Implementing European Union Education and Training Policy D. Phillips, H. Ertl, 2007-05-08 The papers which make up this volume have for the most part emerged from the work of a team of young researchers based for varying periods at the Department of Educational Studies of the University of Oxford as part of an international network funded by the European Union The network known as PRESTiGE Problems of Educational Standardisation and Transition in a Global

Environment involves teams at six European universities each of which can only employ young researchers from Member States other than that in which it is situated The Oxford part of PRESTiGE has been concerned with the interpretation transmission and implementation of European Union education and training policy in four Member States France Germany Sweden and the United Kingdom As the leader of the Oxford team I had the good fortune to work with young researchers from Denmark Germany Greece Sweden and Portugal Their work is included here So too are contributions from Jake Murdoch a member of the Dijon team based at the Universit de Bourgogne and Professor Ant nio N voa the leader of the Lisbon team Together the papers which we have allowed to overlap to some extent so that each one can be read independently represent a genuinely international collaborative effort to understand the intentions and the effects of EU education and training policy and we hope that they will contribute to further discussion of the important issues that those with an interest in European co operation and development will wish to pursue

The European Union Steven P.

McGiffen,2005-10-20 The political dynamics of the European Union can often appear confusing shrouded as they are in complex legislative processes This book offers a clear and thorough critical introduction to the origins development and current direction of the EU and pinpoints the major policy debates animating decision makers This revised and updated edition offers a well illustrated analysis of each of the EU s major policy areas and covers arguments both for and against the EU McGiffen explores subjects including enlargement internal and external security the Euro trade the environment employment transport and regional policy He explains how and why the debate about membership is frequently and falsely presented as if it were a conflict between nationalism and internationalism and argues instead that the EU is merely one of a number of possible solutions to the the economic and political problems facing Europe Published in association with Spectre

developments in EU social governance and offering new insights and fresh perspectives into the operation of New Governance and its relationship with law and constitutionalism The Crisis of the European Union Andreas Grimm, 2017-07-20 The European integration project currently faces profound political economic legal and societal challenges These challenges seem increasingly to overburden the European Union as well as the cohesion among the Member States and therefore pose a serious threat to the integration project The EU faces a major task in coping with this situation and it is one that calls for new approaches and ideas This book addresses the major challenges confronting the EU analyses the consequences for the integration project and develops fresh perspectives on the EU's future prospects for coping with the most debated current and upcoming issues such as the rise of Euroscepticism or the contested idea of an ever closer union Renowned experts in European Studies from the fields of political science law economics and sociology provide an interdisciplinary perspective on the different dimensions of the EU's crisis laden situation and question whether the EU's existing problem solving mechanisms and methods are sufficient to address the imminent tasks This text will be of key interest to scholars and students of EU Politics European Politics European Governance and more broadly European law history and the wider social sciences **New Risks, New Welfare** Peter Taylor-Gooby, 2004-11-11 This book based on brand new data from a major study and long standing collaboration between a number of prominent European scholars provides a fresh perspective on the future of the welfare state across the EU Through detailed case study analysis it analyses the emergence of new social risks alongside traditional needs Public Services and the European Union Laura Nistor, 2011-09-15 Politically sensitive and economically important welfare services such as health care health insurance and education have opened up a heated debate in the EU The application of EU law to welfare services raises discontent from the part of the Member States who perceive their systems to be under threat Resisting to the application of the EU law is sometimes seen as part of protecting those values This book suggests that this resistance is largely unjustified EU law is not damaging to welfare systems but it provides adequate balancing mechanisms to ensure that all interests are protected The approach taken in analysing the impact of EU law on welfare services is to look at the negative integration process and answer the questions related to the extent to which EU law applies to welfare services and the kinds of safeguards the Court offers for these services The proportionality principle distinguishes itself as the central element in balancing national and Community interests Being part of the broader integration process negative harmonization creates legislative lacunae and therefore this book also looks at alternative solutions to the negative harmonization process namely positive and soft law

Birthmarks of Europe Edelgard Mahant, 2017-11-30 By studying the negotiations which led to the conclusion of the original Treaty of Rome and the creation of the European Economic Community this informative book based on recently released archival sources analyses the Franco German bargain which shaped the Community's initial framework and policies This is not just another book about Franco German relations and the founding of the European Union It presents a new

theoretical framework which relates the founding of the European Community to its later development An attempt to apply the ideational framework of the original Community to later developments such as the single market and the Treaty on European Union finds that the Union is still shaped by many of the ideas of the founding fathers Birthmarks of Europe will be useful to teachers and students of the history and politics of the European Union as well as to those studying the dynamics of the development of other regional integration networks **States' Gains, Labor's Losses** Dorothy J. Solinger, 2018-07-05

In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense States Gains Labor's Losses concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective States Gains Labor's Losses emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures **Promoting Solidarity in the European Union** Malcolm G. Ross, Yuri

Borgmann-Prebil, 2010 The EU claims that solidarity is a fundamental value underlying the European social model yet often stands accused of undermining solidarity by advancing market freedoms This book provides the first extended study of the idea of solidarity in the EU context from interdisciplinary perspectives analyzing its impact on law and policy The Legislative Priority Rule and the EU Internal Market for Goods Eadaoin Ni Chaoimh, 2022 This volume introduces the reader to the Legislative Priority Rule and provides a better understanding of how the European Court of Justice resolves regulatory disputes in the presence of secondary product legislation highlighting both the successes and dangers of its current approach

Principles and Practice in EU Sports Law Stephen Weatherill, 2017-08-11 Principles and Practice in EU Sports Law provides an overview of EU sports law In particular it assesses sporting bodies claims for legal autonomy from the ordinary law of states and international organizations Sporting bodies insist on using their expertise to create a set of globally

applicable rules which should not be deviated from irrespective of the territory on which they are applied The application of the *lex sportiva* which refers to the conventions that define a sport's operation is analysed as well as how this is used in claims for sporting autonomy The *lex sportiva* may generate conflicts with a state or international institution such as the European Union and the motives behind sporting bodies' claims in favour of the *lex sportiva*'s autonomy may be motivated by concern to uphold its integrity or to preserve commercial gain Stephen Weatherill's text underlines the tense relationship between *lex sportiva* and national and regional jurisdictions which is exemplified with specific focus on the EU The development of EU sports law and its controversies are detailed reinforced by the example of relevant legal principles in the context of the practice of sports law The intellectual heart of the text endeavours to make a normative assessment of the strength of claims in favour of sporting autonomy and the variation between different jurisdictions and sports is evident Furthermore the enduring dilemma facing sports lawyers running throughout the text is whether sport should be regarded as special and in turn how far its special character should be granted legal recognition

Globalization and Egalitarian Redistribution Pranab Bardhan, Samuel Bowles, Michael Wallerstein, 2020-10-06 Can the welfare state survive in an economically integrated world Many have argued that globalization has undermined national policies to raise the living standards and enhance the economic opportunities of the poor This book by sixteen of the world's leading authorities in international economics and the welfare state suggests a surprisingly different set of consequences Globalization does not preclude social insurance and egalitarian redistribution but it does change the mix of policies that can accomplish these ends *Globalization and Egalitarian Redistribution* demonstrates that the free flow of goods capital and labor has increased the inequality or volatility of labor earnings in advanced industrial societies while constraining governments' ability to tax the winners from globalization to compensate workers for their loss This flow has meanwhile created opportunities for enhancing the welfare of the less well off in poor and middle income countries Comprising eleven essays framed by the editors' introduction and conclusion this book represents the first systematic look at how globalization affects policies aimed at reducing inequalities The contributors are Keith Banting Pranab Bardhan Carles Boix Samuel Bowles Minsik Choi Richard Johnston Covadonga Meseguer Yebra Karl Ove Moene Layna Mosley Claus Offe Ugo Pagano Adam Przeworski Kenneth Scheve Matthew J Slaughter Stuart Soroka and Michael Wallerstein

Subnational Authorities in EU Law Michèle Finck, 2017-09-22 This book explores the role and status of local and regional authorities also referred to as subnational authorities or SNAs in European Union law and reveals the existence of two parallel yet opposed constitutional imaginations of the supranational legal order Through a survey of various areas of EU law including primary and secondary legislation case law as well as various soft law instruments Finck introduces two narratives These are the outsider narrative and the insider narrative that frame these constitutional imaginations According to the outsider narrative the structure of the legal order is bi-centric composed of the member states and the EU only This narrative envisages SNAs as outsiders of EU law

whose interactions with Union law are merely of an indirect nature However in addition to this well known account of EU law a parallel yet distinct narrative can be identified according to which SNAs are insiders that entertain direct relations with the European Union and contribute to the substantive development of EU law It is illustrated that the coexistence of both narratives has wider implications as it points towards a shift in the structure of the European legal order itself which is transitioning from bi centrality to polycentricity
