The Theory of Guanxi and Chinese Society Jack Barbalet,2021-06-17 The concept of guanxi is used extensively in Chinese society Loosely understood as connections or networks it refers to long term mutually reinforcing exchanges between individuals based on affective and normative commitments This book comprehensively examines the nature and background of this extremely significant and distinct feature of Chinese social political economic and business relations It takes account of the major theoretical frameworks that relate to the long term connections that are developed to pursue instrumental advantage in a society marked by relatively weak legal and regulatory institutions The book locates such theorizing in the major features of the rapidly evolving Chinese market society Yet it also pays attention to the historical origins and cultural sources of a highly particularistic approach to the acquisition of social and material resources an approach which relies on obligatory relations of favour exchange between persons who self consciously and strategically select their associates and goals This sociological treatment of guanxi challenges many dominant conventions and introduces a novel research approach which captures the pertinent psychological dispositions

Chinese Propaganda Posters: From Revolution to Modernization Stefan Landsberger,2020-11-25 Brightly coloured prints portraying model behaviour or a better future have been a ubiquitous element of Chinese political culture from Imperial times until present As economic reform swept the People s Republic in the 1980s visual propaganda ceased to depict the tanned and muscular labourers in a proletarian utopia so typical of preceding decades Instead Western icons of progress and development were employed high speed bullet trains spacecraft high rise buildings gridlocked free ways and projections of general affluence Socialist Realism was phased out by design and mixed media techniques that were influenced by Western advertising This lavishly illustrated study traces the development of the style and content of the Chinese propaganda poster in the decade of reform from its traditional origins to its use as a tool for political and economic purposes

Rules and Networks Richard Appelbaum,William Felstiner,Volkmar Gessner,2001-12-21 International business transactions are heavily influenced by culture practice and rule The pursuit of business relationships within nation states can be subject to differences in the generation of norms and the processing of disputes but these conflicts are magnified many times over in cross border

transactions where nation state control and support is weak or absent This book seeks different explanations of the ways in which business people and their legal advisers try to minimise the effect of these magnified difficulties At the outset the editors suggest four sources through which the international business community might be considered to have supplemented nation state conflict prevention and dispute resolution institutions an international legal order the development of a private normative order based on common business practices denominated the *lex mercatoria* through the efforts and work product of internationalised law firms and by means of extensive thick personal relationships often referred to by their Chinese term *guanxi* Since most explanations are dominated by North American and European legal scholarship and practice a second concern of this book is to open up the discussion to competing explanatory frameworks Specifically it develops the notion that global legal convergence may not be the immediate inevitable result of increased global economic interaction Rather less formal mechanisms for achieving normative understanding and predictability in business dealings may also flourish
