The Land Of Two Moons:

What If the Earth Had Two Moons? Neil F. Comins, 2010-03-30 What if questions stimulate people to think in new ways to refresh old ideas and to make new discoveries In What If the Earth Had Two Moons Neil Comins leads us on a fascinating ten world journey as we explore what our planet would be like under alternative astronomical conditions In each case the Earth would be different often in surprising ways The title chapter for example gives us a second moon orbiting closer to Earth than the one we have now The night sky is a lot brighter but that won't last forever Eventually the moons collide with one extra massive moon emerging after a period during which Earth sports a Saturn like ring This and nine and other speculative essays provide us with insights into the Earth as it exists today while shedding new light on the burgeoning search for life on planets orbiting other stars Appealing to adult and young adult alike this book is a fascinating journey through physics and astronomy and follows on the author's previous bestseller What if the Moon Didn't Exist with completely new scenarios backed by the latest astronomical research

Space Flight, 1991 **The Beothuk Saga** Bernard Assiniwi, 2002-01-16 This astounding novel fully deserves to be called a saga It begins a thousand years ago in the time of the Vikings in Newfoundland It is crammed with incidents of war and peace with fights to the death and long nights of lovemaking and with accounts of the rise of local clan chiefs and the silent fall of great distant empires Out of the mists of the past it sweeps forward eight hundred years to the lonely death of the last of the Beothuk The Beothuk of course were the original native people of Newfoundland and thus the first North American natives encountered by European sailors Noticing the red ochre they used as protection against mosquitoes the sailors called them Red skins a name that was to affect an entire continent As a people they were never understood Until now By adding his novelist's imagination to his knowledge as an anthropologist and a historian Bernard Assiniwi has written a convincing account of the Beothuk people through the ages To do so he has given us a mirror image of the history rendered by Europeans For example we know from the Norse Sagas that four slaves escaped from the Viking settlement at L Anse aux Meadows What happened to them Bernard Assiniwi supplies a plausible answer just as he perhaps solves the mystery of the Portuguese ships that sailed west in 1501 to catch more Beothuk and disappeared from the paper records forever The story of the Beothuk people is told in three parts The

Initiate tells of Anin who made a voyage by canoe around the entire island a thousand years ago encountering the strange Vikings with their cutting sticks and their hair the colour of dried grass His encounters with whales bears raiding Inuit and other dangers and his survival skills on this epic journey make for fascinating reading as does his eventual return to his home where with the help of his strong and active wives he becomes a legendary chief the father of his people **Ashes of Heaven** Terry C. Shayler,2007-07-05 MARSWALK ONE First Steps on a New Planet addresses the question of why we should embark on a journey to Mars documenting what the first human crew will do when they place their feet in the red dust of the planet The book also addresses why we need to carry out these tasks and more importantly what a human crew could achieve that an automated mission could not Understanding the clear benefits of sending a human crew to the surface of Mars and how these benefits can be seen back on Earth is the key to sustained long term public and political support for the programme in terms of cash and commitment The book accepts that the journey will be made but does not specify precisely when Flight time and how to get to and from the planet are discussed briefly to understand why the suggested duration spent at Mars is reasonable The main objective of the work is to look at what science will be done on the surface supported by orbital operations and what hardware and technology will be employed to achieve the mission objectives This analysis is drawn from previous experiences in manned and unmanned space programmes including Apollo Skylab Salyut Mir Shuttle and ISS Viking Luna Lunokhod and recent Mars missions such as Pathfinder and Global Surveyor In addition new interviews with key personalities involved in planning Martian exploration and discussions about current thoughts on what we need to accomplish on Mars when we get there will provide a lively and thought provoking account that could generate fresh debate When the decision is finally made to go to Mars it will be made in the knowledge that most of the

world knows why we are going and what benefits mankind will see for the effort The authors primary objective is to begin this understanding **Hidden Kingdom: The Elven Citadel, Book 2** M.L. Chrisman,2016-01-02 The mission to destroy the Elven Citadel is underway but Queen Sara Bellfourth is finding the mission more complex than she planned Because of the impassable mountains she had been forced to hire a mysterious Woodsman that is said to know the way Things go well until an Emos patrol is found on the way to the pass Even though her squad was able to defeat the patrol she finds out that the enemy is waiting for them at the pass She also finds out that the guide she hired was once the first general of Emos during the first Great war He claims to know another way into the Kingdom of Emos and has promised to help her destroy the Citadel but can she trust the man Does she have a choice The fate of the world and her dear husband who was captured by Emos depend on it **The Encyclopedia of Moon Mysteries** Constance Victoria Briggs,2019-03-19 Our moon is an enigma The ancients viewed it as a light to guide them in the darkness and a god to be worshipped In modern times it has been taught that the Moon is simply a dead rock that is caught in Earth's gravity with no activity As a researcher of metaphysical paranormal and cosmic subjects I have come across stories and information about the Moon that tell us that indeed there is activity there and there has been for generations Just who or what is causing the commotion is a mystery There are stories that suggest that the Moon is home to extraterrestrials theories that it is not a natural satellite tales of anomalous lights and tales that NASA astronauts saw extraterrestrial ships and ruins of an ancient civilization there There is a rumor that Apollo13 was saved by extraterrestrials Another story states that there are extraterrestrial bases on the Moon There is even a tale that states that a part of the kingdom of Atlantis was once located there Some even believe that there are cities beneath the surface of the Moon There is an interesting account of a government employee using remote viewing as a means of seeing what is on the Moon His experience is eye opening This is just a sample of the information that will be in The Encyclopedia of Moon Mysteries Secrets Conspiracy Theories Anomalies Extraterrestrials and More For example did you know that Aristotle and Plato wrote about a time when there was no Moon They even gave a name of an ancient tribe of people that lived during that moonless period several of the NASA astronauts reported seeing UFOs while traveling to the Moon the Moon might be hollow Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon strange and unexplained lights have been seen on the Moon for centuries there are said to be ruins of structures on the Moon there is an ancient tale that suggests that the first human was created on the Moon that radio signals have been detected coming from the Moon that famed astronomer Sir John Herschel saw unidentified lights above the Moon during an eclipse that ancient Bolivian symbols tell us that the Moon came into Earth's orbit around 12 000 years ago a psychic was used by the government to relay information about the Moon The book is separated into A to Z sections for easy reference and reading **A Day of Life** Jerry Welch,2012-12 A Day of Life Moments in Time takes mankind as a protagonist on a daily journey through time where one human seven billion days ago counts down to day one and an environment coping with seven

billion humans The author tries to create a conscious awareness within the reader of the five life forms and the six constants the imbalance of which has plagued mankind to this day A Day of Life is meant to encourage the reader to draw his or her own conclusions regarding the life forms and constants and to make choices as to the immanency of a possible systemic collapse from exponential expansion
