This expanded revised and updated fourth edition of Nuclear Energy maintains the tradition of providing clear and comprehensive coverage of all aspects of the subject with emphasis on the explanation of trends and developments. As in earlier editions the book is divided into three parts that achieve a natural flow of ideas: Basic Concepts including the fundamentals of energy particle interactions fission and fusion; Nuclear Systems including accelerators isotope separators detectors and nuclear reactors; and Nuclear Energy and Man covering the many applications of radionuclides radiation and reactors along with a discussion of wastes and weapons. A minimum of mathematical background is required but there is ample opportunity to learn characteristic numbers through the illustrative calculations and the exercises. An updated Solution Manual is available to the instructor. A new feature to aid the student is a set of some 50 Computer Exercises using a diskette of personal computer programs in BASIC and spreadsheet supplied by the author at a nominal cost. The book is of principal value as an introduction to nuclear science and technology for early college students but can be of benefit to science teachers and lecturers, nuclear utility trainees and engineers in other fields.

Safety Culture in Nuclear Power Operations

Bernhard Wilpert, Naosuke Itoigawa, 2001-09-13. Technical psychological and social aspects of industrial safety come under the rigorous scrutiny of scientists and engineers from a vast array of different backgrounds. For many years as an immediate result of direct international governmental and popular concern the nuclear power industry has led the safety world. *Safety Culture in Nuclear Power* **Proceedings of the Institution of Mechanical Engineers**, 1994 *Solar Energy Update*, 1986 Mobilising Modernity Ian Welsh, 2003-09-02. During the nuclear heyday of the post war years advocates of atomic power promised cheap electricity and a prosperous future. From the present however this promise seems tarnished by accidents leaks and a lack of public confidence. *Mobilising Modernity* traces this journey from confidence in technology to the anxieties of the Risk Society questioning a number of conventional wisdoms en route. Paying close attention to social political and policy aspects throughout this book considers the nuclear moment from global collaborative project at Los Alamos to fragmented bitterly competing projects the atomic science movement's use of symbolic resources to win national ascendancy the implications of secrecy and the establishment of quasi commercial organisations within the nuclear industry. This fascinating study also argues for the ongoing importance of the non violent direct action groups that flourished during the 1970s showing their continuing influence on today's new social movements. Welsh concludes by considering the implications of this historically based account for contemporary issues of risk and trust on current policy making.
