**NBS Special Publication ,1968      The Social and Economic Impact of New Technology 1978-84: A Select Bibliography** Leslie Grayson,2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts      *Information Technology and Singapore Society* Eddie C. Y. Kuo,Chee Meng Loh,K. S. Raman,1990 This publication comprises a total of 14 papers representing works from researchers in economics sociology law business studies computer science as well as policy planners and makers Together they sum up the status of IT in Singapore society in the 1980s and serves as a benchmark as Singapore continues its process of informatisation into the 1990s      Understanding and Communicating Social Informatics Rob Kling,Howard Rosenbaum,Steve Sawyer,2005 Here is a sustained investigation into the human contexts of Information and Communication Technologies ICTs covering both research and theory in this emerging field Authors Kling Rosenbaum and Sawyer demonstrate that the design adoption and use of ICTs are deeply connected to people s actions as well as to the environments in which they are used In Chapters One and Two they define Social Informatics and offer a pragmatic overview of the discipline In Chapters Three and Four they articulate its fundamental ideas for specific audiences and present important research findings about the personal social and organizational consequences of ICT design and use Chapter Five covers Social Informatics education Chapter Six discusses ways to communicate Social Informatics to professional and research communities and Chapter Seven provides a summary and look to the future      **Perspectives and Policies on ICT**

**in Society** Jacques Berleur, Chrisanthi Avgerou, 2006-01-20 Governments the media the information technology industry and scientists publicly argue that information and communication technologies ICT will bring about an inevitable transition from industrial to information or knowledge based economies and societies It is assumed that all aspects of our economic and social lives in both the public and private spheres will be radically different from what they are today The World Summit on the Information Society Geneva 2003 Tunis 2005 shows the importance of a worldwide reflection on those topics Perspectives and Policies on ICT in Society explores the ICT policies of different nations and regions such as Africa China Europe and India The authors assess the arguments surrounding the impending new age as well as some of the more sensitive issues of its developments This progress will signal an expansion of ICT in many domains the so called ubiquity such as in the workplace the home government and education and it will affect privacy and professional ethics The expansion will also encompass all parts of the earth particularly developing countries Such growth must take place in the context of historical dimensions and should underscore the accountability of professionals in the field The intent of this book is to address these issues and to serve as a handbook of IFIP s TC9 Computers and Society committee Thirty authors from twelve countries consider the ICT policies with their associated perspectives and they explore what may be the information age and the digital society of tomorrow The book provides reflection on today s complex society and addresses the uncertain developments rising from an increasingly global and technologically connected world Jacques Berleur is at the University of Namur Belgium and Chrisanthi Avgerou at the London School of Economics United Kingdom *Human Values and the Design of Computer Technology* Batya Friedman, 1997-12-13 Human values including accountability privacy autonomy and respect for person emerge from the computer systems that we build and how we choose to use them Yet important questions on human values and system design have remained largely unexplored If human values are controversial then on what basis do some values override others in the design of for example hardware algorithms and databases Do users interact with computer systems as social actors If so should designers of computer persona and agents seek to build on such human tendencies or check them How have design decisions in hospitals research labs and computer corporations protected or degraded such values This volume brings together leading researchers and system designers who take up these questions and more *InfoWorld* , 1983-08-22 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *The Social Impact of Computers* David Sarnoff, American Bankers Association, National Council of the Churches of Christ in the United States of America. Department on the Church and Economic Life, 1964 The five main areas affected are likely to be Work Leisure Education Health and Politics Page 5 *Computers, Phones, and the Internet* Robert Kraut, Malcolm Brynin, Sara Kiesler, 2006-07-06 During the past decade technology has become more pervasive encroaching more and more on our lives Computers cell phones and the internet have an enormous influence not only on how we function at work but also on how we communicate

and interact outside the office Researchers have been documenting the effect that these types of technology have on individuals families and other social groups Their work addresses questions that relate to how people use computers cell phones and the internet how they integrate their use of new technology into daily routines and how family function social relationships education and socialization are changing as a result This research is being conducted in a number of countries by scientists from a variety of disciplines who publish in very different places The result is that it is difficult for researchers and students to get a current and coherent view of the research literature This book brings together the leading researchers currently investigating the impact of information and communication technology outside of the workplace Its goal is to develop a consolidated view of what we collectively know in this fast changing area to evaluate approaches to data collection and analysis and to identify future directions for research The book will appeal to professionals and students in social psychology human technology interaction sociology and communication
