Social Web:

Designing for the Social Web Joshua Porter, 2010-04-07 No matter what type of web site or application you're building social interaction among the people who use it will be key to its success. They will talk about it, invite their friends, complain about its high praises and dissect it in countless ways. With the right design strategy, you can use this social interaction to get people signing up, coming back regularly and bringing others into the fold. With tons of examples from real world interfaces and a touch of the underlying social psychology theory, Joshua Porter shows you how to design your next great social web application. Inside, you'll discover the real reasons why people participate online and the psychology behind them. The Usage Lifecycle or how people use your web application over time. How to get people past that trickiest of hurdles sign up. What to do when you've launched a web application and nobody is using it. How to analyze the effectiveness of your application screens and flows. How to grow your social web application from zero users to 1000 and beyond. Designing for the social web is about much more than adding features. It's about embracing the social interaction of the people who make you successful and then designing smartly to encourage it.

L'era della Web Communication Riccardo Di Bari, 2012-10-17 Da quando il World Wide Web la Rete delle Reti è entrato prepotentemente a far parte delle nostre vite la nostra società sta sperimentando un cambiamento profondo. Ma come cominciato tutto questo? Quando, come e perché il Web ha cessato di essere una semplice fonte di informazioni per diventare uno strumento di interazione tra persone? E come si è evoluto il Web nel futuro? Partendo dalle origini di Internet e del Web, il testo esamina in profondità le caratteristiche del Web 2.0, il Web Sociale, affronta poi il tema del Web del futuro prossimo, il Web 3.0, Web Semantico, senza tralasciare l'evoluzione futura più remota ossia il Web 4.0, Web Ubiquo. Spiega come tutto ebbe inizio con la digitalizzazione, il presupposto fondamentale per fenomeni di grande attualità come la convergenza digitale e quella multimediale, la crossmedialità, la rimediation digitale. Dal punto di vista più strettamente comunicazionale, il lavoro nell'attribuire al Web una natura mediale affronta il tema del passaggio dalla comunicazione tradizionale alla web communication in tutte le sue declinazioni e modalità. La comunicazione screen-to-face, asincrona e quella sincrona. Anche gli aspetti più concreti non vengono trascurati: un intero capitolo spiega come comunicare nel Web e fornisce utili indicazioni pratiche per fare web communication in modo efficace.

La seconda parte del libro dedicata a un approfondita analisi delle tre aree mediali del Web di oggi l area della conoscenza e condivisione dai motori di ricerca alle enciclopedie online sino alla nuova didattica rappresentata dall e learning l area del business e commerce come strategia di e business marketing virale e web advertising come strumenti di web marketing e l area delle relazioni sociali social media e blog colonne portanti del Web 2 0 Il libro comprende oltre 30 focus
