## MEANING AND DEFINITION

The following definition was approved by the IFSW General Meeting and the IASSW General Assembly in July 2014:

“Social work is a practice-based profession and an academic discipline that promotes social change and development, social cohesion, and the empowerment and liberation of people. Principles of social justice, human rights, collective responsibility and respect for diversities are central to social work. Underpinned by theories of social work, social sciences, humanities and indigenous knowledge, social work engages people and structures to address life challenges and enhance wellbeing. The above definition may be amplified at national and/or regional levels.”

-Global Definition of the Social Work Profession-

## SCOPE OF SOCIAL WORK

The concern of social work's is to help people who are in need so that they develop the capacity *to* deal with their problems by themselves. It is both science and an art. Social is work is science in the sense that the knowledge taken from different disciplines forms the body of knowledge for a social worker and he/she uses this theoretical base for helping people i.e., for practice. What theory postulates has to be put into practice. The required capacity to do it is known as skill. Hence, professional social work with selected knowledge and the set of social work values, has to be transformed into a professional service.

A social worker has to establish a positive relationship with the clients. She should know how to interview and write reports. He/she should be able to diagnose i.e., find out the cause for the problem and finally he/she should work out a treatment plan. An Assessment of the problem, planning for its solution, implementing the plan and evaluating the outcome are the four major steps involved in social work.
