**Smart Portfolios** Robert Carver, 2017-09-18      **Emerging Geosustainability Transformations in India** Subhash Anand, Virendra Nagarale, Rajesh Kumar Abhay, 2024-12-27 This book presents the emerging sustainability concerns for India to achieve holistic development India is densely populated with scattered natural resources and is engaged in developing technology and its infrastructure However India's sustainability is questioned from the viewpoints of environment society economy and politics As the Sustainable Development Goals (SDGs) aims to achieve a sustainable world by 2030 India has to relook at its current development approaches and make effective policy measures Geography is an interdisciplinary branch of social science that focuses on the interrelationships among population natural resources social linkages governments and public policy Within this interdisciplinary concept the book presents a collection of studies from scholars in India We ask questions such as 1 what major geographical approaches and perspectives exist related to sustainability 2 how socioeconomic and political factors affect sustainability and SDGs 3 what approach is the most effective from the sustainability perspective and 4 how we address sustainability issues The book serves as a valuable reference for those who are concerned with the progress of sustainability in India      **Smart Economy in Smart Cities** T. M. Vinod

Kumar, 2016-08-25 The present book highlights studies that show how smart cities promote urban economic development The book surveys the state of the art of Smart City Economic Development through a literature survey The book uses 13 in depth city research case studies in 10 countries such as the North America Europe Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa This book focuses on exploratory city studies in different countries which investigate how urban spatial systems adapt to the specific needs of smart urban economy The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans Smart urban economies are largely the result of the influence of ICT applications on all aspects of urban economy which in turn changes the land use system It points out that the dynamics of smart city GDP creation takes different paths which need further empirical study hypothesis testing and mathematical modelling Although there are hypotheses on how smart cities generate wealth and social benefits for nations there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation This book with 13 cities research studies is one attempt to fill in the gap in knowledge base
