The Social Structures of the Economy , Structures of Capital Sharon Zukin, Paul Dimaggio, 1990-05-25 Although market importance is acknowledged this work's emerging theme is the need to account for the ways in which multiple forms of social organization elite groups communities government structures influence economic processes **Social Structure and Mobility in Economic Development** Neil J. Smelser, Seymour Martin Lipset, The foundation of this volume is the notion that the several processes of change constituting economic and social development are systematically interrelated The essence of development is the appearance of rapid rates of increases in many different indices output per capita political participation literacy and the like These quantitative changes are however commonly accompanied by vast changes in the social structure markets emerge political bureaucracies arise and new educational systems appear Written by the leading authorities on the subject this group of papers tackles the causes and consequences of social mobility Each author brings his particular skills to bear on various aspects of the problem in studies of persons moving from rural to urban settings from one kind of industry to another and from one prestige level to another Several of the papers review the theoretical and methodological issues involved in comparative research on social mobility while others compare and contrast traditional and modern stratification systems Various papers explore the economic religious and psychological basis of social mobility concluding with enquiry into the consequences of rapid mobility especially in terms of the political stability of developing nations Because social mobility is a central consideration in any study of economic and social change every student of change will use this pioneering reference source as a text for all future research Contributors include Otis Dudley Duncan Harold L. Wilensky Michael G. Smith Bert F. Hoselitz Wilbert E. Moore Natalie Rogoff Ramsy Gideon Sjoberg Reinhard Bendix Harry Crockett David Matza Lester Seligman and Gino Germani Neil J. Carmen Ruiz Viñals,Carmen Parra Rodríguez,2013-08-21 Social innovation can be simply defined as the new ideas and initiatives that make it possible to meet our society s challenges in areas such as the environment education employment culture health and economic development It is currently becoming increasingly important as a central concept for social theories and politics This edited volume brings together interdisciplinary contributions which examine the complex interrelation between innovation and social problems a link which has been surprisingly underexplored in academia and practice thus far Social Innovation New Forms of Organisation in Knowledge Based Societies examines the mutual

interdependence of innovation processes and social affairs This interdependent relationship is characterised by a high degree of complexity which stems on the one hand from the true uncertain character of innovation and on the other hand from the different time scales in both domains The alliance between innovation and social policy is highly relevant to the challenges which we are facing in the 21st century such as resource scarcity ageing societies and climate change All of these issues demand substantial continuous and sustainable structural change to maintain international competitiveness Social change can only be understood by improving our knowledge about the impact of innovation processes in their co evolutionary alliance with social evolution The purpose of this book is to increase awareness of social participation among civil society organisations SMEs governments and research institutions in order to promote economic political and social changes that enhance collective welfare This volume offers a key starting point for those looking to further explore this important realm of social research

Knowledge, Social Institutions and the Division of Labour Pier Luigi Porta, Roberto Scazzieri, Andrew S. Skinner, 2001-01-01 The complex interplay of the formation and communication of knowledge the structure of social interaction and the evolution of the division of labour is here skilfully explored in a broad historical philosophical and analytical framework by a truly international meeting of minds enabling an encounter with great thinkers past and present commencing with Hume and Smith A heady and unusual elixir finely distilled and to be slowly enjoyed if its sophisticated benefits are to be fully gathered by the reader Peter Groenewegen University of Sydney Australia Knowledge Social Institutions and the Division of Labour gives rise to a new and richer institutional analysis of the economy centred around the analysis of language the division of labour and social knowledge It is in this perspective that the economic analysis of institutions comes to be associated with the study of civil society or with the broad framework of

communication and coordination behind the interaction of individuals in economic and non economic spheres This fascinating book is divided into three parts beginning with the issue of the development of science as an aspect of the division of labour starting from methodological problems on the communication of scientific knowledge The volume goes on to explore issues on the moral bases of social interaction and more particularly of commercial society before ending with in depth analyses of questions on the division of labour social institutions and the diffusion of knowledge in society **The Visualization of**

From Communists to Foreign Capitalists explores the intersections of two momentous changes in the late twentieth century the fall of Communism and the rise of globalization Delving into the economic change that accompanied these shifts in central and Eastern Europe Nina Bandelj presents a pioneering sociological treatment of the process of foreign direct investment FDI She demonstrates how both investors and hosts rely on social networks institutions politics and cultural understandings to make decisions about investment employing practical rather than rational economic strategies to deal with the true uncertainty that plagues the postsocialist environment The book explores how eleven postsocialist countries address the very idea of FDI as an integral part of their market transition The inflows of foreign capital after the collapse of

Communism resulted not from the withdrawal of states from the economy as is commonly expected but rather from the active involvement of postsocialist states in institutionalizing and legitimizing FDI Using a wide array of data sources and combining a macro level account of national variation in the liberalization to foreign capital with a micro level account of FDI transactions in the decade following the collapse of Communism in 1989 the book reveals how social forces not only constrain economic transformations but also make them possible From Communists to Foreign Capitalists is a welcome addition to the growing literature on the social processes that shape economic life

Social Organizations Göran Ahrne, 1994-07-05 In this lively and wide ranging essay Göran Ahrne sketches an organizational theory of society Combining the insights of organization theory with the traditional concerns of social theory he makes an innovative and creative contribution to both fields Using a broad definition of organizations the author shows that what goes on inside outside and among organizations is central to understanding social relations Organizations provide people with resources and motives and they set the frames for human action Although organizations do not form societies or systems society is shaped and changed through interaction between organizations Drawing on various schools of organization theory including institutional ecological and contingency theories the book shows how their synthesis with social theory clarifies the nature and effects of organizational interactions

Core Sociological Dichotomies Chris Jenks, 1998-07-08 In this sociology text the contributors provide an introduction to the subject without over simplifying or writing down to their audience The book

aims to furnish undergraduates with the knowledge that will help them to understand and practice sociology and also to develop a self-perpetuating sociological imagination to enable them to think through new issues and new problems. It consists of a series of specially commissioned chapters around binary or dichotomous themes. Although many sociologists are critical of dichotomous models of sociological theory and research, the device crops up again and again in the history and practice of the subject. Jenks and his colleagues use the dichotomies to situate students in current sociological arguments and topical debates. For example, by examining contradictory pairs of concepts like structure/agency, local/global, continuity/change, students are introduced to alternative explanations for aspects of human conduct over a whole series of issues.
