Plant Evolution in the Mediterranean John D. Thompson,2020 Plant evolution in the

Mediterranean is an account of plant evolutionary ecology The central theme is differentiation both among and within species in the flora of the Mediterranean basin Provided by publisher **Limnoecology** Winfried Lampert, Ulrich Sommer, 2007-07-26 This concise readable introduction to limnology the science of investigating the structure and function of inland waters places the subject in the context of modern ecology Unlike most ecological textbooks which use examples taken almost exclusively from terrestrial systems this book integrates the fields of limnology and ecology by presenting empirical data drawn entirely from freshwater ecosystems in order to advance ecological theories limnoecology This second edition builds upon the strengths of the first with the structure of the book following the same hierarchical concept of ecology from habitat properties individuals populations coupled populations and communities to ecosystems However it has been thoroughly revised throughout to incorporate findings from new technologies and methods notably the rapid development of molecular genetic methods and stable isotope techniques that have allowed a rapid and ongoing development of the field There is a new emphasis on food webs species diversity and ecosystem functioning climate change and conservation management Key ecological questions are examined in the light of the latest experimental evidence Throughout the text evolutionary theory is applied to an understanding of freshwater ecosystems thereby filling a niche between traditional limnology and evolutionary ecology This accessible text is suitable for both undergraduate and graduate students taking courses in limnology freshwater ecology and aquatic biology as well as the many professional limnologists ecologists and conservation biologists requiring a concise but authoritative overview of the topic Khirbet Qumran and Ain-Feshkha III A (in English translation) Jean-Baptiste Humbert, 2023-11-13 For 60 years Qumran research has been focused on epigraphy exegesis and the historical sources of the Dead Sea Scrolls The manuscripts are now published and accessible and research is turning in a positive way to the archaeology of the site and its context The time has come to provide researchers with a complete documentation The excavator Roland de Vaux had given preliminary reports and a valuable interpretation made in the immediate aftermath of the excavations Since considerable progress has been made in the archeology of Hellenistic and Roman Palestine however Qumran has to be reassessed and the interpretation objectively verified Volume IIIA presents an up to date archaeological reconsideration a shorter and more precise chronology in which the earthquake of 31 BC is deleted the concept of an Essene community is challenged owing to the lack of a suitable infrastructure the cemetery itself is connected with a Jewish diaspora scattered around the Dead Sea Other facilities strengthen the Jewish character of the site however The function of Qumran fits better with the rites of a pilgrimage on the occasion of the festivals of Passover and Pentecost In the second part the peripheral Essene facilities expanded around an earlier Hellenistic center are analyzed and described The essay seeks to outline their internal consistency and to determine their function The restoration of a stratigraphy by cross checking the excavation archives leads to a redistribution of pottery in four levels in a more precise chronology The reconsideration makes use of anthropology which opens up the archaeological field and throws

additional light on the manuscripts
