**Constructing Science** Deena Skolnick Weisberg, David M. Sobel, 2022-09-20 An examination of children s causal reasoning capacities and how those capacities serve as the foundation of their scientific thinking Young children have remarkable capacities for causal reasoning which are part of the foundation of their scientific thinking abilities In *Constructing Science* Deena Weisberg and David Sobel trace the ways that young children s sophisticated causal reasoning abilities combine with other cognitive metacognitive and social factors to develop into a more mature set of scientific thinking abilities Conceptualizing scientific thinking as the suite of skills that allows people to generate hypotheses solve problems and explain aspects of the world Weisberg and Sobel argue that understanding how this capacity develops can offer insights into how we can become a more scientifically literate society Investigating the development of causal reasoning and how it sets the stage for scientific thinking in the elementary school years and beyond Weisberg and Sobel outline a framework for understanding how children represent and learn causal knowledge and identify key variables that differ between causal reasoning and scientific thinking They present empirical studies suggesting ways to bridge the gap between causal reasoning and scientific thinking focusing on two factors contextualization and metacognitive thinking abilities Finally they examine children s explicit understanding of such concepts as science learning play and teaching

*Domestic Violence* Michael Freeman, 2017-03-02 Domestic violence domestic hooliganism it has been called is one of the cancers of our age This volume offers a challenging selection of materials as a picture of a multi faceted problem The issues embraced range from criminal and civil law responses and the value of mediation to the impact on children and to the cultural context The materials are derived from a variety of sources and from different disciplines to offer the reader an understanding of the problem not easily culled from standard library resources

*Transforming Urban Education* Kenneth

Tobin, Ashraf Shady, 2014-04-03 Transformations in Urban Education Urban Teachers and Students Working Collaboratively addresses pressing problems in urban education contextualized in research in New York City and nearby school districts on the Northeast Coast of the United States The schools and institutions involved in empirical studies range from elementary through college and include public and private schools alternative schools for dropouts and museums Difference is regarded as a resource for learning and equity issues are examined in terms of race ethnicity language proficiency designation as special education and gender The contexts for research on teaching and learning involve science mathematics uses of technology literacy and writing comic books A dual focus addresses research on teaching and learning and learning to teach in urban schools Collaborative activities addressed explicitly are teachers and students enacting roles of researchers in their own classrooms cogenerative dialogues as activities to allow teachers and students to learn about one another's cultures and express their perspectives on their experienced realities and negotiate shared recommendations for changes to enacted curricula Coteaching is also examined as a means of learning to teach teaching and learning and undertaking research The scholarship presented in the constituent chapters is diverse reflecting multi logicity within sociocultural frameworks that include cultural sociology cultural historical activity theory prosody sense of place and hermeneutic phenomenology Methodologies employed in the research include narratology interpretive reflexive and authentic inquiry and multi level inquiries of video resources combined with interpretive analyses of social artifacts selected from learning environments This edited volume provides insights into research of places in which social life is enacted as if there were no research being undertaken The research was intended to improve practice Teachers and learners as research participants were primarily concerned with teaching and learning and as a consequence as we learned from research participants were made aware of what we learned the purpose being to improve learning environments Accordingly research designs are contingent on what happens and emergent in that what we learned changed what happened and expanded possibilities to research and learn about transformation through heightening participants awareness about possibilities for change and developing interventions to improve learning

**Religious Cognition in China** Ryan G. Hornbeck, Justin L. Barrett, Madeleine Kang, 2017-09-27 Are

human tendencies toward religious and spiritual thoughts feelings and actions outcomes of natural cognition This volume revisits the naturalness theory of religious cognition through discussion of new qualitative and quantitative studies examining the psychological foundations of religious and spiritual expression in historical and contemporary China Naturalness theory has been challenged on the grounds that little of its supporting developmental and experimental research has drawn on participants from predominantly secular cultural environments Given China's official secularity its large proportion of atheists and its alleged long history of dominant nonreligious philosophies can any broad claim for religion's psychological naturalness be plausible Addressing this empirical gap the studies discussed in this volume support core naturalness theory predictions for human reasoning about supernatural agency intelligent design the efficacy of rituals and vitalistic causality

And yet each study elucidates expands upon or even challenges outright the logical assumptions of the naturalness theory

Written for a non specialist audience this volume introduces the naturalness theory and frames the significance of these new findings for students and scholars of cultural psychology the psychology of religion the anthropology of religion and Chinese Studies

**Schizophrenia Bulletin** , 1994

**Classroom Dynamics** Ellen B. Mandinach, Hugh F. Cline, 2013-12-16

This book reports an attempt to introduce change in schools using a computer based curriculum innovation for teaching higher order thinking skills to middle and high school students One of the volume s themes is the extraordinary complexity and difficulty of facilitating such change in schools A corollary of that theme is the fact that patience must be an integral part of the strategy when promoting or studying change in schools In reporting the activities during the early years of a technological innovation and research project in which the emphasis thus far has been primarily on establishing the change this book focuses on describing the move to a technology

based learning environment As such it details an ongoing process a fascinating process and one that is likely to be repeated in the near future in countless schools throughout the nation

**Psychiatry and Law** Amichay Levy,David Nachshon,Amnon Carmi,2002

**Sentence First, Arguments Afterward** Lila Gleitman,2020-07-16 Sentence First Arguments Afterward collects the important papers of Lila Gleitman a pioneer of the field of cognitive science The book explores language from the perspective of language acquisition linguistic relativity and the very nature of syntax and semantics Gleitman reveals insights that are important both for their perspective on the history of the field and for current practice in the study of language and thought

The Farnley Hall Service: A Unique Survivor in Nantgarw Porcelain Howell G. M. Edwards,2023-02-22 This book covers the discovery and the results of the analytical study of the composition of the Farnley Hall service involving both the embossed moulding and the decorative compositions The discovery of this missing porcelain service which was manufactured 200 years ago is a modern detective story in the preservation of cultural heritage whilst its physical analysis has identified some new data that need to be incorporated into correcting and expanding the literature that is used for the differentiation of porcelains by ceramic historians and museum conservators The importance of the Farnley Hall service discovery is that it provides the only example of such a Nantgarw Porcelain service that still resides in its original place of usage from 200 years ago it is therefore a unique example and is a very important part of our national cultural heritage It provides an illustration of the data that can be accessed from the application of inductive reasoning to elicit novel information about a manufactory whose work books no longer exist and its comparison with contemporary manufactories in the late eighteenth and early nineteenth centuries The concepts can be appreciated by experts and also by non technical readers This is the first time that such a detailed research approach has been adopted for any comparative ceramic project The book is therefore relevant for a specialist and non specialist readership including museum ceramics curators and collectors of the genre

**Active Learning in College Science** Joel J. Mintzes,Emily M. Walter,2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman s 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves

and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book s final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of na ve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for

*Raising Young Children in an Alaskan Inupiaq Village* Julie E. Sprott, 2002-12-30 A comprehensive case study portrait of the childrearing context of a predominantly Eskimo village in the remote Northwest Arctic designed to look for evidence of reinvention transformation or conscious choice as process features of change in the mix of traditional childrearing beliefs and practices with infusions from the dominant culture The rearing environment and child well being were studied during 18 months of anthropological fieldwork in an Alaskan Inupiaq village in the Northwest Arctic Volunteers for the sample consisted of 44 adults from 16 extended families who were raising a child between the ages of three and six years Results from guided interviews card sorts standardized family and home assessments and review of the children s medical records revealed a complex portrait of culture continuity and change and included the following trends many traditions had been retained even though villagers perceived few differences in their rearing style compared to that of mainstream culture despite the presence of other households with extended family members in the village and touting of the value of kinship 25% of core families reared their children in relative isolation growth measurements immunization status and general health of the children were good but

children evidenced diets high in sugar and many suffered severe dental problems present day caregivers were engaged in dialogue about problem parenting behaviors that had developed a generation earlier during a time of massive acculturation stress and population growth namely the overuse of scolding of children without attached explanations and overt favoring of specific children over others in the family The study presents present day rearing strategies and ideas as summarized from interviews and data from more formal instruments and frames changes in the system within the broader historical social context
