Society A Macroscopic View:

Society, a Macroscopic View Maurice N. Richter, 1980 Core Sociological Dichotomies Chris Jenks, 1998-08-24 In this sociology text the contributors provide an introduction to the subject without over simplifying or writing down to their audience The book aims to furnish undergraduates with the knowledge that will help them to understand and practice sociology and also to develop a self perpetuating sociological imagination to enable them to think through new issues and new problems It consists of a series of specially commissioned chapters around binary or dichotomous themes Although many sociologists are critical of dichotomous models of sociological theory and research the device crops up again and again in the history and practice of the subject Jenks and his colleagues use the dichotomies to situate students in current *Society as an Interaction Space* Hanna Lehtimäki, Petri Uusikylä, Anssi Smedlund, 2020-02-29 As digitalization and social media are increasingly blurring the boundaries between traditional societal political and economic institutions this book provides a cross disciplinary examination of value co creation From various standpoints it examines how institutions contribute to service ecosystems and how digitalization is transforming value co creation in these ecosystems Further the book shares new perspectives on relational dynamics among government companies and citizens These insights fill the gaps between service science and political science by integrating institutional logics into the concept of value co creation The book subsequently examines society as an interaction space Topics discussed include the new logic and transformation mechanisms of economic activities citizen participation governance and policy making in the face of technological innovations market based reforms and the risk of disconnect between citizens and policy making Here the focus is on value co creation in complex adaptive systems where institutions individuals and businesses negotiate value and interests in networked relations In closing the book presents a range of empirical case studies on value co creation which provide examples of active networked citizenship innovative governance and policy making democratic leadership and trust building dialogue among institutions The studies address the context of Nordic countries recognized as world leading democracies Pursuing a systems approach the book articulates a social reality composed of interacting and interconnected elements that cannot be captured with only micro or macro levels of analysis Service ecosystems are considered as configurations of people and technologies embedded in institutionalized rules cultural meanings and practices offering valuable insights into the service centered view of markets and society Given the breadth and depth of its coverage the book offers a valuable resource for all students and scholars interested in understanding and envisioning the future democratic landscape **Technology and Social Complexity** Maurice N. Richter, 1983-06-30 Technology and Social Complexity explores the continuities between today's incredibly powerful new technology and the simpler technologies of the past It shows that the diverse phenomena encompassed by the term technology can be analyzed coherently within the framework of the same concept This book provides a broad historical and comparative perspective within which the complex relationships between technology and society can be more clearly

understood Topics discussed include the concept of technology social evolution and other forms of social change characteristics of technology in societies of different types and the sources directions and implications of technological progress Zionism Nathan Rotenstreich,2012-02-01 In Zionism the late Nathan Rotenstreich traces the dialectical connections between Zionism s past and present based on his contention that the Jewish nation comprises both the State of Israel and the Diaspora He also addresses relations between both Israel and the Diaspora on the one hand and Israel and the Arab world on the other Written a short time before Rotenstreich s death Zionism can be regarded as his spiritual and ideological legacy **Technology, Values, and Society** Mitra Das, Shirley Kolack,2008 Technology is not value free nor does it exist in a vacuum It needs a social basis technology is affected by society and influences it Technology Values and Society illustrates this using an examination of cross cultural case studies representing simple intermediate and complex societies Certain forms of technology exist when conducive values and structures sustain them However this relationship is not one way Technological changes do precipitate social and value changes It is impossible to sustain egalitarian values in a society involving technology based on hierarchical relationships Understanding this connection is vital if we are to keep some control over the way in which technology affects us This revised edition brings the topic to life for both faculty and students

New Directions in Theory and Methodology in Socialsciences Baidya Nath Varma,1993 The Epochal Nature of Process in Whitehead's Metaphysics F. Bradford Wallack,1980-01-01 While my book attempts to reflect the full range of scholarly debate I have also attempted to make it useful to anyone interested in Whitehead To this end I have introduced the Whiteheadian terms one by one explaining each in the light of my interpretation and I have used examples wherever possible I try to show that Whitehead intended his philosophy have a place in our lives by reshaping our common conceptions and that he did not intend it to be relegated to purely abstract or esoteric application F Bradford Wallack The twentieth century has seen the greatest innovations in philosophical cosmology since Newton and Descartes and Alfred North Whitehead was the first and greatest of the philosophers to work out these innovations in systematic ways In a book that will be controversial in the philosophical community F Bradford Wallack argues that interpretations widely accepted by Whiteheadians need revaluation because these interpretations are based on materialist and substantialist assumptions that Whitehead sought to replace Specifically she proposes a thorough revision of accepted interpretations of Whitehead s concept of the actual entity Wallack then elucidates Whitehead s ideas in order of their increasing dependence upon other basic Whiteheadian terms to complete the study of Whiteheadian time and to clarify its purpose within the cosmology of Process and Reality Whitehead s philosophy then emerges as more intelligible and cohesive than is generally believed *Classical Sociological Theory* George Ritzer,Jeffrey Stepnisky,MR Jeffrey N Stepnisky,2020-03-27 The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award enabling graduate students and early career faculty to attend the annual ASA pre conference teaching and learning workshop Classical Sociological Theory Eighth Edition provides a comprehensive overview

of the major theorists and schools of sociological thought from the Enlightenment roots of theory through the early 20th century The integration of key theories with biographical sketches of theorists and the requisite historical and intellectual context helps students to better understand the original works of classical authors as well as to compare and contrast classical theories

The Micro-macro Link Jeffrey C. Alexander,1987-01-01 The work of fifteen nationally and internationally known theorists in sociology this volume demonstrates an exciting new trend in sociological thinking Each essay proposes a link between the two distinguishable traditions of sociological theory the microscopic which stresses the self and the interaction among persons and the macroscopic which concentrates on the institutional cultural and societal levels Each mode of analysis has had its champions and the proponents of each have often taken positions of polemic opposition to one another

Communication in Japan and the United States William B. Gudykunst,1993-01-01 This book is the first to provide a summary of the state of knowledge about communication in Japan and the United States Included is an overview of the major approaches used in the study of communication in these two countries an overview of the major cultural factors influencing communication a description of the sociolinguistic differences between English and Japanese an examination of Japanese American communication as a function of the cultural values learned from the two cultures and a summary of research comparing interpersonal research in Japan and the United States as well as research on intercultural communication between Japanese and North Americans The book also examines communication in organizational contexts in Japan and the United States and describes differences in mass communication between the two cultures

Population Dynamics and Livelihood Changes of Small-Scale Societies in Laos Satoshi Yokoyama,Takahito Niwa,Hongwei Jiang,2025-05-06 This book examines various trends in small scale societies in Laos by linking population changes to livelihood changes The primary research issues addressed in the book are as follows How are population dynamics and livelihood changes in small scale societies interrelated What are the current demographic trends in rural areas of Laos How are the livelihoods of small scale societies maintained How is the rapid population growth common in developing countries managed In order to investigate these issues in developing countries where statistical data are not well developed it was necessary to collect information through detailed and distinctive fieldwork To this end a multidisciplinary study of geography cultural anthropology human ecology and demography was conducted in three villages in Laos and compiled as an ethnography The study included a four generation retrospective survey of population and land use change a two year survey of food dairies and a survey of the spatiotemporal distribution of residents daily activities using GIS and GPS etc The book provides valuable information on the slowdown in the rate of population growth in contemporary rural Laos Livelihoods family planning and population migration are explored in the context of the decreasing population growth rate In addition the book describes the process of adopting modern contraceptive methods in rural areas as well as the Lao government s reproductive policies and villagers responses to them It also illustrates rural rural and rural urban population migration

influenced by the government's resettlement policies which encourages people to move from the highlands to the lowlands

Understanding Peace Michael Allen Fox, 2013-11-12 Understanding Peace A Comprehensive Introduction fills the need for an original contemporary examination of peace that is challenging, informative and empowering. This well researched, fully documented and highly accessible textbook moves beyond fixation on war to highlight the human capacity for nonviolent cooperation in everyday life and in conflict situations. After deconstructing numerous ideas about war and explaining its heavy costs to humans, animals and the environment, discussion turns to evidence for the existence of peaceful societies. Further topics include the role of nonviolence in history, the nature of violence and aggression, and the theory and practice of nonviolence. The book offers two new moral arguments against war and concludes by defining peace carefully from different angles and then describing conditions for creating a culture of peace. Understanding Peace brings a fresh philosophical perspective to discussions of peace and also addresses down to earth issues about effecting constructive change in a complex world. The particular strength of Understanding Peace lies in its commitment to reflecting on and integrating material from many fields of knowledge. This approach will appeal to a diverse audience of students and scholars in peace studies, philosophy and the social sciences as well as to general interest readers.

Social Stratification in Contemporary China Li Qiang, 2016-03-31 Social Stratification in Contemporary China raises and debates major sociological issues of modern and present day China from a historical perspective. Such topics as equality and

inequality and acceptability of defined inequality have been dealt with in a broad historical context since 1949 when the People's Republic was founded. The work is widely accepted as one of the most important studies trying to clarify the difficult perceptions of policy of reform and opening up that was formulated and implemented in the early 1980s in China. Professor Li Qiang is one of the leading sociologists in China.

Thinking in Complexity Klaus Mainzer, 2007-09-10 This new edition also treats smart materials and artificial life. A new chapter on information and computational dynamics takes up many recent discussions in the community.

Economics and Sustainability Karl Bruckmeier, 2020-11-21 This textbook provides an overview of economic perspectives on sustainability. It synthesises economic, ecological and interdisciplinary sustainability research and by applying an integrated social, ecological and economic framework demonstrates how this research can be improved and implemented in practice. Split into three parts, the book begins by introducing a range of topics forming the basis of knowledge needed to understand the varying sustainability discourses in economics, ecology and interdisciplinary sustainability research. Chapters cover the political context of sustainability, the history of sustainability in European environmental discourses dating back to the seventeenth century as well as various problems and forms of interdisciplinary knowledge integration and synthesis in the sustainability process. Part II reviews the core economic themes relevant to sustainable development including natural resource management, environmental economics and ecological economics. Also highlighted are often neglected issues such as conflicts, disasters and interrelated crises on the way towards sustainability. The chapters in Part III discuss the future of the sustainability process. They argue for the necessity of overhauling the relationship between science and practice, explore failures and the unforeseen difficulties of sustainability transformation and discuss how to enable a long-term sustainability process that reaches into the distant future. An innovative resource for a broad range of interdisciplinary programmes on sustainability. The book will be an invaluable reference for master and PhD students, instructors, researchers and practitioners in sustainability governance.

Routledge Library Editions: Political Geography Various, 2021-06-23 From votes to strikes to street violence, politics is intrinsically geographical. Many of the books in this set, originally published between 1964 and 1990, illustrate that the social contexts provided by localities are crucial in defining distinctive political identities and subsequent political activities.

Brahmanic Ritual Traditions in the Crucible of Time Baidyanath Saraswati, 1977 An anthropological and historical examination of Brahmanic rituals with special focus on marriages and rites. At 4.32% of the population, a 1931 figure, Brahmans constitute the largest ethnic group in India.
