Regional Economic Development Robert J. Stimson, Roger R. Stough, Brian H. Roberts, 2013-03-09 Regional economic development has attracted the interest of economists geographers planners and regional scientists for a long time And of course it is a field that has developed a large practitioner cohort in government and business agencies from the national down to the state and local levels In planning for cities and regions both large and small economic development issues now tend to be integrated into strategic planning processes For at least the last 50 years scholars from various disciplines have theorised about the nature of regional economic development developing a range of models seeking to explain the process of regional economic development and why it is that regions vary so much in their economic structure and performance and how these aspects of a region can change dramatically over time Regional scientists in particular have developed a comprehensive tool kit of methodologies to measure and monitor regional economic characteristics such as industry sectors employment income value of production investment and the like using both quantitative and qualitative methods of analysis and focusing on both static and dynamic analysis The father of regional science Walter Isard was the first to put together a comprehensive volume on techniques of regional analysis Isard 1960 and since then a huge literature has emerged including the many titles in the series published by Springer in which this book is published **Greening Our Economy for a**

**Sustainable Future** Simon Grima, Kiran Sood, Ercan Ozen, Rebecca Emily Dalli Gonzi, 2024-10-17 Greening Our Economy for a Sustainable Future examines the green economy by balancing social needs the environment and the economy It argues that different economic models must be developed to address the environment caused by economic expansion The book not only looks at the opportunities of having a green economy but also goes into areas such as greenwashing social washing sustainability economics and more In addition it addresses how one can improve well being through a symbiotic relationship between economic growth and environmental stewardship Reviews literature and case studies that can be applied on a large scale on measures to change the way of economic development to implement a green economy theory Examines bottlenecks that occur when resource scarcity or poor quality makes investment more expensive Highlights opportunities for innovation spurred by policies and framework conditions that allow for new ways of addressing environmental problems **Advances in Geospatial Technologies for Natural Resource Management** Ravi Shankar Dwivedi, 2024-11-19 Timely and reliable

information on natural resources regarding their potential and limitations is a prerequisite for sustainable development. Geospatial technologies offer immense potential in providing such information in a timely and cost-effective manner. Using orbital sensors data in conjunction with airborne and proximal sensors data to generate information on soils and agricultural resources, forests, mineral resources, fossil fuel, wetlands, water resources, and marine resources, this book focuses on the advancements in technologies applicable to managing these resources. It addresses global issues like climate change and land degradation neutrality and introduces spatial data infrastructure (SDI) as a mechanism for sharing geospatial data. This book also provides an in-depth discussion on drones, crowdsourcing, cloud computing, Internet of Things, machine learning, and their applications.

**FEATURES** Contains a comprehensive resource on the latest developments in geospatial technologies and their use in monitoring natural resources, productivity mapping, and modeling. Explains the geo-computation methods and online algorithm developments. Includes clear guidance on how best to use geospatial data for various applications. Discusses case studies from a variety of fields and current trends in the management of natural resources. Provides future scenarios concerning platforms, sensors, data analysis, and interpretation techniques. This book is written for remote sensing and GIS professionals in environmental institutions and government who are involved in natural resource management projects. Senior undergraduate and graduate level students in Earth sciences, geography, or environmental management can also use this text for supplementary reading.

**Sustainable Events Management** Razaq Raj, Kevin A. Griffin, 2024-05-14 This book introduces the reader to sustainable events management theory and practice based on academic research and illustrated with empirical case studies. The book provides a comprehensive view of sustainable management and how it relates to the many sectors within the events industry. It emphasises the fundamental importance of local communities, businesses, and stakeholders to events organisation in regional, national, and international locations. It brings into focus international governing bodies and national government strategic objectives as the corner stones for sustainable development in the events sector.
