state crime has been difficult. There are definitional, conceptual, theoretical, and methodological problems as well as difficulties in designing of practical methods to abolish combat control or resist this type of behavior. Jeffrey Ian Ross reviews these shortcomings then develops a preliminary model of ways to control state crime. His intention is stimulating scholarly research and debate but also encouraging progressive minded policymakers and practitioners who work for governmental and nongovernmental organizations. The hope is that they will reflect upon the methods they advocate or use to minimize state transgressions. This new edition will be of compelling interest to students of political science and criminology as well as general readers interested in human rights, state crime, and world affairs.
