Sociologists at work. essays on the craft of social research ed. by h Phillip E. Hammond, 1964 **Sociologists at Work. Essays on the Craft of Social Research. [By Various Authors.] Edited by P.E. Hammond** Phillip Everett HAMMOND, 1964 *The Craft of Sociology* Pierre Bourdieu, Jean-Claude Chamboredon, Jean-Claude Passeron, 1991

The work of the French sociologist Pierre Bourdieu has emerged over the last two decades as one of the most substantial and innovative bodies of theory and research in contemporary social science. *The Craft of Sociology* both a textbook and an original contribution to epistemology in social science focuses on a basic problem of sociological research: the necessity of an epistemological break with the preconstructed objects. Social practice offers to the researcher Pierre Bourdieu and his co-authors argue in the epistemological tradition of scholars like Bachelard, Canguilhem, Koyré, a tradition that identifies the construction of the object as being the fundamental scientific act. Their way of discussing the issue makes it accessible not only to academics and experts of epistemology but also to advanced students of social science. Using for illustration a wide range of texts from the various social sciences as well as from philosophy of science, the book includes an interview with Pierre Bourdieu and an introduction by the editor to his sociological methodology.

[Sociologists At Work: Essays on the Craft of Social Research](#) By Robert N. Bellah, Phillip E. Hammond (Ed), Robert Neelly Bellah, 1964 **Sociologists at Work** Robert Neelly Bellah, 1967 **Doing Research in Organizations (RLE: Organizations)** Alan Bryman, 2013-05-02

This textbook provides first hand inside accounts of the process of doing research in organizations. It is intended both for students of research methods in sociology and social psychology and for students of organization studies, organizational behaviour and management. [The Americanization of Social Science](#) David Haney, 2008-01-28

A highly readable introduction to and overview of the postwar social sciences in the United States. *The Americanization of Social Science* explores a critical period in the evolution of American sociology's professional identity from the late 1940s through the early 1960s. David Paul Haney contends that during this time leading sociologists encouraged a professional secession from public engagement in the name of establishing the discipline's scientific integrity. According to Haney, influential practitioners encouraged a willful withdrawal from public sociology by separating their professional work from public life. He argues that this separation diminished sociologists' capacity for conveying their findings to wider publics, especially given their ambivalence towards the mass media, as witnessed by the professional estrangement that scholars like David Riesman and C. Wright Mills experienced as their writing found receptive lay audiences. He argues further that this sense of professional insularity has inhibited sociology's participation in the national discussion about social issues to the present day.

Confronting American Labor Jeffrey W. Coker, 2002 *Confronting American Labor* traces the development of the American left from the Depression era through the Cold War by examining four representative intellectuals who grappled with the difficult question of labor's role in society Since the time of Marx leftists have raised over and over the question of how an intelligentsia might participate in a movement carried out by the working class Their modus operandi was to champion those who suffered injustice at the hands of the powerful From the late nineteenth through much of the twentieth century this meant a focus on the industrial worker The Great Depression was a time of remarkable consensus among leftist intellectuals who often interpreted worker militancy as the harbinger of impending radical change While most Americans waited out the crisis listening to the assurances of President Franklin D Roosevelt the Marxian left was convinced that the crisis was systemic Intellectuals who came of age during the Depression developed the view that the labor movement in America was to be the organizing base for a proletariat Moreover many came from working class backgrounds that contributed to their support of labor
