Sipri Yearbook 1979 World Armaments And Disarmament:

The Evolution of Biological Disarmament Nicholas Roger Alan Sims, 2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia's admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective SIPRI yearbook 1979, 1979 The Year Book Of World Affairs, 1981 George W. Keeton, Georg Schwarzenberger, 2019-08-22 First published in 1981 The Council of the London Institute of World Affairs has carefully reconsidered the lessons to be drawn from the Institute's record in its first half century and reshaped its plans of activities for the 1980s As in an earlier cold peace era the Council is united in its resolve not to be taken by surprise by any of the contingencies that on a darkening world scene must be anticipated in medium range planning World Armaments and Disarmament, 1979 **The Structure of the Defense Industry** Nicole Ball, Milton Leitenberg, 2021-05-30 Proponents of arms control and disarmament are often confronted with the argument that reductions in defense expenditure lead to cutbacks in military industries and thus to economic hardship While a reduction in defense production would cause some economic dislocation this would be mitigated by the ability of the economy to adapt to changing patterns of production This book first published in 1983 assesses the likely effects of reductions in defense industries by an examination of the roles these industries play in national economies Each chapter discusses industry employment output research and development capital value profitability concentration and competition internal organization and regional employment concentration Other questions considered include the economic importance of weapons exports the defense industry as a leading edge in maintaining national technological capabilities and the reliance of individual firms on defense contracting **Protest and Survive** E. P. P. Thompson, 1981 Helps us to better understand the dangers of U S nuclear strategy and reminds us that it is a strategy we can resist *Deadly Metal Rain: The Legality of Flechette Weapons in International Law* Eitan Barak, 2011-10-28 Relying on often unique sources this book offers the only in depth study on flechette weapons yet conducted Its comprehensive exploration of the legal versus illegal implications of conventional weapons use make it an invaluable resource for weaponry policy analysts *Multinational Corporations And The Third World* C.J. Dixon, 2019-03-06 This book an outcome of the conference in 1983 held at the University of Birmingham examines

the varied roles played by multinational corporations in the economies of the Third World countries and concentrates more closely on regional national sectoral or corporate levels *The Economics of Military Expenditures* Christian Schmidt,1987-07-07 *Milton Leitenberg: Pioneering Work on Weapons of Mass Destruction, Wars and Arms Control* Kathleen Margaret Vogel,Nicole Janice Ball,Milton Leitenberg,2025-09-26 This book is a collection of 44 representative publications and papers by Milton Leitenberg It allows publications that appeared in journals and books as well as unpublished work prepared for national and international organizations to appear in one place This makes them accessible to researchers for years and decades to come These studies made substantial contributions to the area of arms control particularly on the subjects of nuclear weapons wars and conflicts Soviet military studies biological weapons and other related international security areas all of which are of continued interest to security studies and political science audiences The primary audience is academics and practitioners in the arms control security studies and peace research fields The book is useful for graduate studies in arms control and peace research There is no similar book to this collection **Buying Security** Ann Tibbitts Schulz,2019-04-08 This book looks at trends in military expenditures in Iran during approximately the three decades preceding the Islamic revolution of 1979 and their impact on economic growth and development It focuses on military security policy which establishes guidelines for military spending decisions *SIPRI World Armaments and Disarmaments* Stockholm International Peace Research Institute,1979 *Parameters* ,1980 Verification of Dual-use Chemicals Under the Chemical Weapons Convention Stockholm International Peace Research Institute,1991 In negotiations on the Chemical Weapons Convention delegates have addressed the question of how to verify compliance with those provisions which relate to the production and non production of relevant chemicals In order to facilitate the work of the negotiators the Pugwash movement and SIPRI gave a group of fourteen scientific and other experts on the negotiations the task of analysing how the current Convention provisions would be applied to a specific chemical thiodiglycol This chemical can be used as a precursor to the chemical warfare agent mustard gas In eleven chapters and an annexe the authors present their individual findings illustrated with tables and figures The steering committee of the project have provided summaries in introductory and concluding chapters The particular problems of monitoring thiodiglycol production outlined may serve as a model for monitoring other chemicals which will be covered by the future Chemical Weapons Convention *Militarization and Arms Production* Helena Tuomi,Raimo Väyrynen,2021-05-30 This book first published in 1983 contains articles written as a result of the UN 1978 81 study on the relationship between disarmament and development They analyse the disruptive retarding and weakening effects of large scale military preparations on the economic and social fabric of societies around the world They discuss the benefits of disarmament and how resources could be converted into constructive civilian uses and national development particularly in developing countries Seapower in the Nuclear Age Joel J. Sokolsky,2021-01-26 This book first published in 1991 provides a major analysis of the prelude to the US s Cold War maritime strategy showing how

NATO's maritime forces were organised in the period. It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance's nuclear and conventional deterrent forces. It looks at the structure of the main naval commands, the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO's naval posture in the 1970s. Drawing upon many declassified documents, this account fills an important gap in postwar literature on American seapower and its relation to European security. It also addresses important aspects of NATO strategy and organisation.

South Africa and Nuclear Proliferation J.D.L. Moore, 1987-06-18

The U.S. Intelligence Community Jeffrey T. Richelson, 2018-05-04

The role of intelligence in US government operations has changed dramatically and is now more critical than ever to domestic security and foreign policy. This authoritative and highly researched book written by Jeffrey T. Richelson provides a detailed overview of America's vast intelligence empire from its organizations and operations to its management structure. Drawing from a multitude of sources including hundreds of official documents, The US Intelligence Community allows students to understand the full scope of intelligence organizations and activities and gives valuable support to policymakers and military operations. The seventh edition has been fully revised to include a new chapter on the major issues confronting the intelligence community including secrecy and leaks, domestic spying and congressional oversight as well as revamped chapters on signals intelligence and cyber collection, geospatial intelligence and open sources. The inclusion of more maps, tables and photos as well as electronic briefing books on the book's Web site makes The US Intelligence Community an even more valuable and engaging resource for students.

Ethics and Nuclear Deterrence Geoffrey Goodwin, 2020-11-19

As nuclear weapons become ever more sophisticated, so the deterrence debate becomes increasingly complex. The Ban the Bomb slogans of the 1950s had been replaced by cries for nuclear free zones and talk of megatonnage and fallout had given way to talk of tactical nuclear weapons and limited strike capability. Originally published in 1982, this book considers the ethical issues raised by nuclear policies and by the debate between proponents of the multilateralist/unilateralist approaches to disarmament and arms control at the time. It is not like so many books on the subject: an ideological statement; there are essays by defence strategists which put the case for deterrence and essays by academics and churchmen which strenuously oppose it. The book also includes an essay on attempts to mitigate the appalling brutality of the many conventional wars since 1945. At a time when the rhetoric and misinformation produced on both sides of the debate continued to obscure many vital issues, this book was welcome, sensible and necessary.

Uranium Enrichment and Nuclear Weapon Proliferation Allan S. Krass, Peter Boskma, Boelie Elzen, Wim A. Smit, Stockholm International Peace Research Institute, 2020-11-20

Originally published in 1983, this book presents both the technical and political information necessary to evaluate the emerging threat to world security posed by recent advances in uranium enrichment technology. Uranium enrichment has played a relatively quiet but important role in the history of efforts by a number of nations to acquire nuclear weapons and by a number of others to prevent the proliferation of nuclear weapons. For many years, the

uranium enrichment industry was dominated by a single method gaseous diffusion which was technically complex extremely capital intensive and highly inefficient in its use of energy As long as this remained true only the richest and most technically advanced nations could afford to pursue the enrichment route to weapon acquisition But during the 1970s this situation changed dramatically Several new and far more accessible enrichment techniques were developed stimulated largely by the anticipation of a rapidly growing demand for enrichment services by the world wide nuclear power industry This proliferation of new techniques coupled with the subsequent contraction of the commercial market for enriched uranium has created a situation in which uranium enrichment technology might well become the most important contributor to further nuclear weapon proliferation Some of the issues addressed in this book are A technical analysis of the most important enrichment techniques in a form that is relevant to analysis of proliferation risks A detailed projection of the world demand for uranium enrichment services A summary and critique of present institutional non proliferation arrangements in the world enrichment industry and An identification of the states most likely to pursue the enrichment route to acquisition of nuclear weapons
