedded and that environments are often socially embedded and constituted It makes the different theoretical positions and empirical studies accessible to students and includes chapter outlines and summaries annotated further reading boxed case studies and discussion points *Mining and the Freshwater Environment* M. Kelly, W.J. Allison, A.R. Garman, C.J. Symon, 2012-12-06 Over the last century the discharge of crude or partially treated sewage has probably been the most widespread most documented and certainly the best understood form of pollution entering the aquatic environment In the past two decades however there has been an increasing public awareness of the potential hazards that exist from the contamination of the freshwater environment by toxic substances associated with the mining industry World demand for minerals has intensified the exploitation of natural resources In most western and newly developed countries significant mining proposals are now strenuously regulated to protect the environment These involve economic and legislative measures and the use of appropriate control technologies This concern will undoubtedly continue to spread worldwide requiring a programme of enlightened environmental protection management policies and practices for the future This book has been prepared as a synthesis of our current understanding of the effects of various heavy metals and acidic discharges likely to contaminate the freshwater environment as a direct result of mining activities The review is based upon the dissertations of former BP sponsored students who were engaged to provide a better scientific understanding of the causes of environmental problems associated with this industry It gives us great pleasure to publish this information for use and application by a wider audience as part of the contribution of The British Petroleum Company plc to European Year of the Environment *Globalization and Security* G. Honor Fagan, Ronaldo Munck, 2009-10-27 A unique set provides an up to date overview of the impact of globalization on international security by examining how the interrelationships of economics politics and culture determine levels of stability within regions around the world *Globalization and Security An Encyclopedia* addresses the need for an authoritative but accessible analysis of the impact of globalization on security and its multifaceted aspects Broad in scope this two volume set covers the economic and political aspects of globalization as well as its social and cultural impacts More importantly it is the first work to focus explicitly on security including human security broadly conceived and the role that globalization plays in the world's new and ever evolving security environment While more books on globalization are becoming available none focus on the impact of globalism on security related issues as this set does

Drawing on the expertise of specialists from many disciplines and nations *Globalization and Security* directly addresses the needs of one of the fastest growing areas of study the intersection of globalization and security worldwide Environmental Management in ASEAN Maria Seda,1993 The problem of environmental degradation in the ASEAN region cannot be underestimated The articles in this book examine some of the common environmental issues faced by countries in the region They provide a brief overview of some major environmental problems such as fisheries management tropical deforestation and pollution in urban areas and highlight some of the research policy and institutional constraints in the region
