**The New Social Entrepreneurship** Francesco Perrini, 2006-01-01 This book aims to define a novel conception of what social entrepreneurship SE actually is and what it is not starting from a sharp and focused vision of SE it entails innovations designed to explicitly improve societal well being housed within entrepreneurial organizations which initiate change in society In so doing it provides a critical and comprehensive framework for current and future research in the area Francesco Perrini adopts a novel approach to the SE phenomenon considering it as a dynamic process created and managed by innovative social entrepreneur an individual or team who strives to create new social values in the market and community at large By now SE has attained a wider and more enthusiastic acceptance in corporate thinking and practice than in the literature This double line of reasoning partly theoretical and partly practitioner based drives the bottom line of the book In the first part The New Social Entrepreneurship looks for a consistent answer to a muddle of still unresolved questions How can SE be defined How can SEVs be identified What are the main dimensions along which organizations vary and what factors lead to success What does success mean Does the way in which an SEV is designed matter Does it make sense to talk about a social business plan Is an SEV aligned with traditional sources of financing And so on In the second part the book changes perspective examining several practical examples of how perspectives on SE are translated into concrete phenomena LocalFeed CafeDirect The Sekem Initiative Teleserinita the NYC Watershed Agreement and sustainable tourism in Turkey and so on They illustrate theoretical frameworks each enlightening specific aspects of SE and making theory and practice comparisons *Promise, Pitfalls, and Potential of Social Entrepreneurship* Sheila Cannon, Concepción Galdón, 2024-04-08 This book dives into the heart of social entrepreneurship as the authors share the latest research global experiences authentic private conversations and diverse narratives around this widely popular concept The idea and practice of social entrepreneurship has swept the world taken up with enthusiasm by business leaders nonprofit practitioners and

public policy makers alike In this book the authors argue that social entrepreneurship is surrounded by great promise and that this high expectation has contributed to its pitfalls setting it out as separate and different from other kinds of nonprofit organising public service provision and business for social benefit After exploring the problem of inflated expectations the authors rescue the concept from perfection overly positive normative judgements by presenting practical ways forward The book sets out how to really unleash the power of social entrepreneurship so that it can actually deliver on its promise to improve how we organise for social purpose This potential revolves around four key themes that are levers for social change innovative individuals social impact scaling social enterprises and the power of ecosystems Through these themes the book covers a wide range of approaches to social enterprise illustrated by specific examples and experiences from five continents This accessible book is a valuable resource for a variety of practitioners upper level students instructors and business scholars particularly those with an interest in social environmental impact entrepreneurship business ethics sustainable business ESG and CSR

**The Search for Social Entrepreneurship** Paul C. Light, 2009-10-30 Research on social entrepreneurship is finally catching up to its rapidly growing potential In *The Search for Social Entrepreneurship* Paul Light explores this surge of interest to establish the state of knowledge on this growing phenomenon and suggest directions for future research Light begins by outlining the debate on how to define social entrepreneurship a concept often cited and lauded but not necessarily understood A very elemental definition would note that it involves individuals groups networks or organizations seeking sustainable change via new ideas on how governments nonprofits and businesses can address significant social problems That leaves plenty of gaps however and without adequate agreement on what the term means we cannot measure it effectively The unsatisfying results are apple to orange comparisons that make replication and further research difficult The subsequent section examines the four main components of social entrepreneurship ideas opportunities organizations and the entrepreneurs themselves The copious information available about each has yet to be mined for lessons on making social entrepreneurship a success The third section draws on Light's original survey research on 131 high performing nonprofits exploring how they differ across the four key components The fourth and final section offers recommendations for future action and research in this burgeoning field
