The Developmental Psychology of Planning Sarah L. Friedman, Ellen Kofsky Scholnick, 2014-02-25 Planning is defined as formulating an organized method for action in advance Although people do not plan all the time and planning does not occur in every situation planning skill is central to all human behavior There are developmental differences in planning skill and in

the motivation to plan Even among adults variations in the engagement in the planning process are affected by individual attitudes beliefs and goals Planning also has a different meaning at various junctures in one's life Yet despite the amount of research on planning many of the studies have focused only on the cognitive processes that enable mature individuals to plan A continued exploration of the developmental course of planning this text attempts to situate cognitive aspects of planning in the context of the social and cultural environment and other psychological processes Bringing together the contributions of developmental organizational and social psychologists it explains how when and why we plan Finally it addresses various issues that pertain to the different aspects of planning from formal problem solving to handling the demands of everyday life

Curiosity as an Epistemic Virtue Nenad Mišćević, 2020-11-08 This book explores curiosity from a normative epistemological viewpoint Taking into account recent developments in the psychology of curiosity as well as research on the nature and motivation of scientific inquiry Mišćević identifies curiosity as a positive and vital character trait Key topics covered include Curiosity as a subject in the history of philosophy Curiosity as a possible ethical virtue The importance of curiosity about oneself Whether curiosity is good in itself or only as a means to an end e.g. in the pursuit of truth The book begins with a brief historical overview before turning to the nature of curiosity from both a psychological and philosophical viewpoint Curiosity is revealed as a crucial instrument in the advancement of science and wisdom as well as within the wider picture of meaningful human life Mišćević skilfully defends the idea that curiosity motivates and organises our cognitive abilities playing the central role in our cognitive lives
