Social Sciences Go To Washington The Politics Of Knowledge In The Postmodern Age:

The Social Sciences Go to Washington Hamilton Cravens, 2004 What happens when the allegedly value free social sciences enter the national political arena In *The Social Sciences Go to Washington* scholars examine the effects of the massive influx of sociologists demographers economists educators and others to the federal advisory process in the postwar period Essays look at how these social scientists sought to change existing policies in welfare public health urban policy national defense environmental policy and science and technology policy and the ways they tried to influence future policies Policymakers have been troubled that followers of postmodernism have questioned the legitimacy of scientific and political authority to speak for the desires of social groups As the social sciences increasingly become expressions of individual preferences the contributors ask how can they continue to be used to set public policy for us all This collection is a useful resource for anyone studying the relationship between science and the government in the postwar years [The Social Sciences Go to Washington](#)

Cult of the Irrelevant Michael C. Desch, 2021-09-28 How professionalization and scholarly rigor made social scientists increasingly irrelevant to US national security policy To mobilize America s intellectual resources to meet the security challenges of the post 9 11 world US Secretary of Defense Robert M Gates observed that we must again embrace eggheads and ideas But the gap between national security policymakers and international relations scholars has become a chasm In Cult of the Irrelevant Michael Desch traces the history of the relationship between the Beltway and the Ivory Tower from World War I to the present day Recounting key Golden Age academic strategists such as Thomas Schelling and Walt Rostow Desch s narrative shows that social science research became most oriented toward practical problem solving during times of war and that scholars returned to less relevant work during peacetime Social science disciplines like political science rewarded work that was methodologically sophisticated over scholarship that engaged with the messy realities of national security policy and academic culture increasingly turned away from the job of solving real world problems In the name of scientific objectivity academics today frequently engage only in basic research that they hope will somehow trickle down to policymakers Drawing on the lessons of this history as well as a unique survey of current and former national security policymakers Desch offers concrete recommendations for scholars who want to shape government work The result is a rich intellectual history and an essential wake up call to a field that has lost its way

Anti-racism and Multiculturalism Mark Alleyne, 2017-09-08 All scholarly books are engagements with the existing literature often the published scholarly work of one established discipline This book originated with modest objectives to produce a work that would be in conversation with the literature of international relations even though not of relevance only to that field The professed goal of international relations is international peace The ethical lens of pondering the best means to achieve world peace is used to filter media content in the field of multiculturalism and anti racism Although there has been little work on the impact of racial difference on the contours of contemporary international order there has been a sizeable body of research intended to abolish the credibility of pseudo scientific racism Such racism has provided the ideological foundation and justification for imperialism colonialism the

holocaust and apartheid Race has been debunked as a myth Because of this racism the ideology bred of human classification according to racial difference has been found to be intellectually and morally barren But the need to communicate egalitarian and scientific sentiments remains The contributors to this volume consider five questions How does the literature on antiracism improve our understanding of conflict resolution How does the analysis of the media s role in racist and anti racist discourses improve the process of theorizing on hate and war propaganda How can research on anti racist discourse improve UN peacekeeping What implications does this subject have for theory building and cultural diversity How and why should the literature on anti racism expand research in international relations This is a unique worthwhile framework for cross disciplinary research in race and intellectual consensus and conflict The Politicization of Parenthood Martina

Richter,Sabine Andresen,2012-02-29 Currently families are being subjected to increasing public attention Interest is focussing on their potential strengths and weaknesses in determining how well children do at school Alongside such human development oriented expectations families are also becoming a focus of attention as a resource for human capital in times of economic crises and criticism of the welfare state In many European countries parents and children are at the forefront of the welfare state and socio educational activities in current programs and policies The current transformation processes in the welfare state are making the relationship between families and the state more dynamic in general and they are structuring the discourses on the childrearing education and child care services in the fields of both public and private responsibility The introduction of all day schooling in Germany also has to be viewed in this context This is gradually changing the traditional half day structure of German schools and shifting the borders of public and private responsibility on the levels of education child care and childrearing institutions The attention given to parental childrearing and educational responsibility within the context of current national and international debates clearly underlines the fact that issues in private life are increasingly entering the public discourse and becoming subject to attempts at socio political control This raises the assumption of an increasing politicization of parenthood in the post welfare state that is focusing more and more attention on the structural conditions of gainful employment and child care as well as on the current relations between the genders This context particularly emphasizes the time and care regimes that decisively determine the practices in daily family life and the utilization of all day education settings *Historical Influences on Lives and Aging* K. Warner Schaie,

PhD,Glen Elder, PhD,2005-06-27 This book focuses on the ways in which the life course of individuals is affected by the historical contexts in which they live Editors Schaie and Elder along with over twenty five contributors explore how historical events of varying degrees such as immigration war age ethnicity and socioeconomic status can affect the immediate and long term life course **Education & the Great Depression** David Hicks,2006 Education and the Great Depression Lessons from a Global History examines the history of schools in terms of pedagogies curricula policies and practices at the point of intersection with worldwide patterns of economic crisis political instability and social transformation Examining the Great

Depression in the historical contexts of Egypt Turkey Germany Brazil and New Zealand and in the regional contexts of the United States including Virginia New York City Cleveland Chicago and South Carolina this collection broadens our understanding of the scope of this crisis while also locating more familiar American examples in a global framework

Buying Military Transformation Peter Dombrowski, Eugene Gholz, 2006-09-26 In *Buying Military Transformation* Peter Dombrowski and Eugene Gholz analyze the United States military's ongoing effort to capitalize on information technology New ideas about military doctrine derived from comparisons to Internet Age business practices can be implemented only if the military buys technologically innovative weapons systems *Buying Military Transformation* examines how political and military leaders work with the defense industry to develop the small ships unmanned aerial vehicles advanced communications equipment and systems of systems integration that will enable the new military format Dombrowski and Gholz's analysis integrates the political relationship between the defense industry and Congress the bureaucratic relationship between the firms and the military services and the technical capabilities of different types of businesses Many government officials and analysts believe that only entrepreneurial start up firms or leaders in commercial information technology markets can produce the new network oriented military equipment But Dombrowski and Gholz find that the existing defense industry will be best able to lead military technology development even for equipment modeled on the civilian Internet The U S government is already spending billions of dollars each year on its military transformation program money that could be easily misdirected and wasted if policymakers spend it on the wrong projects or work with the wrong firms In addition to this practical implication *Buying Military Transformation* offers key lessons for the theory of Revolutions in Military Affairs A series of military analysts have argued that major social and economic changes like the shift from the Agricultural Age to the Industrial Age inherently force related changes in the military *Buying Military Transformation* undermines this technologically determinist claim commercial innovation does not directly determine military innovation instead political leadership and military organizations choose the trajectory of defense investment Militaries should invest in new technology in response to strategic threats and military leaders professional judgments about the equipment needed to improve military effectiveness Commercial technological progress by itself does not generate an imperative for military transformation Clear cogent and engaging

Buying Military Transformation is essential reading for journalists legislators policymakers and scholars The Founding Fathers, Education, and "The Great Contest" B. Justice, 2013-07-17 Leading historians provide new insights into the founding generation's views on the place of public education in America This volume explores enduring themes such as gender race religion and central vs local control in seven essays of the 1790s on how to implement public education in the new USA The original essays are included as well Engineering Society Kerstin Brückweh, Richard F. Wetzell, 2012-10-09 Explaining crime by reference to abnormalities of the brain is just one example of how the human and social sciences have influenced the approach to social problems in Western societies since 1880 Focusing on applications such as penal policy therapy and marketing this volume examines how these sciences have become embedded in society **The Production of Modernization** Hemant Shah, 2011-03-11 How Daniel Lerner's seminal work contributed to the overall professionalization of communication theory and sociology **The Evolution of the Property Relation** A. Davis, 2015-02-04 Evolution of the Property Relation defines an approach to economics which is centered around the concept of property and explores the historical evolution of the relationship of the individual private property and the state and the distinctive changes wrought by the emergence of the market **Social Science for What?** Alice O'Connor, 2007-04-02 Much like today the early twentieth century was a period of rising economic inequality and political polarization in America But it was also an era of progressive reform a time when the Russell Sage Foundation and other philanthropic organizations were established to promote social science as a way to solve the crises of industrial capitalism In *Social Science for What* Alice O'Connor relates the history of philanthropic social science exploring its successes and challenges over the years and asking how these foundations might continue to promote progressive social change in our own politically divided era The philanthropic foundations established in the early 1900s focused on research which while intended to be objective was also politically engaged In addition to funding social science research in its early years the Russell Sage Foundation also supported social work and advocated reforms on issues from child welfare to predatory lending This reformist agenda shaped the foundation's research priorities and methods The Foundation's landmark Pittsburgh Survey of wage labor conducted in 1907 1908 involved not only social scientists but leaders of charities social workers and progressive activists and was designed not simply to answer empirical questions but to reframe the public discourse about industrial labor After World War II many philanthropic foundations disengaged from political struggles and shifted their funding toward more value neutral academic social inquiry in the belief that disinterested research would yield more effective public policies Consequently these foundations were caught off guard in the 1970s and 1980s by the emergence of a network of right wing foundations which was successful in promoting an openly ideological agenda In order to counter the political inroads made by conservative organizations O'Connor argues that progressive philanthropic research foundations should look to the example of their founders While continuing to support the social science research that has contributed so much to American society over the past 100 years they should be more direct about

the values that motivate their research In this way they will help foster a more democratic dialogue on important social issues by using empirical knowledge to engage fundamentally ethical concerns about rising inequality O Connor s message is timely public interest social science faces unprecedented challenges in this era of cultural warfare as both liberalism and science itself have come under assault Social Science for What is a thought provoking critique of the role of social science in improving society and an indispensable guide to how progressives can reassert their voice in the national political debate A Volume in the Russell Sage Foundation s Centennial Series *The Birth of Head Start* Maris A. Vinovskis,2005-05-02 One of the most popular and enduring legacies of President Lyndon B Johnson s Great Society programs Project Head Start continues to support young children of low income families close to one million annually by providing a range of developmental and educational services Yet as Head Start reaches its fortieth anniversary debates over the function and scope of this federal program persist Although the program s importance is unquestioned across party lines the direction of its future whether toward a greater focus on school readiness and literacy or the continuation of a holistic approach remains a point of contention Policymakers proposing to reform Head Start often invoke its origins to justify their position but until now no comprehensive political history of the program has existed Maris A Vinovskis here provides an in depth look at the nation s largest and best known yet politically challenged early education program The Birth of Head Start sets the record straight on the program s intended aims documenting key decisions made during its formative years While previous accounts of Head Start have neglected the contributions of important participants such as federal education officials and members of Congress Vinovskis s history is the first to consider the relationship between politics and policymaking and how this interaction has shaped the program This thorough and incisive book will be essential for policymakers and legislators interested in prekindergarten education and will inform future discussions on early intervention services for disadvantaged children [Bringing the Civic Back In](#) Larry Bennett,John D. Fairfield,Patricia Mooney-Melvin,2022-09-09 Commemorates the legacy of the late urban historian Zane L Miller
