Evenett, Shahid Yusuf, 2002-09-27 East Asian economies of the 1980s and much of the 1990s were among the most competitive exporters of manufactured products and were also able to sustain growth

rates far higher than those of other countries developing or industrial. However, the economic crisis of 1997-98 impacted the economies of these countries. Although recovery began fairly quickly in some countries, others have yet to regain their growth momentum. Can East Asia Compete looks at whether or not East Asia can restore its near magical performance or if its competitive strength is beginning to wane. This volume argues that East Asian countries have far from exhausted their growth potential. However, future competitiveness will depend on much greater innovative capability in manufacturing and services, innovativeness that is grounded in stronger institutions, improved macroeconomic policies, and closer regional coordination. Can East Asia Compete clearly summarizes the issues currently being debated and provides guidance to East Asian economies on how to deal with the policy concerns that lie ahead.

Entrepreneurship, Small Business and Public Policy  
Robert J. Bennett, 2014-06-20  
Public policy interventions aimed at encouraging, supporting, and developing small businesses are important for understanding entrepreneurship and small business management. This textbook is the first to provide teachers and students with a resource that gives an overview of how institutional and policy structures interact with small firm start-ups, continuation, and succession failures. Beginning with a brief introduction to policy processes, the text covers the main policy instruments for entrepreneurial market entry and start-up support, for on-going small business advice and financial support, and succession planning. It particularly focuses on policies that improve the Business Enabling Environment through macroeconomic policy, institutional reform, and deregulation of bureaucratic burdens. Theoretical rigour is complemented by detailed assessments of current policies around the world, including USA, advanced and emerging economies, and policy support from global institutions such as the World Bank and the ILO are included. Written by a pre-eminent scholar of public policy and entrepreneurship, this textbook provides a concise but thorough introduction to the subject for Master's students internationally. Policy recommendations in the author's conclusion also highlight the book's value to policy makers as they adapt to the globalized digital world.

Atkinson,Michael Lind,2018-03-30 Why small business is not the basis of American prosperity not the foundation of American democracy and not the champion of job creation In this provocative book Robert Atkinson and Michael Lind argue that small business is not as is widely claimed the basis of American prosperity Small business is not responsible for most of the country's job creation and innovation American democracy does not depend on the existence of brave bands of self-employed citizens Small businesses are not systematically discriminated against by government policy makers Rather Atkinson and Lind argue small businesses are not the font of jobs because most small businesses fail The only kind of small firm that contributes to technological innovation is the technological start up and its success depends on scaling up The idea that self-employed citizens are the foundation of democracy is a relic of Jeffersonian dreams of an agrarian society And governments motivated by a confused mix of populist and free market ideology in fact go out of their way to promote small business Every modern president has sung the praises of small business and every modern president according to Atkinson and Lind has been wrong Pointing to the advantages of scale for job creation productivity innovation and virtually all other economic benefits Atkinson and Lind argue for a size neutral policy approach both in the United States and around the world that would encourage growth rather than enshrine an anachronism If we overthrow the small is beautiful ideology we will be able to recognize large firms as the engines of progress and prosperity that they are *Learning to Compete in African Industry* Banji Oyelaran-Oyeyinka,2017-11-28 This book examines the institutional roots of the persistent differences in economic performance of firms industries and countries in Africa It draws attention to the role of institutions in supporting technical

**The Contest for Japan's Economic Future** Richard Katz, 2024 Among the many books on why some nations prosper better than others this is the first such focusing this theme on Japan in many years And it is the first in English to show how a revival of Japan's past entrepreneurship will promote broader economic recovery and written in a lively style this book will appeal to laypersons scholars businesspeople and policymakers alike Adding to the appeal is that the book demonstrates how current trends give Japan its best opportunity for recovery in a generation At the same time its discussion of the forces opposing an entrepreneurial revival adds both realism and drama There truly is a contest of forces for control of Japan's economic future On top of that the book will attract those interested in broader themes ranging from generational attitudes and gender relations to culture and technology
