Morys,2020-12-29 The collapse of communism in Central East and South East Europe CESEE led to great hopes for the

region and for Europe A quarter of a century on the picture is mixed in many CESEE countries the transformation process is incomplete and the economic catch up has taken longer than anticipated The current situation has highlighted the need for a better understanding of the long term political and economic implications of the Central East and South East European historical experience This thematically organised text offers a clear and comprehensive guide to the economic history of CESEE from 1800 to the present day Bringing together authors from both East and West the book also draws on the cutting edge research of a new generation of scholars from the CESEE region Presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and CESEE area studies **Informal**

Economies in Post-Socialist Spaces J. Morris,A. Polese,2015-06-23 Informed by in depth case studies focusing on a wide spectrum of micro and macro post socialist realities this book demonstrates the multi faceted nature of informality and suggests that it is a widely diffused phenomenon used at all levels of a society and by both winners and losers of post socialist transition Handbook of Research on Comparative Economic Development Perspectives on Europe and the MENA Region

Erdoğan, M. Mustafa,Christiansen, Bryan,2016-01-07 The MENA Middle East and North Africa region s economy is experiencing steady growth and is expanding as an active participant in investments with Europe the Americas and Asia Complex deals by transnational corporations TNCs and small and medium sized enterprises SMEs serve to influence European and MENA businesses government technology and society The Handbook of Research on Comparative Economic Development Perspectives on Europe and the MENA Region provides scholarly information about European and MENA economies at a time when these regions are becoming increasingly connected The need to understand their economies has never been more necessary and the research based chapters of this book covering a wide array of information regarding corruption and reform ethics and society and the effects of Western cultures provide scholars business executives practitioners and students with current information on the region s lucrative investments and fast growing economy

Central and South-Eastern Europe 2003 Europa Publications,2002 An in depth survey of the region presenting the latest economic and political developments It includes expert comment on issues of regional importance up to date statistics a directory of institutes and companies and political profiles Social Insurance, Informality, and Labor Markets Markus Frölich,David Kaplan,Carmen Pagés,Jamele Rigolini,David Robalino,2014-12-04 Most countries implement social protection programs to help individuals manage risks such as unemployment disability illness longevity or death In many middle income countries these are often based on a Bismarckian model named after Otto von Bismarck where benefits are financed by contributions levied on salaried employment In countries with a large informal sector however only a fraction of the population is covered by this system and non contributory programs have been added or are planned to increase coverage This can create distortions in the labor market and the book is about policies to expand the coverage of social insurance programs to all workers without reducing incentives to job creation and formal work While few would argue against the need

and social merits of social insurance and social assistance programs there are growing concerns about their unintended consequences on labor markets because of poor design. The programs can distort incentives and individual behaviors in ways that either reduce employment levels and or promote informality ultimately affecting productivity and economic performance. For instance high social security contribution rates can reduce formal employment badly designed unemployment benefits can reduce incentives to keep search and take jobs and fragmented social assistance programs can become a tax on formal labor and encourage informality. The book reviews the evidence regarding the effects of social insurance and social assistance programs on labor market outcomes and discusses options to improve their design and implementation. The book focuses particularly on middle income countries in Latin America and Asia with a large informal sector and suggests ways to reduce these distortions and better manage and finance the subsidies to make coverage universal while creating good jobs. The book compiles expert papers from the joint conferences of the World Bank WB the Institute for the Study of Labor IZA and the Inter American Development Bank IDB on Employment and Development. *Reflections on 1989 in Eastern Europe* Terry Cox, 2013-09-13 This book presents a selection of recent research on the events and developments of 1989 in Eastern Europe. It offers a mix of detailed examinations of the events of 1989 in Eastern Europe thoughtful and considered appraisals of developments and middle range theoretical discussions of patterns of cause and effect. The authors range in their approaches from detailed examinations of government and ruling party papers from the archives some of it originally labelled top secret to personal observations and oral history based on interviews with participants to analysis of survey data and official statistics. In their chosen focus the essays range from explorations of the emerging crisis in the communist regimes that led to the events of 1989 reflections and insights into the events and changing mood during 1989 itself and examinations of some of the consequences and legacies of 1989. This book was published as a special issue of *Europe Asia Studies*.

Record of proceedings, 1992 **Aspects of Independent Romania's Economic History with Particular Reference to Transition for EU Accession** David Turnock, 2016-04-15 After fifteen years of transition in the former communist states of Central and Eastern Europe it has become clear that for a substantial number the objective of reform and restructuring process is a market system in line with membership of the EU. In this study the long term economic transformation of Romania is studied offering a detailed narrative and thematic account of events from the nineteenth to the twenty first centuries. From the first steps towards large scale industrialisation begun prior to the First World War through the accelerated pace set by the communist regime after 1945 and the uncertainty following its subsequent collapse in 1989 the book addresses a wide range of pertinent issues that have shaped Romania's economic development. The study also offers an interpretation of a distinctive phase in the modernisation of post communist Romania supported by economic historical surveys of the preceding century as a context for recent restructuring on the eve of EU accession. This is linked with trends in the region as a whole so that a broad perspective is maintained throughout the book. By highlighting Romania's position as

one of more backward accession states and considering in what ways its experience during transition differs from the more developed states of the region this study offers a valuable insight into both the history of Romania and its future prospects Furthermore it provides a valuable case study that can be compared and contrasted with other countries who are likewise still grappling with the legacy of a centralised economy and in the process of adopting a more market orientated approach in order to gain EU membership As such this study will be of interest not only to historians and economists but anyone with an interest in the expansion of the European Union

Trade Union Strategies in Central and Eastern Europe Dimitrina Dimitrova, Jacques Vilroix, 2005 This publication contains eight essays which explore the changing role of trade unions in ex communist countries during the 15 years of transition from a planned to a market economy It is intended to provide a mechanism to stimulate debate and discussion amongst trade unions in the region as to how they can improve representation of members examine structures and strengthen their influence in public policy It seeks to provide a framework for the process of union strategic planning and also to help guide ILO technical work in this area
