Social Issues and the Social Order Joan Smith,1993-01-01 Social Issues and the Social Order Joan M. Smith,1981-01-01 **Social Issues and the Social Order** Joan Smith,1981 **Radical and Marxist Theories of Crime** Paul B. Stretesky,2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control **Gender, Class and Education (Routledge Revivals)** Stephen Walker,Len Barton,2013-11-05 First published in 1983 Gender Class and Education is a collection of papers that formed presentations at the Westhill Sociology of Education Conference in January 1982 and is the fifth such collection to emerge from the annual conference The conference theme Race Class and Gender was not only chosen because of its topicality but also to provide a framework for debate between educational researchers and teachers The papers focus on the reproduction of gender relations through education and provide important insights into how this process works how it is resisted in schools and colleges and the possibilities for radical intervention This volume includes three teaching bibliographies on gender and education which were not presented at the conference but were compiled specially for the book **Handbook of Social Theory** George Ritzer,Barry Smart,2003-07-26 The Handbook of Social Theory presents an authoritative and panoramic critical survey of the development achievement and prospects of social theory **Producer Cooperatives as a New Mode of Production** Bruno Jossa,2014-02-05 The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation More recently this belief that there is no viable alternative has held firm despite the financial crisis high unemployment levels and an ever increasing gap between rich and poor However since the appearance of Benjamin Ward s seminal 1958 article economic theorists have been developing a workable alternative a system of self managed firms The core argument outlined in this book is that a well organised system of producer cooperatives would give rise to a new mode of production and ultimately a genuinely socialist society This argument is developed through three key steps First following on from Jaroslav Vanek s definition it is argued that a Labour Managed Firm a firm which strictly segregates capital incomes from labour incomes would implement a new production mode because it would reverse the pre existing relation between capital and labour Second given that a system of these Labour Managed Firm cooperatives would reverse the capital labour relationship it is suggested that this would

constitute a form of market socialism Third it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages including the potential for efficiency gains the eradication of unemployment and the end of exploitation Ultimately this book concludes that self management could take the place of central planning in Marxist visions for the future

Power, Ideology, and Control John C. Oliga,2007-08-20 One of the great challenges we face today is coming to grips with forces of power in both theoretical and methodological terms in a way that prepares us for action action that is not totally subject to existing forces The literature has some excellent theoretical accounts of power but these say little about what we should do Most often they are abstract and out of reach of all but a select few In this book however we have a clear cut account of power ideology and control that paves the way for practic minded people to make a genuine attempt at tackling issues of power on both organizational and societal levels John C Oliga suggests a division between what he calls objectivist subjectivist and relational perspectives With objectivism he refers to theories that focus on power as capacities located in social structures These tend to be either synergistic e g Parsonian collective or conflictual e g Marxian conflictual view theoretical orientations With subjectivism he discusses theories that focus on power possessed by agents With relational approaches he places theories that conceive power as a property of interaction among social forces
