## Teacher Guide

### Answer Key

Answers to the questions of the worksheet are as follows:  
1. How does the tree get water? By taking up water from the soil through its roots and moving it up through the trunk. The trunk has a hollowed-out part called the pith. The pith is the center of the tree and is made of soft wood. The rest of the tree is made of hard wood. The hard wood is made of cells that are stacked on top of each other. The cells are like bricks. The cells are held together by a glue called lignin. The lignin is made from the cells themselves. The lignin is what makes the tree so strong. The lignin is also what makes the tree so flexible. The lignin is what makes the tree so resistant to decay. The lignin is what makes the tree so long-lived. The lignin is what makes the tree so important to the world. The lignin is what makes the tree so beautiful. The lignin is what makes the tree so special.
