Children's Books In Print 1998 Bowker Editorial Staff, R R Bowker Publishing, Bowker, 1998 *Educating the Democratic Mind* Walter Parker, 1996-01-01 Addresses the question How can schools help shape young minds to address the challenges of a democratic society *Children's Books in Print* R R Bowker Publishing, Bowker, 1999-12 **Doing History** Linda S. Levstik, Keith C. Barton, 2015-01-30 Now in its fifth edition *Doing History* offers a unique perspective on teaching and learning history in the elementary and middle grades Through case studies of teachers and students in diverse classrooms and from diverse backgrounds it shows children engaging in authentic historical investigations often in the context of an integrated social studies curriculum The premise is that children can engage in valid forms of historical inquiry collecting and analyzing data examining the perspectives of people in the past considering multiple interpretations and creating evidence based historical accounts Grounded in contemporary sociocultural theory and research the text features vignettes in each chapter showing communities of teachers and students doing history in environments rich in literature art writing discussion and debate The authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory *Doing History* emphasizes diversity of perspectives in two ways readers encounter students from a variety of backgrounds and students themselves look at history from multiple perspectives It provides clear guidance in using multiple forms of assessment to evaluate the specifically historical aspects of children's learning **Policy Uncertainty and Risk** Tomas Hellström, Merle Jacob, 2011-06-28 *Policy Uncertainty and Risk* presents a contribution to risk analysis and risk management in public policy and management at large Special emphasis is put on the utilization of scientific knowledge by decision makers in instances where knowledge in both spheres of science and administration is

highly uncertain and contested The book therefore contributes a model of science practitioner interaction in a policy area of strong current relevance The perspective is a realist constructivist one which means that risk and policy are taken to be socially predicated insofar as we can choose and change the way we define and interact with its practices It is realist insofar as we continually use such constructions to re define and re structure the world we live in Although essentially theory driven and conceptually oriented the authors develop their argument for a new interpretation of policy relevant science through a number of pressing case studies These studies include the recent BSE CJD crises in the UK the introduction of Marine Protected Areas in Sweden and the current practices surrounding risk management in corporate bodies Drawing on empirical cases and theoretical explication the book provides a number of suggestions as to how risk analysis and risk management may be more properly conceived of both from a practitioner as well as from an academic point of view
