**ABSTRACT:** Consumer behavior analysis represents one development within the behavior-analytic tradition of interpreting complex behavior, in which a specific conceptual framework has been proposed (i.e., the Behavioral Perspective Model). According to this model, consumer behavior occurs at the intersection of a consumer-behavior setting and an individual's learning history of consumption and is a function of utilitarian (mediated by the product) and informational (mediated by other persons) consequences. The model has been useful in analyses of consumers' brand choice and reactions to different settings. In the present paper, the model was applied to the interpretation of environmental deleterious behaviors (use of private transportation, consumption of domestic energy, waste disposal, and domestic consumption of water). This application pointed to specific marketing strategies that should be adopted to modify each of these operant classes.

**System Design Modeling and Metamodeling** John P. van Gigch, 2013-06-29 This book is a venture in the worlds of modeling and of metamodeling At this point I will not reveal to readers what constitutes metamodeling Suffice it to say that the pitfalls and shortcomings of modeling can be cured only if we resort to a higher level of inquiry called metainquiry and metadesign We reach this level by the process of abstraction The book contains five chapters from my previous work Applied General Systems Theory Harper and Row London and New York First Edition 1974 Second Edition 1978 More than ten years after its publication this material still appears relevant to the main thrust of system design This book is dedicated to all those who are involved in changing the world for the better In a way we all are involved in system design from the city manager who struggles with the problems of mass transportation or the consolidation of a city and its suburbs to the social worker who tries to provide benefits to the urban poor It includes the engineer who designs the shuttle rockets It involves the politician engaged in drafting a bill to recycle containers or one to prevent pesticide contamination of our food The politician might even need system design to chart his or her own re election campaign

**Environmental Policy Processes Surrounding South Africa's Plastic Bags Regulations: Tensions, Debates and Responses in Waste Product Regulation** Godwell Nhamo, 2008-01-31 This study was conducted in South Africa South Africa is the first country within the Southern African Development Community to have regulated plastic shopping bags waste through the imposition of both a standard on thickness and a levy Given this scenario the Plastic Bags Regulations present an illustrative case for researching complexity uncertainty and controversies surrounding a new trend in environmental policy making namely waste product regulation The thesis focuses on understanding and investigating

tensions debates and responses emerging from the policy process as actors and actor networks put not only the Plastic Bags Regulations into circulation as focal actant token but also other actants and actant networks as well To this end a research question that addressed environmental policies tensions debates and responses that informed the development of South Africa s Plastic Bags Regulations was spelt out The research objectives included the need to 1 analyse selected international environmental policy processes surrounding plastic shopping bags litter and waste regulation and how these influenced developments in South Africa 2 identify actors actants and actor actant networks that shaped and were being transformed by South Africa s Plastic Bags Regulations and explain the tensions debates and responses arising in the policy processes 3 identify environmental policy outputs and assess outcomes emerging from the formulation and implementation of South Africa s Plastic Bags Regulations and 4 establish patterns in environmental policy process reforms around South Africa s Plastic Bags Regulations The language of actors human actants non human and actor actant networks brings to the fore the aspects of processes and relationships that exist around them As such insights from the actor actant network theory AANT were drawn upon to inform the research AANT enquiry framework collapses binaries such as nature society art science structure agency and global local historically associated with a particular type of social theory AANT also denies that purely technical scientific or social relations are possible the notion of quasi objects or token Data sets were generated following the Plastic Bags Regulations as token actant with time frames ranging from prior to during and after the formulation of the regulations Similarly data analysis drew insights from AANT s four moments of translation namely problematisation interessement enrolment and mobilisation with the intervention theory providing an evaluative perspective that complemented AANT The findings were that after the promulgation of the first draft of the Plastic Bags Regulations in May 2000 tensions emerged around the nature of regulation whether command and control preferred by government or self regulation preferred by industry and labour In this regard the latter group raised concerns about jobs income and equipment loss as well as the need to have a holistic approach to waste management rather than targeting a single product at a time whilst the former maintained that this would not be so As such education awareness and stringent antilitter penalties were proposed by industry and labour as sustainable responses to the problem of plastic shopping bags waste rather than regulation These debates continued and resulted in minor amendments to the original regulations as finalised by Government in May 2002 However industry and labour continued lobbying government resulting in the conclusion of the Plastic Bags Agreement in September 2002 and the ultimate repulsion of the May 2002 regulations in May 2003 As revealed by this research these responses led to broader social responses and further tensions as demand for plastic shopping bags went down by about 80% although an estimated 1000 jobs were lost and a number of companies lost equipment and business with some closing down following the implementation of Social Marketing Research for Global Public Health W. Douglas Evans,2016 Like all aspects of society public health practice has been fundamentally changed by the emergence of electronic

and social media as centerpieces of human communication and connection More than ever public health practitioners rely on these new marketing and communications technologies to promote longstanding goals like disease prevention and fostering social responsibility Social Marketing Research for Global Public Health offers proven guidelines for crafting campaigns that work in public health It equips readers with tools pioneered by corporate marketers to increase the efficacy of public health interventions in any setting It also provides practical advice to practitioners seeking to assess their interventions along with examples for effective outreach to promote smoking cessation financial literacy and other social goods Combining overviews of marketing theory and methodology with practical chapters specific to public health Social Marketing Research for Global Public Health provides a crucial and holistic understanding for this new imperative in the field **Innovations in Social**

**Marketing and Public Health Communication** Walter Wymer, 2015-10-06 This volume presents the most current theoretical advances in the fields of social marketing and public health communications The volume is divided in two parts Part 1 contains chapters pertaining to research and theory reflecting improvements and contributions to theories that help improving quality of life It includes literature reviews conceptual research and empirical studies on social marketing communications models to understand individual s risky behaviors and how to improve social interventions The second part emphasizes applied research consisting of best practices applied experiments and case studies on social marketing innovative practices with implications for quality of life Strategic Social Marketing Jeff French, Ross Gordon, 2019-11-08

Adopting an international approach and offering a broader context this second edition of Strategic Social Marketing presents social marketing principles in a strategic critical and reflexive way illustrating the value of applying marketing to solve social problems including A brand new chapter on evaluation Updated advances in relevant research and theorizing New vignettes and short case studies to illustrate theories throughout the text The authors explore the reasons why marketing should be an integral component of all social programme design and delivery when looking to achieve social good while progressing on to the nature and application of social marketing rethinking traditional concepts such as value and exchange in the social context Their hands on features then let students lay out strategy plans frameworks and tactics to influence behaviours
