The Political Economy of Global Communication Peter Wilkin,2001-09-20 Recent debates surrounding human security have focused on the satisfaction of human needs as the vital goal for global development Peter Wilkin highlights the limitations of this view and argues that unless we incorporate an account of human autonomy into human security then the concept is flawed He reveals how human security is a concern with social relations that connect people in local national and global networks of power structured through capitalism and hierarchical inter state systems Autonomy as an aspect of human security depends upon the ability of citizens to gain information about the processes that shape their lives In this respect autonomy and communication are inherently linked and are prerequisites for the establishment of meaningful democratic systems

visibility of discourses emanating from outside the Euro Atlantic zone The ideas and arguments advanced here privilege a reading of geopolitical processes and examples from the perspective of the global South Written by a leading scholar of global communication this comprehensive and transdisciplinary study adopts a holistic approach and will be of interest to the global community of scholars researchers and commentators in communication and international relations among other fields
