the prospects for greater military small arms disarmament may be declining as war in Afghanistan and Iraq create unprecedented demand for second hand weaponry Inconspicuous disarmament of small arms and ammunition is reshaping the global picture of firearms light weapons and ammunition The process is far from comprehensive but much more than cosmetic Small arms destruction is here to stay but its contributions may be fleeting This book is the first full length examination of the issue The case studies in this volume examine the politics of military small arms disarmament When they ask is surplus destruction most likely And what can be done to make destruction more likely and more effective Case studies examine small arms destruction by NATO and the OSCE and in Bulgaria Cambodia Germany Kazakhstan Papua New Guinea Romania Serbia Ukraine and others This book was published as a special issue of Contemporary Security Policy
