Strategic Partners Jeanne Wilson, 2015-06-11 Russia's foreign policy experience in the first post Soviet decade was marked by disappointments as well as surprising turns Expectations that Russia would join the Western powers as an equal partner were frustrated while relations with the People's Republic of China warmed considerably Today Russia's relationship with China is an important component of its overall foreign policy orientation as the two states one greatly diminished the other clearly on the rise have found themselves sharing an interest in curbing the power of the United States In analyzing Russia's evolving foreign policy vis a vis China the author takes into account the legacy of Soviet era precedents the simultaneous processes of economic policy change and integration into global economic structures and military relations By shedding light on the role of political realism decision makers and exogenous factors in Russian foreign policy this analysis of an important bilateral relationship contributes to the larger project of understanding international relations and the dynamics of domestic and foreign policy change

The Treaty on Conventional Armed Forces in Europe Mark Wilcox, 2024-03-04 This work examines the CFE Treaty as a factor in Russia's foreign and security policy Moscow showed amazing persistence in their relationship with the cornerstone of European security Their approach to the treaty was a genuine attempt to shape the security environment in Europe and the former USSR The treaty also enabled the dismantling of large conventional forces as they returned from Eastern Europe and transitioned into the armies of the newly independent states of the former USSR The CFE Treaty though proved ineffective at constraining the enlargement of NATO Simultaneously Moscow's foreign and security policy evolved from one that focused on the domestic development of the country to that of a more confident state reasserting itself as a great power Drawing extensively on primary sources and analyses by Russian authors this book employs two historical narratives case studies and a conceptual framework to show that while Moscow remained engaged with the CFE Treaty undesired effects on Russia's national interests gradually accrued at the expense of desired ones leading Vladimir Putin to withdraw Russia from the treaty as an act of decoupling from the collective West This book is relevant to scholars and policymakers who want to understand Russia's approach to arms control as an element of military security

Global Rules James E. Cronin, 2014-10-28 Questions long perceived views of post World War II America and its position in the world especially after Vietnam The author details the challenges the economic transition of the 1970s and 1980s engendered as the US and Great Britain together actively pursued their shared ideal of an international assemblage of market based democratic states

Globalization and Conflict Robert G. Patman, 2006-08-10 This volume highlights the gap between the new security environment and the notion of state centred national security favoured by Washington showing how a Cold War phenomenon known as the national security state in which defence and foreign policy interests essentially converge remains largely intact The conventional wisdom since the suicide attacks of 9 11 is that the world has been transformed and according to President Bush September 11 changed the strategic thinking of the US This book challenges these assumptions Indeed the Bush administration s National Security strategy of 2002 has reinvigorated and even extended the idea of national

security Paradoxically the renewed emphasis on a distinctly state centred approach to security including the War on Terror has unfolded during an era of deepening globalization Drawing on the international expertise of fourteen specialists the book examines four inter related themes the impact of globalization on the concept of security the strategic outlook of the world s only superpower the US the new conflicts that have come to characterize the post Cold War era efforts to regulate the emerging patterns of conflict in the world Globalization and Conflict will be essential reading for students of strategic studies security studies and international relations

Strategic Shortfall Robert G. Patman,2010-02-26 This seminal work argues that the disastrous raid in Mogadishu in 1993 and America s resulting aversion to intervening in failed states led to the Rwanda and Bosnia genocides and to the 9 11 attacks Contrary to conventional wisdom this book argues it was not the 9 11 attacks that transformed the international security environment Instead it was Somali Syndrome an aversion to intervening in failed states that began in the wake of the 1993 U S UN action in Somalia The botched raid precipitated America s strategic retreat from its post Cold War experiment at partnership with the UN in nation building and peace enforcement and engendered U S paralysis in the face of genocide in Rwanda Bosnia and Darfur The ensuing international security vacuum emboldened al Qaeda to emerge and attack America and inaugurated our present era of intrastate conflict mass killings forced relocations and international terrorism As this even handed treatment shows the Somali crisis can be connected to seven key features of the emerging post Cold War world security order These include the fact that failed states are now the main source of world instability and that new wars are driven by racial ethnic and religious identity issues
