Social Portrait Of Europe September 1998:

Quantitative Methods in Social Science Research Stephen Gorard, 2003-03-02 This clever scheme builds on Gorard's previous book *Quantitative Methods in Educational Research*. He has revised the original book in the light of experience and feedback and has reworked it so that it includes more social science examples. Four chapters are entirely new.

Quantitative Methods in Educational Research Stephen Gorard, 2010-07-01 This is a comprehensive guide to quantitative research rooted in the author's own teaching and research. In particular, it challenges both the student who does not do numbers and the student who does nothing but numbers and who therefore fails to interpret or challenge his/her results. The book shows how all educational researchers need to do quantitative research, even if only in the sense of reading other people's research findings. In fact, the book argues that the conventional distinction between primary and secondary research data is inadequate since there is enormous need/opportunity for conducting research through using and reinterpreting secondary data. This leads to one of the main selling points of the book: Gorard's idea of the idle researcher who makes valuable contributions to the research literature by using data gathered by other researchers. Changing

Educational Landscapes Dimitris Mattheou, 2010-04-08 Analyzing educational landscapes, the fundamental values, principles and institutions of the sector, is a highly complex and demanding task for any researcher. Like shifting desert sands, these aspects of education are in a constant state of flux, changing according to the unpredictable economic, social, cultural and geopolitical circumstances of late modernity. Key aspects of the intricate, fluid and multifarious contemporary setting can always escape the researcher's necessarily selective observation. The contributors to this book share the view that it is wise therefore to take note of other people's ideas, perceptions and perspectives to compare notes and reflect critically on them. Thus, the papers presented here are a critical and comparative analysis of today's changing educational landscapes. They are an exploration of some of the forces and factors that induce these changes and also examine some of their most significant implications. The work takes a fresh look at received ideology and institutional practices and delineates the increasingly internationalized educational discourses and policies. Among other things, the book discusses the obsession with quality in education and the alternative perceptions of educational equality, the rising concern at the obstacles to truly multicultural education and the debate about the epistemological foundations both of knowledge and knowledge production. Underlying all of the papers in the book is the authors' intention to enhance our understanding of educational change in this era of transition and to further our appreciation of its multifaceted expressions across the world. **Schools, Markets and Choice Policies**

John Fitz, Stephen Gorard, Chris Taylor, 2003-12-16 Choice and selection are now cornerstones of education policies wherever these have been shaped by market economics. Now as never before, schools can face uncertain futures because their survival is determined by external factors such as admission policies and parental preferences. Because of the link between schooling and housing and other public sector services, the implications of increasing choice extend well beyond education. Schools

Markets and Choice Policies brings together the findings of the most comprehensive research ever conducted into choice in secondary education and provides in depth context analysis and discussion In assessing the impact of choice policies not only upon the education system itself but also upon wider society it provides valuable insights into economic and social segregation A groundbreaking contribution to the debate on the role of choice and market economies in education this book is essential reading for anyone involved in determining or implementing education policy at all levels The Social Face of the Euro Dirk van der Werf,2003 **General catalogue of publications 2001** European Commission,2001 **Vatican II** Melissa J. Wilde,2018-06-05 On an otherwise ordinary Sunday morning in 1964 millions of Roman Catholics around the world experienced history For the first time in centuries they attended masses that were conducted mostly in their native tongues This occasion marked only the first of many profound changes to emanate from the Second Vatican Council 1962 1965 Known popularly as Vatican II it would soon give rise to the most far reaching religious transformation since the Reformation In this groundbreaking work of cultural and historical sociology Melissa Wilde offers a new explanation for this revolutionary transformation of the Church Drawing on newly available sources including a collection of interviews with the Council's key bishops and cardinals and primary documents from the Vatican Secret Archive that have never before been seen by researchers Wilde demonstrates that the pronouncements of the Council were not merely reflections of papal will but the product of a dramatic confrontation between progressives and conservatives that began during the first days of the Council The outcome of this confrontation was determined by a number of factors the Church's decline in Latin America its competition and dialogue with other faiths particularly Protestantism in northern Europe and North America and progressive clerics deep belief in the holiness of compromise and their penchant for consensus building Wilde's account will fascinate not only those interested in Vatican II but anyone who wants to understand the social underpinnings of religious change *New Europe in Transition* Peter Anderson,Georg Wiessala,Christopher Williams,2001-01-01 The essays address the key questions currently confronting Europe seeking to provide a broad based introduction to the post millennial politics of this complex continent These questions are addressed on three levels first at the level of the major institutions which straddle large parts of Europe NATO and the OSCE and the E U second from the perspective of a large sample of European countries including parts of the former Soviet Union and third with regard to the economic cultural and social dimensions of European society both East and West **Borders, Boundaries and the Bible** Martin O'Kane,2002-01-01 This collection focuses on the interdisciplinary nature of current biblical studies especially the interpretation of the Bible through the arts Its aim is to illustrate how the crossing of boundaries enriches our understanding of the text itself Contributors include Robert Carroll Mary Douglas Wendy Porter Edward Kessler Larry Kreitzer John Hull and Martin O Kane The themes embrace literature Kipling music Bach and art Holbein The editor contributes an introduction and an illustrated essay on the Flight into Egypt as an icon of refuge *The Corporate Responsibility Movement* Jem Bendell,2017-09-08 Corporate social responsibility is

now an established agenda for large companies with a new profession emerging that engages in the social and environmental contribution of business. How has this agenda emerged over time? What were the key events and actors? How has this new movement of committed individuals been taking shape around the globe? Insights into these questions come from a review of the first half of the first decade of the 21st century. The Corporate Responsibility Movement compiles Lifeworth's highly praised Annual Reviews of Corporate Responsibility from 2001 to 2005. It is introduced with a new overview by the lead author of those reviews, Dr Jem Bendell, in a piece that examines the trajectory of a new social movement in and around business. At a time of searching questions about the future of finance, Dr Bendell argues that a new concept of capital democracy is emerging from within the community of people working towards corporate responsibility, which could be mainstreamed as a socially and environmentally enhanced system of economy. He calls on professionals, researchers, and policy makers to embrace an ambitious agenda for corporate responsibility and develop greater insight into acting together as a movement for change. This book is an essential resource for business libraries recording, analysing, and contextualising some of the key events, issues, and trends during this historic period in the development of the corporation. Muslims in the Enlarged Europe Brigitte Marechal, Stefano Allievi, Felice Dassetto, Jørgen Nielsen, 2003-09-01. This volume describes the main characteristics of contemporary European Islam. Following an outline of the historical background and some statistics related to the presence of Islam in Europe, the process of growth, the development of Islam is analysed through religious instruction in educational systems, organisational structures, and the forms of political participation by Muslims. In addition to a description of the relationship between European states and Islam in judicial terms, the different types of the inclusion/integration of Islam in European society is studied by looking at the media, the relations between religions, economic and international dimensions, and the manner in which views have changed following the events of September 11. Based on extensive bibliographical research, field studies, and specific contributions of scholars, this book provides a rare and useful overall review for a wide public. *Muslims in the Enlarged Europe* has been selected by Choice as Outstanding Academic Title 2005.

The Communist Successor Parties of Central and Eastern Europe Andras Bozoki, John T. Ishiyama, 2020-07-24. What has become of the Communist parties that once held monopoly power in the east bloc? A decade ago it was assumed that they would dissolve, but many of them have enjoyed electoral success. This book systematically examines how they have evolved. In the opening section, Herbert Kitschelt and Ivan Szelenyi respectively consider post-communist party strategies and social democratic prospects in the transitional societies. Part II presents nine case studies of the major communist and communist successor parties of the region, and Part III is devoted to seven
