WORLD ARMAMENTS AND DISARMAMENT

Sipri Yearbook 1988 World Armaments And Disarmament

Yan Bai

Sipri Yearbook 1988 World Armaments And Disarmament:

SIPRI Yearbook 1988 Stockholm International Peace Research Institute, 1988 This annual report continues and updates SIPRI's charting of the latest developments in nuclear weapons nuclear explosions world military expenditure the international arms trade chemical and biological weapons conventional weapon technology the military use of outer space and current armed conflicts of the world The Yearbook also describes efforts to control the arms race and analyzes the status of negotiations and agreements A special section reviews the INF treaty signed in December 1987 by the United States and the Soviet Union the ABM Treaty the Iran Iraq war and disarmament and development The Evolution of Biological Disarmament Nicholas Roger Alan Sims, 2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia's admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective The Role and Control of Weapons in the 1990s Frank Barnaby, 2021-05-30 This book first published in 1992 examines defence issues as the twentieth century drew to a close With the end of the Cold War many of the threats to European security such as the threat of nuclear war disappeared New ones however were emerging The rise of nationalism the spread of weapons of mass destruction to politically unstable countries the increase in world population the debt crisis all these contributed to security problems that needed to be resolved The book assesses the possibilities for future European defence and the role that the United States would play in it will it be prepared to stay in Europe under European leadership or must it dominate It also considers the capabilities offered by new military technology and the need for control of weapons of mass destruction **The Weapons State** David Mutimer, 2000 The proliferation of all kinds of weapons is a focal point for international security This work shows how both the language used to talk about weapons proliferation and the practices adopted to respond to it serve to define the problem in ways that promote policy responses doomed to failure **Striving for Military Stability in Europe** Jane M. O. Sharp, 2010-04-05 First Published in 2004 This new book traces the changing relationship between Russia and NATO through the prism of conventional arms control and focuses on the negotiation implementation and adaptation of the Conventional Armed Forces in Europe CFE Treaty It shows that arms control agreements reflect rather than affect relations between parties The CFE Treaty codified

parity between NATO and the Soviet led Warsaw Treaty Organization WTO in November 1990 reflecting the status quo at the end of the cold war The benefits were short lived for Russia however Although still widely viewed in the West as the cornerstone of security and stability in post cold war Europe from the Russian perspective the treaty was soon overtaken by events With the collapse of the WTO and the Soviet Union in 1991 it became impossible to talk of a military balance between east and west in Europe especially as all the former WTO states opted for membership in NATO This study details how the other state parties worked hard to adjust and adapt the treaty to meet Russian concerns about its new weakness relative to NATO and the issues that complicated Russian acceptance of CFE limits This book will be of great interest to all students of Russia NATO European politics international relations and strategic studies in general *Arms Export Regulations* Ian Anthony,1991 Governments have a legal obligation to ensure effective control over arms exports and to monitor and supervise the movement of arms to ensure that they do not fall into unauthorized hands The purpose of this book is to provide a detailed picture of how governments discharge this responsibility Individual chapters describe national efforts to control arms transfers concentrating on the legal framework that exists to regulate arms exports The book includes a discussion of existing multilateral arms transfer control regimes including the United Nations the Co ordinating Committee for East West Trade Policy CoCom the Missile Technology Control Regime MTCR and arms embargoes agreed by the Council of Ministers of the European Community Every effort has been made to produce a comprehensive compendium but total success has been prevented by the continued failure of some governments to release adequate information into the public domain **The Burdensharing Debate** Simon Duke,1993-06-18 Examines critically the history and assumptions behind the divisive question of allied contributions to the common defence It looks at the methodology of the burdensharing debate and focuses on political economic and military ramifications of the debate *Meeting Gorbachev's Challenge* Jonathan Dean,1990-01-01 An assessment of the prospects for building down the NATO Warsaw Pact military confrontation in Europe by negotiated and unilateral measures The book also gives a far sighted view of an organization of defence in Europe that will be set up to replace the existing security organizations **Limiting the Proliferation of Weapons** Jean-François Rioux,1992-11-15 An international team of arms control experts addresses important questions raised by the use of export sales restrictions in controlling the spread of weapons In non technical language they examine vital issues relating to ballistic missiles as well as to nuclear chemical biological and conventional weapons **Security Without Nuclear Weapons?** Stockholm International Peace Research Institute,1992 This book examines the question Is the elimination of nuclear weapons feasible Individual chapters address the major conceptual technical and economic issues in the design of a non nuclear security regime Other chapters explore more specialized issues as they relate to the feasibility of the elimination of nuclear weapons elite perceptions and the decision making process verification nuclear proliferation fissile materials and warheads alliance and regional hegemonies and deterrence **Disarming Military Industries** Peter

Southwood,1991-06-18 The author notes in the preface that an opportunity for significant cuts in nuclear and conventional forces by major global powers has appeared Presenting the evidence that the West can cope successfully with disarmament he identifies policies which need to be adopted for that end **Building Global Security Through Cooperation** Joseph Rotblat,John P. Holdren,2012-12-06 1989 was by any standards an extraordinary year the year in which the Cold War ended However although much has changed much remains unresolved or not changed at all Even though the rationale for the huge military forces has been removed from the East West relationship these forces still retain a tremendous potential to do harm Moreover threats to peace may grow along North South and South South axes An example of such a threat is the rapid growth in size and sophistication of military arsenals in the South The contributions to this volume make it clear that the problems of East and West North and South are inter twined Security can be gained only through cooperation The contributors who come from widely differing geographical cultural and political backgrounds all share the Pugwash tradition of scientific objectivity **European Security** Bjørn Møller,2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it World armaments and disarmament; Sipri yearbook 1988 ,1988 **Arms Transfers and Dependence** Christian Catrina,2021-10-23 First published in 1988 Arms Transfers and Dependence was written to provide a view of arms transfers in the context of the global distribution of power The book analyses different types of dependence and is focused on comparing the enhancement of military capabilities as a result of

arms transfers with the dependence that may be caused by those transfers In doing so it provides an overview of how particular structures of imports and exports of arms lead to dependence Biological and Toxin Weapons Erhard Geissler, John Ellis van Courtland Moon, 1999 This interdisciplinary book analyses the origins of biological warfare planning and preparation up to the end of World War II In the period between World War I and World War II growing understanding of the propagation of disease lead to the fear that potential enemies might be developing biological weapons Ultimately several countries developed major biological warfare programmes during World War II The relevance of these programmes to contemporary concerns is addressed The World War II experiences related to biological weapons reinforce the arguments for adoption of a verification protocol to strengthen the 1972 Biological and Toxin Weapons Convention **Global Visions of Olof Palme, Bruno Kreisky and Willy Brandt** B. Vivekanandan, 2016-09-27 This book analyses the global visions of Olof Palme Bruno Kreisky and Willy Brandt European social democratic statesmen who earned international esteem for their contributions to global developments during the second half of the twentieth century Their visions encompassed inter alia international peace and security East West and North South Cooperation and other important domains pertinent to developing countries of Asia Africa and Latin America In this volume the author closely examines the advancements Palme Kreisky and Brandt made and demonstrates how their visions remain valid for shaping the future of mankind **Security and Environment in the Mediterranean** Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century The Socialist Republic of Vietnam and the Law of the Sea Epsey Cooke Farrell, 2021-09-27 The Socialist Republic of Vietnam and the Law of the Sea analyzes Vietnam s policies on the law of the sea in relation to the country s overall foreign policy goals and its position at the center of the South China Sea geostrategic region It examines Vietnam s claims in zones of maritime jurisdiction and its regulation of maritime activities in the context of the 1982 U N Convention on the Law of the Sea and against the backdrop of Vietnam s security interests economic development and regional leadership goals The author explores Vietnam s maritime boundary disputes with its Southeast

Asian neighbors and China and assesses their impact on regional stability This is the first comprehensive study to trace the evolution of Vietnamese policy and participation in law of the sea development from the 1958 First U N Conference on the Law of the Sea to the present The book provides the background essential to an understanding of Vietnam s current maritime relations and of the challenge to incorporate Vietnam into a stable regional order Law of the sea specialists Southeast Asia area specialists and those interested in the development of Vietnam s hydrocarbon and fishery resources will find this a particularly valuable resource *UN Convention on the Law of the Sea and the South China Sea* Shicun Wu, Mark Valencia, Nong Hong, 2016-03-09 Research on The United Nations Convention on the Law of the Sea UNCLOS is a valuable addition to understanding the political situation in the potentially volatile South China Sea region This book covers topics such as baselines historic title and rights due regard and abuse of rights peaceful use of the ocean navigation regimes marine scientific research intelligence gathering the UNCLOS dispute settlement system and regional common heritage In search of varying viewpoints the authors in this book come from multiple countries including the Philippines Australia Ireland Mainland China and Taiwan the United States and Indonesia Singapore UK and Germany Ongoing events such as the recent waves made by China in the East China Sea and increasing tensions between the South East Asian countries over the use of South China Sea make this book especially pertinent
