*Revisiting Economic Vulnerability in Old Age* Julia Henke, 2020-03-04 This book offers an interdisciplinary analysis of the experience of economic vulnerability among older adults Drawing on various fields ranging from happiness economics to stress research it integrates assessments from objective and subjective measurement perspectives The book offers nuanced insights into prevalent experiences of low economic quality of life in wealthy countries using empirical data from Switzerland A sample of some 1500 adults aged 65 84 is taken as the basis for a systematic comparison of the demographic and socioeconomic characteristics of three overlapping groups of potentially vulnerable pensioners those who are income poor objective measure those who report difficulties making ends meet subjectively self assessed measure and those who worry about not having enough money for current expenses subjectively perceived measure Theoretical and empirical evidence is offered for the distinctiveness of the two subjective indicators one of which assesses the experience of economic strain while the other captures the individual's response in terms of stress The conceptual contribution of this research includes a typology of economic vulnerability eight distinct profiles emerge at the intersection of the objective self assessed and perceived measures These profiles correspond to specific risk constellations and they reflect varying degrees of human agency in dealing with economic vulnerability

**Social Work with Older People** Ann McDonald, 2010-03-08 Social Work with Older People provides an authoritative and practical guide to working with older people in a range of settings It addresses the complexities of individual work with older people as well as work with families groups and the wider community and is not afraid to tackle the challenges as well as opportunities of practice in this area The book begins by explaining the demographic changes that have led to a greying of the general population It goes on to discuss the diversity in experiences of ageing across society and the range of issues which confront older people and those who wish to work proactively with them Clear attention is paid to the processes of assessment care planning and review with readers encouraged to reflect on developing good practice through case studies and exercises Although it has a strong practical emphasis the book also stresses the value of theoretical perspectives with insights from fields such as sociology and psychology woven throughout the book Clear links are also made to policy guidelines and organizational standards without losing sight of the deeper often more complex issues that arise when working with older people Social Work with Older People will be essential reading for social work students and practitioners but also for others who are interested in the development of practice with older people as citizens and service users

The

Hope of the Country with a Large Population Xueyuan Tian,2014-01-24 China has the largest population in the world However according to the United Nations India and China are expected to simultaneously reach a population of approximately 1 38 billion by 2030 with India taking a slight lead China will be all too happy to surrender its position as the country with the largest population Where does this attitude come from For China this situation is symbolic of the solution to the excessive population and a milestone in the Three Stage population development strategy as well as the people s hope In order to realize this hope it firstly depends on the transformation from the previous high birth rate high death rate and low growth rate of population to a high birth rate low death rate and high growth rate and finally to a low birth rate low death rate and low growth rate It also relies on the post demographic transition to a low fertility level since the 1990s and secondly is closely related to the population change in the future Therefore in depth studies on population and the development of population resources environment economy and society should be conducted on the basis of fresh experiences and theories from the international community in order to move forward with the times to promote the solution to the population problem and realize the dream of rejuvenating the Chinese nation As a result population change is linked to this great rejuvenation as the great rejuvenation requires the population change and in turn the population change facilitates the great rejuvenation

in a community setting      *Old Age and Urban Poverty in the Developing World* P. Lloyd-Sherlock,1997-07-23 Many countries in the developing world are facing a rapid acceleration in population ageing To date this problem has generated little interest either from academics or policy makers Studies which focus exclusively on social security are of little relevance for the majority of elderly in these regions for whom the possibilities of saving or making pension contributions are remote This book takes a more comprehensive approach combining analysis of social security issues in all developing countries with micro level case studies of poor urban elderly survival strategies in Buenos Aires      *Independence and Economic Security in Old Age* Frank Denton,2011-11-01 As boomers move towards retirement the phenomenon of population aging has become a much publicized issue Independence and Economic Security in Old Age focuses on the economic and social implications of aging at the level of the individual and of society as a whole The product of a three year research program the book contains chapters by recognized experts in the fields of economics and econometrics sociology social work medicine epidemiology gerontology and nursing The book first looks at some basic demographic issues including the definition of old the changing age distribution of the population and the demographic outlook for the next several decades It then moves into the area of family relations health and economic security The concept of independence among the elderly is examined and the degree of preparedness for old age by different elderly or soon to be elderly cohorts is considered The measurable social contributions of the elderly are also discussed in juxtaposition with the benefits they receive The book continues with an examination of the saving behaviour of the elderly the appropriateness of the Consumer Price Index as a measure of inflation the incomes of older women and how the tax transfer system affects the incentives of Canadians to save for retirement Comprehensive and innovative in its consideration of the issues and implications of aging this book will be a valuable resource for specialists and non specialists interested in issues of population aging for students of gerontology economics sociology health studies social work and women s studies and for social planners and policy makers      Old Age in English History Pat Thane,2000-05-11 At the end of the twentieth century more people are living into their seventies eighties nineties and beyond a process expected to continue well into the next millennium The twentieth century has achieved what people in other centuries only dreamed of many can now expect to survive to old age in reasonably good health and can remain active and independent to the end in contrast to the high death rate ill health and destitution which affected all ages in the past Yet this change is generally greeted not with triumph but with alarm It is assumed that the longer people live the longer they are ill and dependent thus burdening a shrinking younger generation with the cost of pensions and health care It is also widely believed that the past saw few survivors into old age and these could be supported by their families without involving the taxpayer In this first survey of old age throughout English history these assumptions are challenged Vivid pictures are given of the ways in which very large numbers of older people lived often vigorous and independent lives over many centuries The book argues that old people have always been highly visible in English communities and concludes that as people live longer due to the benefits of

the rise in living standards far from being burdens they can be valuable contributors to their family and friends

**Social Policy and Aging** Carroll L. Estes, 2001-03-30 This groundbreaking book provides a comprehensive treatment of the political economy of aging From the founder and key thinker in the field comes a work that aims to contribute to the understanding of old age and aging in the context of problems and issues of the larger social order in America Since Carroll Estes first writing on the political economy of aging in 1979 there has been growing recognition and incorporation of her critical perspective as one of the major paradigms in the field of aging The only comprehensive book length treatment of the subject Social Policy and Aging addresses the globalization of capital and developments in health care restructuring Combining social gerontological theory and major theoretical advances in work on the welfare state this text keeps readers abreast of the new development within the discipline Students and researchers alike will appreciate this critical perspective widely acknowledged as one of the major paradigms in the field of aging

**Old Age** John Vincent, 2003-12-08 Recent decades have seen a fundamental change in the age structure of many western societies In these societies it is now common for a fifth to a quarter of the population to be retired for fewer babies to be born than is required to sustain the size of the population and for life expectancy to exceed eighty years old This book provides an overview of the key issues arising from this demographic change

**The Economics of Individual and Population Aging** Robert L. Clark, Joseph J. Spengler, 1980-04-30 This study aims to identify and describe the principle economic issues associated with individual and population ageing In addition the study surveys and assess the existing knowledge including research by scholars of many countries and different fields in the social sciences of the economic and social problems associated with ageing Although the study covers a wide range of issues it focuses primarily on the economic complexities of individual ageing and the macro economic problems that arise from age structure changes in the population The authors giving examples from many countries trace the development of concern for population ageing and examine theoretical concepts and changing demographic conditions Cross national econometric studies are cited along with time series and cross sectional research on individual countries In assessing the state of the literature on the economic problems of ageing the authors have attempted to indicate fruitful avenues for further research

*Economics, Culture and Social Theory* William A. Jackson, 2009 the book is excellent in setting out and explaining a fundamental critique of economics one moreover that has been missed by most other current critics of the field Making this case is an achievement Hopefully it will have a greater impact than its author probably expects Journal of Cultural Economics Economics evolved by perfecting the taking of culture out of its reductionist and virtual world But culture has recently been reintroduced both as a sphere of application for an otherwise unchanging methodology and as a weak form of acknowledging that the economic alone is inadequate as the basis even for explaining the economy This volume is an essential critical starting point for understanding the changing relationship between economics and culture and in offering a more satisfactory and stable union between the two Ben Fine University of London UK Economics Culture and Social Theory examines how

culture has been neglected in economic theorising and considers how economics could benefit by incorporating ideas from social and cultural theory Orthodox economics has prompted a long line of cultural criticism that goes back to the origins of economic theory and extends to recent debates surrounding postmodernism William A Jackson discusses the cultural critique of economics identifies the main arguments and assesses their implications Among the topics covered are relativism and realism idealism and materialism agency and structure hermeneutics semiotics and cultural evolution Drawing from varied literatures notably social and cultural theory the book stresses the importance of culture for economic behaviour and looks at the prospects for a renewed and culturally informed economics The book will be invaluable to heterodox economists and to anyone interested in the links between culture and the economy It takes an interdisciplinary approach arguing against the isolation of economics and will therefore hold wide appeal for social scientists working in related fields as well as for economists specialising in cultural economics and economic methodology      **Neoliberalising Old Age** John

Macnicol, 2015-10-08 This book examines the effect of neoliberalism on the recent ageing and social policy agenda in the UK and the USA
