## **Social Justice And Individual Ethics In An Open Society Equality Responsibility And Incentives:**

**Social Justice and Individual Ethics in an Open Society** Frank Vandenbroucke, 2012-12-06 Can the need for incentives justify inequality Starting from this question Frank Vandenbroucke examines a conception of justice in which both equality and responsibility are involved In the first part of the inquiry which explores the implementation of that conception of justice the justification of incentives assumes that agents make personal choices based only upon their own interests The second part of the book challenges the idea that a normative conception of distributive justice can be based on that traditional assumption i e that personal choices are not the subject matter of justice Thus Vandenbroucke questions the Rawlsian idea that the primary subject of a theory of justice is the basic structure of society and not the individual conduct of its citizens For a society to be really just the ethos of individual conduct has to serve justice Non mathematical readers can skip the formal model proposed in Chapter 3 and understand the rest of the book [Social Justice and Individual Ethics in an Open Society](#) Frank Vandenbroucke, 2001-03-13

Multidisciplinary economics deliberately uses the insights and approaches of other disciplines and examines what consequences their contributions have for existing economic methods theories and solutions to economic problems Multidisciplinary economists should be at home in their own discipline and meet the high international standards of economic teaching and research that the discipline has developed At the same time they should be able to recognise the limits of economics and be willing to open up new horizons by following new discipline transcending paths on which new insights into the analysis and solutions of economic problems can be found in collaboration with representatives of other disciplines As a result of this search economic methods and theories may have to be adjusted in such a way that they take insights from other disciplines into account They may even have to be replaced by methods and theories that have been developed by other disciplines [Basic Income, Unemployment and Compensatory Justice](#) Loek Groot, 2012-11-06

Business Ethics and the Electronic Economy Peter Koslowki,Christoph Hubig,Peter Fischer,2013-06-29 The internet and the electronic economy are a technological revolution whose secular importance is apparent The internet eliminates the temporal and spatial constraints on the exchange of information It changes deeply the world of production and of labour It transforms the exchange relationships between producers and consumers as well as between the suppliers within the supply chain The electronic economy is able to generate more accurate consumer profiles and therefore a more powerful and effective marketing directed to the individual consumer There is no industry that is not undergoing thorough changes caused by the internet The volume at hand gives an analysis of the internet revolution It covers questions reaching from the highly controversial thesis of the end of property rights in the internet caused by the non rivalry of the consumption of information to questions regarding the repercussions of the internet on our understanding of the human person Technological changes like the introduction of the electronic economy pose the question of how to handle it and how to manage reasonably its ethical problems and dilemmas The ethical problems and the business ethics of the electronic economy in the fields of production and labour of consumption and in handling trust and the abuse of trust are analysed by the contributions from applied ethics and business ethics

**Ethical Dimensions of the Economy** Wilfried Ver Eecke,2008-03-19 Overview This book is a philosophical reflection using mainly Hegel in addition to 1 Adam Smith Kant Marx and Catholic Social Thought about the socio political dimension of economics In it I both agree and disagree with the slogan that the least government is the best government I agree with the slogan in particular as it applies to the economic domain Adam Smith taught us that rational and self interested individuals left by themselves create a more efficient and reliable economic system than one in which the government has a heavy role as was the case in his time with the mercantile system Smith 14 651 Ludwig von Mises demonstrated the same idea for the communist command economy Hayek 1935 87 130 I do agree with the above mentioned

slogan if it is interpreted as suggesting that we can best forget about the role of the government for a good functioning economy. Instead, I will argue that the government has an important function in creating the proper regulations and the wise institutional arrangements which will allow the economy to flourish in a more efficient, fair and humane way. This book is interdisciplinary in nature. It is a philosophical and ethical reflection on economics. Hence, I make use of philosophical ideas often but not exclusively those of Hegel. I reflect philosophically on economic concepts.

**The Discovery of Historicity in German Idealism and Historicism** Peter Koslowski, 2006-03-30. German Idealism develops its philosophy of history as the theory of becoming absolute and as absolute knowledge. Historicism also originates from Hegel's and Schelling's discovery of absolute historicity as it turns against Idealism's philosophy of history by emphasizing the singular and unique in the process of history. German Idealism and Historicism can be considered as the central German contribution to the history of ideas. Since Idealism became most influential for modern philosophy and Historicism for modern historiography, they are analyzed in this volume in a collaboration of philosophers and historians. German Idealism is presented in Schelling and its critics Schlegel, Baader and Nietzsche. Historicism in Ranke, Droysen, Burckhardt and Treitschke. The volume further presents the impact of Idealism and Historicism on present German approaches to the philosophy of history and outlines the debates on the possibility of a philosophy of history and on the methodology of the historical sciences.

*Method and Morals in Constitutional Economics* James M. Buchanan,Geoffrey Brennan,Hartmut Kliemt,Robert D. Tollison,2002 This book contains a range of essays on topics in the emerging field of constitutional political economy This

field of enquiry is strongly associated with the name of James M Buchanan whose research program has been the point of departure for this field. The essays are a selection of those written by colleagues and researchers in the field to honor Buchanan on the occasion of his 80th birthday. They cover a wide range of topics but fall primarily into two sets: one set dealing with methodological aspects of the CPE approach, the other dealing with specific applications in a variety of policy areas ranging from economic transformation to monetary policy regimes to health care. One particular issue in the methodological area relates to the model of motivation used and more especially the role of morality in economic and political behavior. The five essays on this topic make up one of the sections of the book and justify reference to the issue in the volume's title.

**Models of Hysteresis** Augusto Visintin, 1993-06-05. Hysteresis effects appear in several physical phenomena such as ferromagnetism, ferroelectricity and plasticity. **Why We Need a New Welfare State** Gøsta Esping-Andersen, 2002. The volume concentrates on four principal social policy domains: the aged and transition to retirement, the welfare issues related to profound changes in working life, the risks and needs that arise in households and especially in child families, and the challenges of creating gender equality. The volume aims to promote a better understanding of the key welfare issues that will have to be faced in the coming decades. It also warns against the all too frequent recourse to patent policy solutions that have all too often characterized debate. It intends to move the policy debate from its often frustrating vague and generic level towards greater specificity and nuance.
