Who's a Good Dog? Jessica Pierce, 2024-05-31. A New Scientist Best Book of 2023. A guide to cultivating a shared life of joy and respect with our dogs. *Who's a Good Dog?* is an invitation to nurture more thoughtful and balanced relationships with our canine companions. By deepening our curiosity about what our dogs are experiencing and by working together with them in a spirit of collaboration, we can become more effective and compassionate caregivers. With sympathy for the challenges met by both dogs and their humans, bioethicist Jessica Pierce explores common practices of caring for dogs, including how we provide exercise, what we feed, how and why we socialize and train, and how we employ tools such as collars and leashes. She helps us both to identify potential sources of fear and anxiety in our dogs' lives and to expand practices that provide physical and emotional nourishment. *Who's a Good Dog?* also encourages us to think more critically about what we expect of our dogs and

how these expectations can set everyone up for success or failure Pierce offers resources to help us cultivate attentiveness and kindness inspiring us to practice the art of noticing of astonishment of looking with fresh eyes at these beings we think we know so well And more than this she makes her findings relatable by examining facets of her relationship with Bella the dog in her life As Bella shows throughout all dogs are good dogs and we as humans and dog guardians could be doing a little bit better to get along with them and give them what they need What Is a Dog? Animal Entanglements Erika Cudworth,2024-04-01 This book provides an insight into the everyday lives and experiences of people who live with dogs as companions and glimpses aspects of the lives of the dogs who share their homes It is framed sociologically and as such considers the various forms of power relations which shape the lives of those kept as pets and their human owners In recounting stories of companion humans and dogs the co constituted quality of life is clear However while dogs as agential beings with needs desires and a point of view are able to shape outcomes and change aspects of their lived experience the world they inhabit is profoundly geared to human inhabitants and the most privileged ones at that The book revisits the notion of pet keeping as the interplay between domination and affection arguing that these do not exist as a continuum but a mesh of complex relations played out in the use of homespace in the kitchen the bedroom the in the public world of park and the street Those living with dog companions as well as the dogs themselves find their lives are muddled both literally and figuratively boundaries are tested and recast and the complications of inter species cohabitation negotiated by all parties Through an innovative theoretical contribution Cudworth conceptualizes human relations with companion dogs in terms of complex social relations that involve both systemic forms of domination as well as nonhuman agency in shaping social relations and social forms *A Companion to the Anthropology of Environmental Health* Merrill Singer,2016-04-05 *A Companion to the Anthropology of Environmental Health* presents a collection of readings that utilize a medical anthropological approach to explore the interface of humans and the environment in the shaping of health and illness around the world Features the latest ethnographic research from around the world related to the multiple impacts of the environment on health and of societies on their environments Includes contributions from international medical
