reflected in educational change This collection first examines critical analyses of education in capitalist societies both industrialized and peripheral and explores the utility of those perspectives in the political and educational conditions of the countries under study Together these essays offer the first systematic explanation of how and why education in socialist countries undergoing rapid change differs from education in developing capitalist countries Contributions to the study were made by Mary Ann Burris Anton Johnston and Carlos Alberto Torres Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
