## **Social Futures Global Visions:**

Social Futures, Global Visions Cynthia Hewitt de Alcantara, 1996-08-08 Where is the world heading at the turn of the twenty first century Towards a desolate landscape of disintegrating societies or towards the construction of new institutions to mitigate violence reduce poverty and promote peace in a rapidly changing global context Do ideas of globalization reflect reality and how far are they either new or helpful Can trends identified in the near and distant past be helpfully extrapolated to predict the future and to understand the present Ralf Dahrendorf Amitai Etzioni Johan Galtung Anthony Giddens Eric Hobbsbawm Fatima Mernissi Tetsuo Najita Emma Rothschild Wole Soyinka and Tatyana Tolstaya take up these and other questions and provide some searching and provocative answers Their discussions span academic disciplines and continents to provide a truly international dialogue on the future of humankind

**Social Movements in Development** Staffan Lindberg, Arni Sverrisson, 2016-07-27 Nationalist movements in the South have been superseded by a plethora of different social movements This book examines these new movements and considers emerging paradigms of organization and mobilization which are related to the role movements play in economic and political development The book analyzes a number of cases and their context and discusses the implications for social movement theory The focus is on social movements among underprivileged and middle class groups and the book is global in scope

**Rebuilding Communities in an Age of Individualism** Paul Hopper, 2017-07-05 As modern societies become increasingly individualistic this fascinating book examines how we can maintain and revive local communities and community life It demonstrates how the major developments and processes of our time notably globalization post industrialism and de traditionalization contribute to this individualism to the detriment of community life The author examines how community is a necessary and important component of human life and discusses possible ways in which to arrest its decline In this regard strategies geared to fostering trust and social capital are outlined as the basis for reinvigorating community life The volume provides a coherent and distinct analysis of community as well as offering concrete policy prescriptions to counter the excessive individualism of our times In both the nature and scope of its analysis it offers a unique contribution to an extremely important issue in the contemporary period one that increasingly preoccupies politicians academics and ordinary citizens

**NGO Field Workers in Bangladesh** Mokbul Morshed Ahmad, 2017-11-22 This title was first published in 2002 NGOs are receiving increasing international attention and resources from policy makers donors academics and others The New Policy Agenda accepts NGOs as agents for social welfare alongside the state and as fostering democracy in the Developing World Astonishingly however there have been very few studies and no books on NGO field workers This study of field workers in Bangladesh provides excellent insights into this neglected field Bangladesh is an excellent example as since independence in 1971 it has been a donor dependent country both financially and functionally and since the 1980s has concentrated this funding towards NGOs rather than to the state The book shows how field workers are seen simply as implementers carrying out directions given by

their superiors and never being consulted on how best to achieve their goals The book examines four types of NGOs international national regional and small local in a number of sample locations It compares the benefits and facilities provided by each NGO to their field workers then explores the socio economic background of both field workers and their mid level managers and examines the interactions between these two groups and between field workers and their clients It also looks at the field workers personal and professional lives and problems and details their opinions on their NGO s activities and policies and on development The findings show that NGO managers and donors lack knowledge of the realities in the field and do not realise how certain policies such as their positive discrimination of women can have negative results It proposes that NGO field workers should be more active in policy making and puts forward several recommendations for changes in the management and structure of future NGOs

**Territoriality in the Globalizing Society** J.v.

Hagen, Stefan Immerfall, 2012-12-06 Globalization is one of the buzz words in the 1990s It points to a world in which geographic location becomes increasingly irrelevant a vision that has aroused both hopes and fears Surprisingly globalization is accompanied by increasing regionalization This volume is a timely contribution to the debate on globalization and regionalism Coming from several disciplines its contributors explore the consequences of a world with no geographical barriers Refuting simple notions of globalization they argue that location and space will remain important dimensions of economic and social development In view of this the book develops a more balanced view of the tension between globalization and regionalism

**Nursing Practice, Policy and Change** Marjorie Gott, 2018-10-08 Many drugs requiring

intravenous infusion are used in situations where precise and rapid administration are essential. A simple miscalculation can easily lead to a massive error in dose administration with disastrous medical consequences. This is the living nightmare of every sleep-deprived junior doctor. *Intravenous Infusions: A Guide To Their Calculation* contains the vital information which doctors, nurses, and pharmacists need on those occasions demanding quick decisions. It could save lives. Community Analysis and Practice Josefin Figueira-McDonough, 2013-05-13 Concentrating on three main themes: environmental complexity, community as the target of intervention, and commitment to social justice, *Community Theory and Practice* updates and expands the current boundaries of thinking about community organization. This book is an important resource for social work students, educators, and practitioners, as well as those who work in the areas of sociology, urban studies, community organization and development, and criminology and other areas of social study and policy. Community Analysis and Praxis Josefin Figueira-McDonough, 2001 First Published in 2001 Routledge is an imprint of Taylor & Francis, an information company. Sanctuaries of the City Anni Greve, 2016-04-01 This book proposes that we can learn from Tokyo about the intrinsic importance of in-between realms to an international culture, the sanctuaries. It argues that certain urban societies are more robust than others because they offer socio-spatial capacities that enable the development of skills for coping with modern forms of living. It studies places that may open the way to an international culture, namely market places, venues for performing arts, and religious sites, which with particular reference to the Durkheimian tradition are considered here in their quality as sanctuaries. From its empirical analysis of such sanctuaries in Tokyo, this book develops a more general theory about mega-cities, urban sociability, and identity. *Building a Heaven on Earth* Albert L. Park, 2014-12-31 Why and how did Korean religious groups respond to growing rural poverty, social dislocation, and the corrosion of culture caused by forces of modernization under strict Japanese colonial rule, 1910-1945? Questions about religion's relationship and response to capitalism, industrialization, urbanization, and secularization lie at the heart of understanding the intersection between colonialism, religion, and modernity in Korea. Yet getting answers to these questions has been a challenge because of narrow historical investigations that fail to study religious processes in relation to political, economic, social, and cultural developments. In *Building a Heaven on Earth*, Albert L. Park studies the progressive drives by religious groups to contest standard conceptions of modernity and forge a heavenly kingdom on the Korean peninsula to relieve people from fierce ruptures in their everyday lives. The results of his study will reconfigure the debates on colonial modernity, the origins of faith-based social activism in Korea, and the role of religion in a modern world. *Building a Heaven on Earth* in particular presents a compelling story about the determination of the Young Men's Christian Association (YMCA), the Presbyterian Church, and the Chondogyo to carry out large-scale rural movements to form a paradise on earth anchored in religion, agriculture, and a pastoral life. It is a transnational story of leaders from these three groups leaning on ideas and systems from countries such as Denmark, France, Japan, and the United States to help them reform political, economic, social, and cultural structures in

colonial Korea This book shows that these religious institutions provided discursive and material frameworks that allowed for an alternative form of modernity that featured new forms of agency social organization and the nation In so doing Building a Heaven on Earth repositions our understandings of modern Korean history      **Globalization on Trial** Farhang Rajaee,2000 Globalization on Trial challenges the conventional view that equates globalization with the expansion of the capitalist economic system With a broad historical and holistic brush the author presents a view of globalization that is both multidisciplinary and multicultural What opportunities must we seize What dangers must we overcome Rajaee examines human governance and the paradox of globalism and nationalism or nativism providing a particularly fresh perspective on Islamic civilization He also focuses on our education system and how it will have to adapt to meet the new challenges

Fighting Back Charlie Fox,2016-06-03 Work for the Dole is not a new idea It was introduced in Victoria in 1932 and became one of the battlegrounds of unemployed politics The provision and administration of sustenance relief work eviction of tenants from their homes the issue of free speech these were the major issues confronting unemployed workers and their families and organisations and they fought successive governments over each one Written in a pleasingly clear and accessible style this absorbing work shows how complex unemployed politics was and situates it in the long history of agitation by unemployed workers It takes issue with the prevailing historical orthodoxy that unemployed workers in Australia during the Great Depression were introspective politically apathetic and concerned only with survival It shows that to the contrary they were active organised and remarkably successful in their aims It also shows that government unemployment relief was as much a product of this agitation as it was of government policies and preferences Yet the movement was always pulled in other direction by the hunger and poverty of its members by their need simply to survive by the disengagement that accompanies individual powerlessness and by resignation in the face of such an incomprehensible disaster That a creative often extensive and vigorous unemployed movement could exist in such circumstances in a decade of the worst poverty Australia has known is surely a tribute to the courage and resistance of the men and women who made unemployed politics Fox s book takes a complex look at the actual politics of the unemployed in the Great Depression a subject which for various reasons Hence it represents a substantial revision of the existing historiography      Ordinary Economies in Japan Tetsuo Najita,2009-09-16 Ordinary Economies in Japan directs our attention to a subordinate yet powerful theme in modern Japanese economic thought that appeared unobtrusively in the mid Tokugawa period and found expression in the formation of voluntary non hierarchical associations of commoners who purposively organized their self help activities apart from state authority Tetsuo Najita s compelling analysis of k is groundbreaking and explains a great deal about Japanese modernization that economic historians have overlooked or undervalued Stephen Vlastos University of Iowa      **Postsecular Cities** Justin Beaumont,Christopher Baker,2011-06-16 This book reflects the wide spread belief that the twenty first century is evolving in a significantly different way to the twentieth which witnessed the advance of human rationality and technological progress

including urbanisation and called into question the public and cultural significance of religion In this century by contrast religion faith communities and spiritual values have returned to the centre of public life especially public policy governance and social identity Rapidly diversifying urban locations are the best places to witness the emergence of new spaces in which religions and spiritual traditions are creating both new alliances but also bifurcations with secular sectors Postsecular Cities examines how the built environment reflects these trends Recognizing that the turn to the postsecular is a contested and multifaceted trend the authors offer a vigorous open but structured dialogue between theory and practice but even more excitingly between the disciplines of human geography and theology Both disciplines reflect on this powerful but enigmatic force shaping our urban humanity This unique volume offers the first insight into these interdisciplinary and challenging debates

**Monarchies and Nations** Paul Dresch, James P. Piscatori, 2005-05-27 Despite their small populations the Arab states of the Gulf exercise an enormous and global influence But all too often these states are treated as if their only importance were as pawns in a global strategic board game and are simply dealt with as mere models of the intersection of oil wealth and power Here Dresch and Piscatori bring together a more nuanced picture exploring how the citizen populations of these states define themselves in a wider context The Gulf provides extreme examples of the nexus of identities not only because these polities are so dependent on transnational flows of wealth and imagery but because at home the citizen workforce is often outnumbered by migrant labour Examining the issues such as Gulf owned transnational media the role of women in the Kuwaiti state and the way Saudi Arabia manages the yearly influx of pilgrims for the Hajj Monarchies and Nations is essential reading for all those interested in the society politics and the future security of the Gulf

**Educational Futures** Ivana Milojevic, 2005-05-19 This book provides an overview and analysis of current tensions debates and key issues within OECD nations particularly Australia the USA Canada and the UK with regard to where education is and should be going Using a broad historical analysis it investigates ideas and visions about the future that are increasingly evoked to support arguments about the imminent demise of the dominant modern educational model Focusing neither on prediction nor prescription this text suggests the goal is an analysis of the ways in which the notion of the future circulates in contemporary discourse Five specific discourses are explored globalisation new information and communications technologies feminist indigenous and spiritual The book demonstrates the connections between particular approaches to time visions of the future and educational visions and practices The author asserts that every approach to educational change is inherently based on an underlying image of the future
