Geography Matters! Doreen Massey,John Allen,1984-11-22 Space and nature have long been the concerns of human geography bound up with a strong sense of the importance of place Understanding how society changes entails understanding the geography of social change In this new reader the editors argue for a new way of looking at the relationship between society and its spatial organization between society and nature and between the interdependence and unique character of places First through a selection of material ranging from the changing geography of class cultures

gender relations city structures state power to the processes of international law the readings demonstrate that neither space nor society can be understood independently of the other Social change involves spatial change and spatial change affects social organization The two sides of the relation mediate a geography of change Second a number of the articles explore the relation between society and nature and demonstrate that that too involves a continuous and changing interrelationship Nature cannot be understood outside of its social interpretation and use equally nature the environment has an impact upon the quality and future of our lives Third this collection presents an approach to the geography of place which has methodological implications for all those in social science who are concerned with the central problem of appreciating the of outcomes without losing sight of general processes of change To grasp the dynamic relation between society space and nature is important not only for human geography but for all the social sciences Geography Matters brings together a wide range of articles from both geographers and non geographers It addresses a series of economic political and cultural issues from a geographical angle that will put the social distinctiveness of place back on the agenda for all the social sciences
