abstraction which asserts that context institutions and globalization all count and that the public private discourse has changed The book attempts to specifically show how these abstractions matter in recent social policy practice and research Martin Rein Massachusetts Institute of Technology US The current context of social policy is one in which many of the old certainties of the past have been eroded The predominantly inward looking domestic preoccupation of social policy has made way for a more integrated international and outward approach to analysis which looks beyond the boundaries of the state It is in this context that this Handbook brings together the work of key commentators in the field of comparative analysis in order to provide comprehensive coverage of contemporary debates and issues in cross national social policy research Organized around five themes this impressive volume explores the contextual conceptual analytical and processual aspects of undertaking comparative social research In the first part the authors are concerned with de centring the state and extending the epistemological framework through which cross national analysis is explored In Parts II and III the focus is on the conceptual and theoretical frameworks for analysing social policy cross nationally while Part IV examines the day to day reality of preparing for and carrying out cross national analysis In the final section the authors highlight continuing and emerging themes and issues which are of particular relevance to understanding the contemporary social world International in scope this authoritative Handbook presents original cutting edge research from leading specialists and will become an indispensable source of reference for anyone interested in comparative social research It will also prove a valuable study aid for undergraduate and postgraduate students from a range of disciplines including social policy sociology politics urban studies and public policy
