Veteran United States. Congress. Senate. Committee on Veterans' Affairs,1973 The Vietnam Era veteran has often been the center of a storm of controversy and many of the articles herein reflect this The source material is intended to present a representative spectrum of views concerning these veterans a collection of diverse viewpoints which will stimulate those who read it to learn more about our newest generation of veterans and perhaps to arrive at their own conclusions Preface

Drug Policy and Human Nature W.K. Bickel,R.J. DeGrandpre,2013-11-11 The formation of drug policy is a complex phenomena influenced by a multi tude of sources Among others these influences include historical factors contemporary public opinion regarding the nature and magnitude of drug use and abuse the portrayal of illicit drugs and drug use in the media and lobbying efforts by special interest groups e g The Drug Policy Foundation including government agencies e g the Justice Department and law enforcement An additional source of influence are the activities of specialists directly engaged in studying drug use and treating drug dependence This includes individuals involved in drug treatment anthropological and cultural studies policy analy ses basic psychological and pharmacological research research on the epide miology of drug use and dependence and research on prevention This influ ence by specialists might be usefully distinguished from those influences first mentioned for two reasons First studies of drug use and dependence attempt to uncover empirical generalizations about drugs and second because these findings are empirical there is a hope that they guide at least to some extent the actions of other forces that more directly determine drug policy Psychology as an empirical discipline has long been interested in the use of psychoactive drugs At the level of basic science in psychopharmacology a most important contribution has been the demonstration that drugs of abuse function as reinforcers and thus enter into the same psychological processes as do other appetitive stimuli **Library Book Catalog** United States. Recent Developments in Alcoholism Marc Galanter,2013-11-21 From the President of the American Society of Addiction Medicine Recent Developments in Alcoholism Volume 10 is a major contribution to the literature of addiction medicine This volume ru cohool and Cocaine Similarities and Differences contains an impressive collection of chapters from the basic research epidemiological and clinical research perspectives as well as articles that address the relative policy issues and clinical application and patient care concerns It also sends a message to those who would still distinguish between alcohol and drugs or legal and illegal drugs In the research laboratory in the intentions and behavior of the user and by the clinician such distinctions have never been upheld The first section Clinical Pathology includes chapters on the role of alcohol

in cocaine dependence dual diagnosis empirical and developmental humanistic approaches and on neuroendocrine and catecholamine levels in humans during administration and withdrawal of cocaine and alcohol emergency room evaluation of cocaine associated neuropsychiatric disorders and clinical and pharmacological interactions of alcohol and cocaine These chapters written by authors who are preeminent in their fields offer a broad perspective to both the researcher and the clinician on relevant issues in clinical pathology Library Book Catalog United States. Committee on the Judiciary,1970 **What Do Drugs Do?** ,1971 A national assessment of serious juvenile crime and the juvenile justice system Charles P. Smith,Paul S. Alexander,1980 **Addiction** Gene M. Heyman,2010-10-15 In a book sure to inspire controversy Gene Heyman argues that conventional wisdom about addiction that it is a disease a compulsion beyond conscious control is wrong Drawing on psychiatric epidemiology addicts autobiographies treatment studies and advances in behavioral economics Heyman makes a powerful case that addiction is voluntary He shows that drug use like all choices is influenced by preferences and goals But just as there are successful dieters there are successful ex addicts In fact addiction is the psychiatric disorder with the highest rate of recovery But what ends an addiction At the heart of Heyman s analysis is a startling view of choice and motivation that applies to all choices not just the choice to use drugs The conditions that promote quitting a drug addiction include new information cultural values and of course the costs and benefits of further drug use Most of us avoid becoming drug dependent not because we are especially rational but because we loathe the idea of being an addict Heyman s analysis of well established but frequently ignored research leads to unexpected insights into how we make choices from obesity to McMansionization all rooted in our deep seated tendency to consume too much of whatever we like best As wealth increases and technology advances the dilemma posed by addictive drugs spreads to new products However this remarkable and radical book points to a solution If drug addicts typically beat addiction then non addicts can learn to control their natural tendency to take too much
